INTRODUCTION

Microlog: Canadian Research Index puts all of Canada's hard-to-find government and research literature at your fingertips. This monthly indexing, abstracting and document delivery service covers all levels of government in Canada, as well as institutions receiving research grants. Most titles included in **Microlog** are available in either paper or microfiche format. Combined with a microfiche collection, the **Microlog Service** is a powerful tool for finding Canadian report publications. The unique **Microlog Accession Number** is the key to immediate retrieval of any document.

SCOPE

Among other documents, **Microlog** includes research papers in physical, natural and social sciences, policy papers, important statistics, and annual reports. Every effort is made to ensure the currency of the index. For instance, documents appearing in the Checklist of Canadian Government Publications are delivered by **Microlog** approximately two months after publication of the list.

LANGUAGE POLICY

Documents issued in English or French are indexed and abstracted in the language of publication, while bilingual documents are indexed and abstracted in both languages.

SOURCES AND COVERAGE

Federal Documents: The **Microlog** editors review all checklists issued by the Canadian Government Publishing Centre and order every document relevant to the service. Except for serials, maps, pamphlets, and manuals, all monographs covered by the Federal Depository Plan are included in the index. Also, a special effort is made to track down elusive but important titles which do not appear in the lists.

Microlog offers a special collection of documents published by the Federal Government but not issued through the Federal Depository Plan. These titles, available to subscribers as the Non-Depository Publications collection, are indicated in the Titles section by a bullet (•). **Microlog** is also the direct distributing agent for many government bodies.

Provincial Documents: Depository arrangements with several provincial libraries have been established to ensure that **Microlog** subscribers receive all publications from those provinces. Where no depository arrangement exists, all publications lists issued by the province are reviewed for acquisitions.

Municipal Documents: Since these titles are very difficult to obtain, the **Microlog** editors make special efforts to include publications from municipal sources.

ACCESS

The Index provides access by subject, corporate or individual author, and series title.

The full **Microlog** file from 1979 to date, consisting of almost 50,000 records, is available online through Can/OLE. This is an ideal way to locate hard-to-find reports which may then be ordered directly online through the Can/DOCS service. Contact: Can/OLE Client Services, CISTI, Ottawa, Ontario, K1A 0S2.

FEATURES

Microlog comprises the following sections:

1. Titles and abstracts: A full bibliographic citation and a descriptive abstract for each title.

2. Name Index: Access by personal author, corporate author, and conference name.

3. Series Titles: Lists by title and number all reports in series in the service; series are available as an ongoing subscription or retrospective collection.

4. Subject Index: Descriptors based on Library of Congress and Canadiana Subject Headings are assigned to each document. A cross-referencing structure assists searchers.

5. Microfiche collections: Lists contents of each fiche collection for quick reference. These collections can be used as current awareness lists in broad subject areas to notify users of new acquisitions. This section is included in the annual cumulation as a separate fiched product.

MICROLOG AND CANADIAN STATISTICS INDEX

Statistical Material: The **Canadian Statistics Index** (CSI) provides further access to statistical material contained in **Microlog** monographs and special or annual reports. The CSI identification number has been included with the **Microlog** citation for the convenience of subscribers to the CSI fiche collection.

Annual Reports: Storage of annual reports in a single sequence has been a problem for clients in the past. The CSI numbers for annual reports are now listed in the bibliographic citation and appear on the microfiche header of each report, to make such sequencing possible.

DOCUMENT DELIVERY

Institutions may subscribe to complete or partial collections of the documents in **Microlog**. Individual copies on microfiche or paper reprint may be ordered through Micromedia's Document Delivery Service. To order, please contact:

INTRODUCTION

Micrologue: Index de recherche du Canada met à votre disposition toutes les publications du gouvernement et les travaux de recherche difficiles à se procurer. Combiné aux collections sur microfiches, le service **Micrologue** constitue un outil très efficace pour retrouver les publications des différents gouvernements du Canada, ainsi que celles des organismes qui reçoivent des subventions pour la recherche. **Micrologue** est aussi un service de livraison de documents, sur microfiches ou sous forme imprimée.

CONTENU

Micrologue contient entre autres des recherches en sciences physiques, naturelles et sociales, des énoncés de politique, des statistiques et des rapports annuels. Par l'intermédiaire du service **Micrologue,** on peut obtenir les documents qui figurent sur la Liste des publications du gouvernement du Canada environ deux mois après leur parution sur cette liste.

POLITIQUE LINGUISTIQUE

Les ouvrages publiés en français ou en anglais sont indexés et résumés dans la langue de publication; les ouvrages bilingues sont traités dans les deux langues.

SOURCES

Publications fédérales: Les rédacteurs de **Micrologue** examinent les listes émises par le Centre d'édition du gouvernement du Canada et commandent les documents pertinents. En dehors des publications en série, cartes, brochures et manuels, toutes les monographies régies par le Programme de dépôt du gouvernement fédéral figurent dans l'index, ainsi que des ouvrages importants ne figurant pas sur les listes.

Micrologue propose aussi une collection spéciale de publications fédérales non déposées, identifiées par un point (•) dans la section Titres et résumés. **Micrologue** est aussi l'agent de diffusion de nombreux organismes gouvernementaux.

Publications provinciales: Des ententes de dépôt ont été conclues avec plusieurs bibliothèques provinciales pour que les abonnés de **Micrologue** reçoivent toutes les publications de ces provinces. Lorsqu'aucune entente n'existe, les listes de publications émises par les provinces sont examinées afin d'acquérir les documents.

Publications municipales: Ces ouvrages étant difficiles à se procurer, les rédacteurs de **Micrologue** redoublent d'ardeur pour les inclure dans l'index.

ACCÈS

L'index imprimé est bilingue et les publications sont répertoriées par sujet, par auteur (collectivité et personne physique) et par titre de collection.

Le fichier complet de **Micrologue**, de 1979 à aujourd'hui, contient près de 50,000 notices et est accessible sur Can/OLE. Il s'agit d'un moyen idéal pour mettre la main sur des rapports difficiles à trouver qu'on peut commander par l'intermédiaire du service Can/DOCS. À ce propos, veuillez vous adresser au Service à la clientèle Can/OLE, ICIST, Ottawa (Ontario), K1A 0S2.

ORGANISATION DE L'INDEX

Micrologue est divisé en cinq sections:

1. Titres et résumés: tous les titres sont catalogués et accompagnés d'un résumé descriptif.

2. Index des noms: donne un accès par auteur, collectivité-auteur et titre de conférence.

3. Titres de collections: tous les rapports publiés en série sont classés par titre et numéro. Ces collections peuvent être commandées individuellement.

4. Index des matières: les descripteurs permettent de trouver facilement les publications pertinentes; un réseau de renvois facilite la recherche.

5. Collections de microfiches: chaque collection apparaît dans une section séparée pour faciliter la recherche. Ces listes peuvent aussi servir à renseigner les usagers sur les nouveautés. Dans la refonte, cette section est insérée sous forme de microfiches.

MICROLOG ET L'INDEX DES STATISTIQUES DU CANADA

Données statistiques: **L'Index des statistiques du Canada** (CSI) constitue une autre source de référence sur les statistiques contenues dans certaines publications indexées dans **Micrologue**. Celles-ci ont un numéro d'ordre spécial qui est inclus dans la référence bibliographique.

Rapports annuels: Afin de rendre le classement des rapports annuels plus facile, le numéro d'ordre CSI correspondant à ces documents figure maintenant dans les références bibliographiques et est inscrit sur les en-têtes de microfiches.

LIVRAISON DE DOCUMENTS

On peut s'abonner à l'ensemble ou à certaines des collections de documents de **Micrologue**. On peut également commander des reproductions de documents sur microfiches ou sur papier par l'intermédiaire du service de livraison de documents de Micromedia. Pour commander, communiquer avec:

Micromedia Ltée

FICHE COLLECTIONS

Documents from MICROLOG are available on microfiche through various subscription plans ranging from the complete collection to subsets by level of government (jurisdiction), geographic area or subject. Listed below are all the collections available with a short explanation for each one.

JURISDICTION COLLECTIONS

CA **FEDERAL:** titles issued at the federal level, about Canada or federal matters, both depository and non-depository.

PR **PROVINCIAL:** titles issued by provincial governments.

MU **LOCAL/MUNICIPAL:** titles issued by local governments, or about local jurisdictional concerns, or about specific cities or towns.

GEOGRAPHIC COLLECTIONS

Documents included in the geographic collections are published at the provincial level or cover a province.

AL **ALBERTA**

AP **ATLANTIC PROVINCES:** Newfoundland, Nova Scotia, New Brunswick, and PEI.

BC **BRITISH COLUMBIA**

MS **MANITOBA - SASKATCHEWAN**

NO **NORTH OF 60:** Northwest Territories, Yukon Territory, Arctic Regions.

ON **ONTARIO**

QU **QUEBEC**

SUBJECT COLLECTIONS

AG **AGRICULTURE:** all aspects of agriculture, food and beverage industries; soil sciences; water in agriculture; fur industry; hunting industry; animal industry; crops and climate; horticulture; wine making.

BS **BEHAVIOURAL SCIENCES:** human behaviour; alcoholism and drug abuse; child abuse; suicide; psychology; public opinion and survey methods.

CO **COMMERCE AND ECONOMICS:** business and finance; consumer affairs; free trade; marketing; tourism; insurance; pension fund administration; taxation; assessment; budget papers for Canada and provinces.

CU **CULTURE, RECREATION AND HUMANITIES:** arts; theatre; sports; lotteries; archaeology; history and historic sites; recreational hunting and fishing; parks; tourism related to recreation; libraries.

ED **EDUCATION:** curriculum; educational research; school and university funding; learning; teacher collective bargaining and pension funds; community and school.

EN **ENERGY:** resources, supply and demand; generation; storage; transmission; regulation; conservation; exploration; alternative resources; insulation.

EV **ENVIRONMENT:** pollution; environmental policy; assessment reports; natural areas and park management; environmental accidents; hazardous wastes; wildlife resources; environmental health.

EX **EXTERNAL AFFAIRS:** international relations; defence; aid to developing countries; international trade; free trade; immigration policy; arms control; wars and warfare.

FI **FISHERIES:** commercial fishing; fish resources; fish biology; aquatic resources; fish habitat; aquaculture; aquatic ecology; fish trade; law of the sea related to fisheries; fishing boat accidents.

FO **FORESTRY:** forest ecology; logging; forest products; wood trade; forest fires; reforestation; wood crops for energy; pulp and paper industry.

HE **HEALTH AND MEDICINE:** public health and health services; health insurance; nutrition; vital statistics; medical ethics; diseases and hygiene; environmental health; disease aspects of occupational health.

JU **JUSTICE AND LAW:** crime; corrections; ombudsman; coroner; human rights; police activities; firearms; law reform.

LA **LABOUR:** employment; manpower; occupational health and safety; collective bargaining; vocational training and retraining; wages; compensation; strikes.

LS **LIFE SCIENCES:** biology; botany; zoology; genetics; biotechnology; medical sciences.

NP **NATIVE PEOPLES:** any material related to issues involving Canada's Native peoples.

NR **NATURAL RESOURCES, EARTH SCIENCES AND MINING:** land, water and mineral resources; land reclamation; flood control; hydrology; oceanography; mining; geology; economic geology; mining techniques; metallurgy.

PS **PHYSICAL SCIENCES:** practical sciences and technology; mathematics; physics; computer sciences; chemistry; meteorology; hydrology; geophysics; oceanography; nuclear science; metallurgy; earth sciences; engineering; astronomy; robotics; telecommunications.

PL **PLANNING, HOUSING AND CONSTRUCTION INDUSTRY:** planning policy and regulation; building technology; housing rehabilitation; availability; land use planning; architecture.

PA **PUBLIC ADMINISTRATION:** politics, government and administration; government operations; intergovernmental relations; public finance, budgets, estimates; parliamentary process; elections; ombudsman; taxation; annual reports of municipalities; privatization.

PW **PUBLIC WORKS:** government management of infrastructures; public utilities; waste management; fire control; emergency services; Crown land management.

SA **SOCIAL AFFAIRS:** social problems; social services; alcohol and drug problems; housing and public housing; adoption; wife abuse; families; women; Native peoples; minorities; handicapped; public welfare; unemployment; demography; veterans affairs; aged.

SC **SCIENCE & TECHNOLOGY:** agriculture; energy; environment; fisheries; forestry; life sciences; natural resources; physical sciences; planning; telecommunications; transportation.

ST **STATISTICS:** all material from Microlog that is included in the Canadian Statistics Index.

TE **TELECOMMUNICATIONS:** communications and broadcasting policy, regulation, technology; information systems; data base management; publishing; courriers and postal service; telephones; telex; communication satellites.

TR **TRANSPORTATION:** all modes of transportation; traffic planning and engineering; vehicles; transportation fuels and fuel conservation; roads and highways; pipelines.

SPECIAL COLLECTIONS

CI **CRITICAL ISSUES:** newsworthy topics such as abortion, the environment, defence, and free trade.

CF **FISHERIES & OCEANS CANADA:** documents published by the Department of Fisheries and Oceans.

CM **CANADA CENTRE FOR MINERAL & ENERGY TECHNOLOGY (CANMET)**

• **NON-DEPOSITORY COLLECTIONS:** a bullet in the Abstracts Section indicates a document published by the federal government, but not issued through the Federal Depository Plan. This is available as a complete collection or as a Science or Social Science sub-collection.

COLLECTIONS DE MICROFICHES

Les publications incluses dans MICROLOG sont en vente sur microfiches, en collection complète ou en collections plus petites regroupant des titres par juridiction, par aire géographique ou par matière.

COLLECTIONS GOUVERNEMENTALES

CA **FÉDÉRAL:** publications émises par le gouvernement fédéral, régies ou non par le Programme de dépôt.

PR **PROVINCIAL:** publications des gouvernements provinciaux.

MU **LOCAL/MUNICIPAL:** publications émises par les gouvernements locaux et municipaux, ou concernant une juridiction locale ou municipale.

COLLECTIONS GÉOGRAPHIQUES

Les publications incluses dans ces collections sont publiées au niveau provincial ou concerne une province.

AL **ALBERTA**

AP **PROVINCES ATLANTIQUES:** Terre-Neuve, Nouvelle-Écosse, Nouveau-Brunswick, Ile-du-Prince-Édouard.

BC **COLOMBIE-BRITANNIQUE**

MS **MANITOBA et SASKATCHEWAN**

NO **NORD DU 60E:** Territoires du Nord-Ouest, Yukon, régions arctiques.

ON **ONTARIO**

QU **QUÉBEC**

COLLECTIONS PAR MATIÈRE

AG **AGRICULTURE:** tous les aspects de l'agriculture; industries des breuvages et de l'alimentation; études des sols; eau en agriculture; industrie de la fourrure; industrie de la bétail; cultures et climat; horticulture; viniculture.

BS **SCIENCE DU COMPORTEMENT:** comportement humain, alcoolisme et toxicomanie; enfance maltraitée; suicide; psychologie; criminologie; opinion publique et sondage.

CO **COMMERCE ET ÉCONOMIE:** affaires et finances; consommation; libre-échange; marketing; tourisme; assurance; caisses de retraite; taxe et évaluation foncière; budgets fédéral et provinciaux.

CU **CULTURE, LOISIRS ET SCIENCES HUMAINES:** arts; théâtre; sports; loteries; archéologie; histoire; sites historiques; chasse et pêche sportive; parcs; tourisme (aspect récréatif); linguistique; bibliothèques.

ED **ÉDUCATION:** guide pédagogique; financement des écoles et des universités; apprentissage; conventions collectives et caisses de retraite des enseignants.

EN **ÉNERGIE:** offre et demande; production; emmagasinage; transmission; réglementation; conservation; exploration; énergies douces; isolation.

EV **ENVIRONNEMENT:** pollution; politique de l'environnement; études d'impact; zones de conservation et gestion des parcs; accidents écologiques; déchets dangereux; faune; santé et environnement.

EX **AFFAIRES EXTÉRIEURES:** relations internationales; défense; aide étrangère; commerce international (libre-échange); immigration; guerre et armements.

FI **PÊCHE:** pêche commerciale; ressources halieutiques et aquatiques; biologie du poisson; aquiculture; écologie marine; loi de la mer.

FO **FORÊTS ET SYLVICULTURE:** écologie et exploitation forestière; produits de la forêt; incendies de forêts; reboisement; utilisation du bois comme énergie; pâtes et papier.

HE **SANTÉ ET MÉDICINE:** santé publique et services de santé; assurance-maladie; nutrition; statistique médicale; déontologie médicale; maladies et hygiène; santé et environnement; santé au travail (aspect pathologique).

JU **JUSTICE ET DROIT:** criminalité; services correctionnels; protecteur du citoyen; coroner; droits de la personne; activités policières; armes à feu; réforme du droit.

LA **TRAVAIL:** emploi, main d'oeuvre; santé et sécurité au travail; conventions collectives; formation et recyclage professionnel; salaires; accidents du travail; grèves.

LS **BIOLOGIE:** botanique; zoologie; génétique; biotechnologie; médecine.

NP **POPULATIONS AUTOCHTONES:** publications ayant trait aux peuples autochtones canadiens.

NR **RESSOURCES NATURELLES:** ressources du sol, aquatiques et minérales; améliorations foncières; contrôle des crues; hydrologie; océanographie; mines; géologie; techniques minières; métallurgie.

PS **SCIENCES PHYSIQUES:** sciences appliquées et technologie; mathématiques; physique; informatique; chimie; météorologie; hydrologie; géophysique; océanographie; sciences nucléaires; métallurgie; géologie; génie; astronomie; télécommunications.

PL **PLANIFICATION, LOGEMENT ET INDUSTRIE DE LA CONSTRUCTION:** planification, urbanisme et zonage; construction; bâtiment; rénovation domiciliaire; utilisation du sol; architecture.

PA **ADMINISTRATION PUBLIQUE:** politique et gouvernement; opérations gouvernementales; relations inter-gouvernementales; finances publiques et budget; processus parlementaire; élections; protecteur du citoyen; impôt; rapports annuels municipaux; privatisation.

PW **TRAVAUX PUBLICS:** gestion des infrastructures; services publics; élimination des déchets; protection contre l'incendie; services d'urgence; terres de la Couronne.

SA **AFFAIRES SOCIALES:** problèmes sociaux; services sociaux; alcoolisme et toxicomanie; logement public; adoption; femmes battues; familles; autochtones; minorités; handicapés; bien-être social; chômage; démographie; anciens combattants; personnes âgées.

SC **SCIENCE ET TECHNOLOGIE:** agriculture; énergie; environnement; pêche; sylviculture; biologie; ressources naturelles; sciences physiques; planification; télécommunications; transport

ST **STATISTIQUES:** publications comprises dans Microloget aussi incorporées à l'Index des statistiques du Canada.

TE **TÉLÉCOMMUNICATIONS:** communications et politiques de radiodiffusion; systèmes d'information; bases de données; édition; service postal et messagerie; téléphones; télex; satellites de communication.

TR **TRANSPORT:** tous les moyens de transport; gestion et génie du transport; véhicules; carburants; système routier; oléoducs et gazoducs; aspect de l'environnement du transport.

COLLECTIONS PARTICULIÈRES

CI **SUJETS D'ACTUALITÉ:** sujets de l'heure comme l'avortement, l'environnement, la défense et le libre-échange.

CF **PÊCHES ET OCÉANS CANADA**

CM **CENTRE CANADIEN DE LA TECHNOLOGIE DES MINÉRAUX ET DE L'ÉNERGIE**

• **COLLECTIONS NON DÉPOSÉES:** un point dans la section Résumés indique une publication émise par le gouvernement fédéral, mais non régie par le programme de dépôt. Ceci est disponible en collection complète ou en collection Scientifique ou Sciences Humaines.

Sample CRI Search

"How can a person from a foreign country qualify for refugee status in Canada?"

The researcher can search in CRI as in any library catalogue - by subject, author and title. Because the index is bilingual, searching can be done in English or in French.

Recherche type avec IRC

"Comment une personne d'un pays étranger peut-elle demander le statut de réfugié au Canada?"

La méthode de recherche dans IRC est la même que dans une bibliothèque, puisque les documents sont indexés par auteur, par sujet et par titre. L'index étant bilingue, la consultation peut se faire en français ou en anglais.

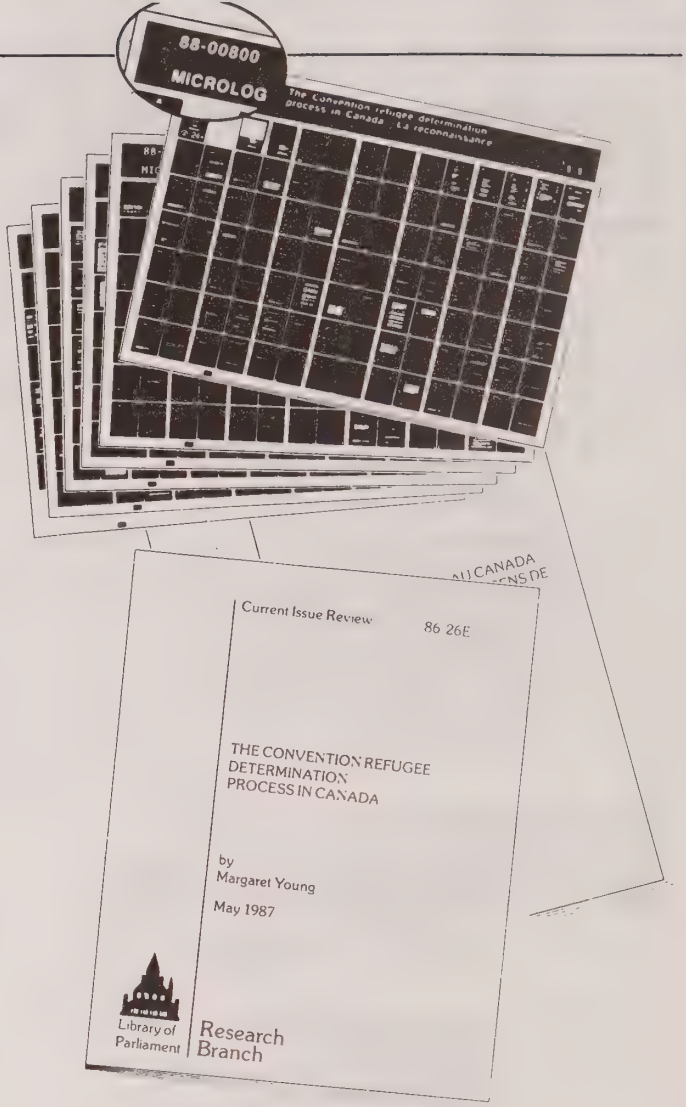
STEP 2/DEUXIÈME ÉTAPE

A unified search strategy

The search strategy should include all the monthly issues. Start with the most recent issue and work back. Monthly issues are cumulated annually.

Établir une stratégie de recherche unifiée

La stratégie de recherche doit tenir compte de toutes les publications mensuelles, à commencer par les plus récentes. Chaque année, ces publications font l'objet d'une refonte.



STEP 3/TROISIÈME ÉTAPE

Retrieve the publication

Each bibliographic citation gives a full description of the relevant document. Locate the document by the microfiche number in the library's collection or order from Micromedia. Individual publications are available for purchase on microfiche or paper. The bibliographic description provides publisher source information.

Repérer la publication

Chaque notice bibliographique comprend une description complète du document; celui-ci peut être repéré grâce au numéro de microfiche de la bibliothèque; sinon, il faut le commander à Micromedia. On peut se procurer les monographies sur microfiches ou sur papier. La description bibliographique comporte également des indications sur l'éditeur.

TITLES AND ABSTRACTS

TITRES ET RESUMES

1st Avenue NE retail market study

Walker Brown Urban Consultants Ltd. Calgary, Alta. : 1st Avenue NE Business Association ; Calgary Planning and Building Dept., 1992. ii, 95 p. : maps. *Summary (i, 22 p.) laid in. CSI 89202.205.*
MICROLOG 93-01336 2 fiche

This report summarizes the findings of the study. The study determines the existing market base and the most appropriate future role; determines the types of retail uses and the total retail floor space potential along 1st Avenue; examines the potential role of the hospital frontage on the south side of 1st Avenue in terms of accommodating future retail development; recommends appropriate marketing strategies to achieve the retail potential of the area; and determines the appropriate sequence of development and recommends measures to ensure that problems associated with commercial expansion do not impact the adjoining residential community.

3DHEAT : a computer program simulating three-dimensional heat conduction in a solid due to a pulse point source

by B.W. Gu. Toronto : Ontario Hydro, Research Division, 1992. i, 27 p. : ill. Bibliogr. (Report ; no. 92-180-K)
MICROLOG 93-04378 1 fiche

This report presents a generalized computer program, 3DHEAT, for simulating the three-dimensional transient heating in a solid due to a powerful point source. The model takes into account the non-linear thermal properties as a result of melting and vaporization. A finite difference technique is employed to solve the non-linear heat conduction equations under various geometry. Program validation with two simplified analytical cases is demonstrated.

15-35kV class, 600 ampere separable connector systems operability features and applications

by T.R. Taylor. Montreal : Canadian Electrical Association, Distribution Section, 1991. 10 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06032 1 fiche

Feeder circuits for underground distribution have typically included switches for isolating circuits or providing power from alternate sources, however many original equipment connectors no longer meet current requirements. Various 15 to 35 kilovolt class, 600 ampere separable connector systems are presented. These systems are explained and illustrated, with particular attention paid to their operability features, mating components, and common applications. Cable-to-equipment connectors, direct and indirect testing and grounding, and cable-to-cable connections are discussed.

20 year forestry development plan, 1990-2009

St. John's : Dept of Forestry and Agriculture, Newfoundland Forest Service, 1992. x, 133 p. : ill., maps. *CSI 49133.200*
MICROLOG 93-03615 2 fiche

In 1984, the Department of Forestry and Agriculture developed its first 20-year plan to provide a planning framework for the activities of the Forestry Branch and to detail proposed activities for 1984-89. The current 20-year plan extends the planning horizon to the year 2009 and provides detailed proposals for 1990-95. This document includes background information on the forest resource base, the economy and forest industry of Newfoundland and Labrador, enabling legislation, past management agreements, environmental and land use constraints on forest management, forest policy development and timber supply and demand. It describes the current management status and details the programs for the next five years.

46 kV electronic recloser package for automatic line sectionalizing using vacuum switch and electronic reclosing control

by D. Kundu. Montreal : Canadian Electrical Association, 1991. 6 p. : ill. *Presented at the CEA Fall Convention*
MICROLOG 93-06050 1 fiche

At Ontario Hydro, 44 kV sub-transmission circuits are protected by relay controlled circuit breakers at the transformer station. The circuit protection is designed initially based on a minimum short circuit to load ratio of 4:1. As the load increases this ratio decreases in the circuit reducing the protection margins. To maintain the required level of protection in the line an automatic sectionalizing device is installed in the circuit. In the past, old breakers with electronic reclosing control were used which required large space and were costly. A package suitable to install on the pole is not currently available in the market. To overcome this problem an automatic sectionalizing device with vacuum switch and electronic reclosing control was developed and applied in an Ontario Hydro 44 kV sub-transmission circuit to improve protection and increase reliability.

60-Hz coil driver

by R.R. Scheer. Toronto : Ontario Hydro, Research Division, 1992. 27 p. : ill. Bibliogr. (Report ; no. 92-79-K)
MICROLOG 93-03292 1 fiche

A new animal experiment studying the effects of 60 Hz magnetic fields on melatonin production was started, with one group of rats being exposed to a 1-m T field and a control group in a similar but non-energized apparatus. To produce the magnetic field, it was decided to reuse two of the coils developed for the MFRRS experiment. These coils require about 120 A to produce the required field, but at this current, coils will overheat if water cooling is not provided. This required that a new coil driver be built capable of delivering 120 A and the water cooling. This report describes the design and installation procedure for the coil driver.

138 kV voltage distortion due to GIC induced harmonics

by J.H. Sawada and T.G. Martinich. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operating Section, Insulation Coordination Subsection, 1992. 23 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06100 1 fiche

A 138 kV circuit from Skeena substation to Aiyansh, in the B.C. Hydro system, was extended by 174 km to Stewart substation. This long radial system, grounded only at Skeena and Stewart, forms a ground loop for geomagnetically induced current (GIC) to flow. This paper describes the problem of line tripouts which coincided with geomagnetic storms and provides a system analysis. It goes on to identify the nature of the harmonic problem with system driving point impedance frequency scans and the transfer voltage per current injection frequency scans. Means of eliminating 4th harmonic excitation from external sources are then examined (shunt capacitors, 4th harmonic filter, series blocking capacitors). Eliminating GIC and reducing overvoltages at Stewart is then examined, including transient overvoltages during SLG faults at Stewart. Finally, analytical results and conclusions are provided.

1989 report on fishing vessel performance, Scotia-Fundy region

Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region, Program Coordination and Economics Branch, Economic Analysis Division, 1990. v, 40 p. (Economic and commercial analysis report ; no. 72) ISSN 0843-5626
MICROLOG 93-04248 1 fiche

Various components of the Scotia-Fundy fishing fleet are surveyed yearly for vessel performance information. Approximately one-third of the active fleet is covered each year, so that by the end of a three-year cycle, samples of the entire active Scotia-Fundy fleet under 65 ft in length overall (LOA) are surveyed. The 1989 vessel performance survey focused on the Bay of Fundy scallop fleet and vessels less than 45 ft LOA that were involved in a mixed fishery. Only those registered to fish in lobster fishing areas 34, 35, 36, and 38 were considered.

1991 Lake Minnewanka visitor survey report, Banff National Park

Ottawa : Environment Canada, Canadian Parks Service, Western Regional Office, Strategic Information Division, 1992. 44 p. : ill.
MICROLOG 93-07602 1 fiche

The Lake Minnewanka day use area is located in Banff National Park approximately 10 km from the park entrance and 3 km from the site of Banff. The area is very popular, resulting in a survey being conducted to guide future planning decisions. The visitor survey was designed to determine the number of visitors using the area; to evaluate visitor use and satisfaction with facilities; to develop a demographic profile of visitors; to identify the types of experiences visitors have when using the area; to evaluate the need for accessibility for disabled persons; to evaluate visitor reaction of man-made developments; and to determine if vehicle parking is a problem A two-staged sample design was conducted. In the first stage, visitors were interviewed in their vehicles as they were leaving the area. The second stage involved giving visitors a questionnaire to complete and mail back after their trip. The survey was conducted on randomly selected days during July and August 1991.

1993-94 estimates of proposed investments

Alberta Heritage Savings Trust Fund. Capital Projects Division. Edmonton : The Division, 1993. 19 p. *CSI 35283.002.* ISBN 0-7732-0195-5
MICROLOG 93-08064 1 fiche

The estimates present to the Legislative Assembly the investment proposals being made for the Capital Projects Division of the Alberta Heritage Savings Trust Fund. Capital Projects Division investments are made in projects which will provide long-term economic or social benefits to the people of Alberta but which may not necessarily by their nature yield a return to the Trust Fund. Summaries of amounts to be voted are included.

1993-94 estimates, part I : the government expenditure plan

Canada. Dept. of Finance. Ottawa : Supply and Services Canada, Canada Communication Group, Publishing, 1993. 73, 75 p. *Bilingue (Budget des dépenses...du gouvernement). CSI 21104.012.* ISBN 0-660-57985-5
MICROLOG 93-04950 2 fiche

The Estimates communicate to Parliament the level and nature of the federal government's spending plans for the coming fiscal year. Part I gives Parliament an overview and situates the Estimates in the context of the overall expenditure framework. It covers the policy sector resource envelopes which include the level of resources allocated for all elements of departmental activity and defines the resources earmarked for maintaining, developing and implementing policies and programs. Focuses also on person-years and presents an overall person-year summary. Presents totals, for transfer payments, payments to Crown corporations and operating and capital expenditures. Also addresses items which represent investments requiring parliamentary approval.

MICROLOG 93-04939 9 fiche

The main estimates, or Part II, is the document that directly supports the Appropriation Act. The basic structural units are the Votes and Statutory items which total the proposed expenditures under each departmental or agency program. Presentation of the estimates is by ministry, department and agency, with a statement of objectives for each program, and activity descriptions, transfer payments and revolving funds. Crown corporations are also presented. Data is shown for the previous year to provide a basis for comparison.

MICROLOG 93-04635 4 fiche

This document provides estimates detail for the department and its programs primarily in terms of the results expected and the money spent. It begins with an overview of the roles and responsibilities of the portfolio and the spending plan for the coming fiscal year. This format is followed for the department and each of the programs administered. Administrative information includes a profile of financial requirements by object, personnel requirements, capital expenditures, transfer payments, revenue, loans, investments and advances, and the net cost of the program. Details include such information as personnel requirements, by occupational group, authorized person-years, and current salary range. Program descriptions include formal programs as well as activities related to government policy.

1993-94 insect and disease control in the home garden

Toronto : Ministry of Agriculture and Food, 1993. 95 p. *CSI 55101.019.* ISSN 0713-1313
MICROLOG 93-08968 2 fiche

This publication provides the home gardener with pest control information necessary to grow productive vegetables and fruit, as well as attractive trees, shrubs and flowers. Emphasis is placed on good cultural practices as a way of controlling pests. The use of pesticides is recommended only when and where actually needed. Information is provided on insect and disease control for vegetables, fruit, ornamental plants, and lawns. Insecticides, fungicides, multipurpose mixtures, and rodenticides with domestic labels are included.

A dix pas du succès : la petite entreprise canadienne sur les marchés mondiaux : rapport sur la petite entreprise au Canada, 1992

Ottawa : Industrie, sciences et technologie Canada, Bureau de l'entrepreneurship et de la petite entreprise, 1992. 96 p. *L'éd. anglaise (Exporting for competitiveness : ten steps...) : 93-04543/1.* ISBN 0-662-97886-2
MICROLOG 93-06924 2 fiche

Ce rapport a pour objectif d'aider le chef d'une petite entreprise qui n'a jamais exporté à évaluer de façon réaliste ses possibilités dans ce domaine. Il a pour second objectif de guider, étape par étape, les gens d'affaires qui relèvent le défi de l'exportation pour la première fois. On y trouvera plusieurs explications sur l'exportation de produits ou de services vers le marché américain. Les sujets qui y sont particulièrement abordés sont les suivants: la petite entreprise canadienne et l'exportation; l'évaluation des possibilités d'exportation; le choix d'un marché-cible et étude du marché; la maîtrise de la terminologie de l'exportation; l'élaboration d'une stratégie d'entrée sur le marché; l'établissement des

A l'heure du changement : rapport

Canada. Comité d'étude des instruments médicaux. Ottawa : le Comité, 1992. vii, 105, vii, 94 p. Bibliogr. *Bilingue (Direction for change : report).* ISBN 0-662-59334-0
MICROLOG 93-04857 3 fiche

Les instruments médicaux jouent un rôle important dans le cadre de la prestation des soins de santé et des milliers d'instruments nouveaux et sans cesse améliorés font leur entrée sur le marché canadien chaque année. S'assurer que ces instruments médicaux, qui sont pour la plupart fabriqués à l'étranger, sont sûrs et efficaces est une tâche de plus en plus complexe. Ce document présente le rapport établi par le Comité d'étude des instruments médicaux. Il contient des recommandations préconisant des mesures jugées aptes à améliorer la santé des Canadiens et à appuyer les efforts entrepris en vue d'instituer une réglementation des produits médicaux répondant aux attentes exprimées relativement à la qualité.

A la défense de l'entreprise publique : critique des arguments d'efficience économique appuyant la privatisation des sociétés d'état

Ottawa : Centre canadien du marché du travail et de la productivité, Direction syndicale, 1988. i, 31 p. Bibliogr. (Cahiers info-travail ; no 1) *L'éd. anglaise (In defence of public enterprise : a critique...) sur la même fiche.*
MICROLOG 93-05778 1 fiche

Ce document vise avant tout à faire une analyse critique du principal argument favorisant la thèse de la privatisation des sociétés d'Etat et, sur cette base, à défendre la pertinence continue de l'entreprise publique comme outil de la politique publique. Y sont principalement examinés les points suivants: données sur l'efficience économique de l'entreprise publique; remise en question de la concurrence et de l'efficience de l'entreprise publique et privée dans les années 80; le rôle des politiques de l'entreprise publiques (Air Canada et Pétro-Canada); et, l'efficience de l'entreprise privée pour les politiques.

A la recherche de l'Octogone : les archéologues en quête des secrets enfouis sous le dépôt de marchandises de la York Factory

par S.B. Ebell et P.J. Priess. Ottawa : Environnement Canada, Service canadien des parcs, 1993. 12 p. : ill. Bibliogr. (Bulletin de recherches ; no 302) *L'éd. anglaise (In search of the Octagon...) : 93-07790/1.* ISSN 1184-7174
MICROLOG 93-07573 1 fiche

Après avoir servi de poste de traite pour la Compagnie de la baie d'Hudson pendant près de trois siècles, la York Factory ne compte plus de nos jours que deux constructions en bois; la première est un petit édifice bâti au XXe siècle, qu'on appelle aujourd'hui la 'bibliothèque', et la seconde un grand bâtiment connu sous le nom de 'dépôt de marchandises'. Les fouilles archéologiques entreprises en 1991 pour faciliter le travail des restaurateurs ont révélé la présence sous le bâtiment de dépôt de nombreux vestiges d'un ancien fort, l'Octogone, construit vers la fin du XVIIIe siècle. Ce bulletin de recherche se penche précisément sur les secrets enfouis sous le dépôt de marchandises de la York Factory.

Aboriginal peoples and electoral reform in Canada

Robert A. Milen, editor. Toronto : Dundurn Press, 1991. xvii, 196 p. : maps. Bibliogr. (Research studies ; vol. 9) *French ed (Les Peuples autochtones et...) : 93-06629/3. CSI 22497.214.* ISSN 1188-2743 ISBN 1-55002-105-2
MICROLOG 93-06654 3 fiche

This volume addresses issues of equality in Canada's electoral system that affect Aboriginal people, and what improvements, if any, are needed or should be made to the electoral system to accommodate the Aboriginal community of interest. It contains four studies which cover the major issues regarding Aboriginal people and efforts to increase their involvement in the federal electoral system. These are: Aboriginal constitutional and electoral reform; Aboriginal electoral districts for Canada: lessons from New Zealand; Aboriginal peoples and campaign coverage in the north; electoral reform and Canada's Aboriginal population. an assessment of Aboriginal electoral districts.

The Aboriginal peoples and Quebec : the road to the present

Montreal : Gouvernement du Québec, Ministère du Conseil exécutif, Secrétariat aux affaires autochtones, 1991. 38 p. Bibliogr. *CSI 67210.201.* ISBN 2-551-14856-1
MICROLOG 93-04191 1 fiche

This document examines the current condition of Quebec's aboriginal people, their relations with other Quebecers and with the Quebec government, and Quebec's initiatives with respect to aboriginal affairs.. It is the basis for discussions at four regional symposiums where aboriginal people and representatives from various parts of Quebec will meet during the fall of 1991. It begins with an overview of the demography, social conditions, culture, economy, and political structure of Quebec's aboriginal peoples, followed by a description of the stages which have marked relations between the Quebec government and aboriginal people over the last thirty years.

Aboriginal peoples in urban centres : report

National Round Table on Aboriginal Urban Issues (1992 : Edmonton, Alta.). Ottawa : Royal Commission on Aboriginal Peoples, 1993. viii, 99 p. : ill. *French ed. (Les Peuples autochtones vivant en milieu...) : 93-07687/2.* ISBN 0-660-14964-8
MICROLOG 93-07686 2 fiche

Central themes that emerged at the Round Table included the survival of Aboriginal identity in an environment that is usually indifferent and often hostile to Aboriginal cultures; the existing void in government policies to recognize and reinforce the goals of urban Aboriginal people; the need for accessible and appropriate human services; and difficult questions around how urban aboriginal people can gain an effective voice in governance and decision making. The purpose of this report is to focus public attention on urban Aboriginal issues and to encourage broad participation, by Aboriginal and non-Aboriginal people, civic leaders, and policy makers, in seeking answers to the questions raised at the round table and in other consultations carried out by the Commission.

Abortion : constitutional and legal developments -- Rev.

by M. Dunsmuir. Ottawa : Library of Parliament, Research Branch, 1992. 26 p. Bibliogr. (Current issue review ; 89-10E) *French ed. (L'Avortement : développements constitutionnels...) on the same fiche. Revised 13 March, 1992.* ISBN 0-660-14640-1
MICROLOG 93-00749 1 fiche

Because it involves deeply held, and widely varying, viewpoints about individual rights, societal responsibilities, and the role of women in society, abortion is a divisive and potentially disruptive issue. A new abortion bill (Bill C-43) was introduced in Parliament late in 1989 in the hope that compromise legislation would resolve the abortion debate at the federal level. The bill was defeated in the Senate by an unprecedented tied vote in January 1991. This document reviews the jurisdiction over health issues. It discusses the 1969 Law concerning abortion, the Badgley Committee, the Charter of Rights and Freedoms and the Morgentaler decision, protecting the fetus: Borowski and Daigle, and provincial jurisdiction over abortion.

Abundance, age, size, sex and coded wire tag recoveries for chinook salmon escapements of Campbell and Quinsam rivers, 1991

by H.R. Frith, B.L. Nass and T.C. Nelson. Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1993. viii, 57 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2199) ISSN 0706-6473
MICROLOG 93-08086 1 fiche

This report is the fifth in a series describing the escapement monitoring and biological sampling of chinook salmon in the Campbell/Quinsam system. The 1991 escapements of chinook salmon were calculated using the adjusted Petersen method by tagging carcasses to produce separate estimates for sexes and rivers and summing these to form a total estimate for the in-river escapement of chinook. In this report, potential biases in the Petersen method, carcass tagging method and method of stratification are discussed. Assumptions for the methods used and the tests for biases caused by violations of assumptions are also described in the methods section. The results section presents the population estimates, tests for bias in tagging and recovery, population composition and the results of coded wire tagging studies. The results are then discussed with respect to other studies and recommendations are made regarding future studies

Abundance, age, size, sex and coded wire tag recoveries for chinook salmon escapements of Kitsumkalum River, 1991

by T.C. Nelson. Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1993. viii, 43 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2182) ISSN 0706-6473
MICROLOG 93-08085 1 fiche

This report is the fourth in a series describing the escapement monitoring and biological sampling of chinook salmon in the Kitsumkalum River. The escapement of chinook salmon was calculated using the adjusted Petersen method by tagging live chinook in situ and recovering carcasses. Separate population estimates were calculated for each sex for both the upper and lower sections of the river. In this report potential biases in the Petersen method, the live tagging approach, and the method of stratification are discussed. Assumptions for the methods used and the tests for biases caused by violations of assumptions are also described in the methods section. The results section presents the population estimates, tests for bias in tagging and recovery, population composition and the results of coded wire tagging studies. The results are then discussed with respect to previous studies.

The Acadians of Minas -- Rev.

by B. Dunn. Ottawa : Environment Canada, Parks Service, National Historic Sites, 1990. 32 p. : maps. Bibliogr. (Studies in archaeology, architecture and history) ISSN 0821-1027 ISBN 0-660-11771-6
MICROLOG 93-02377 1 fiche

Early French visitors and settlers called the area at the eastern arm of the Bay of Fundy 'les Mines' because of the copper deposits they found there. Minas was settled by two Port-Royal families in the early 1680s. The Minas communities grew quickly as a result of natural population increase and migration of young people from the Port-Royal area. This document presents information on the French Regime, 1680s-1713, and the British rule, 1713-1765.

Access and impact : an evaluation of the Intervenor Funding Project Act, 1988 : a report

by W.A. Bogart and M. Valiante. Toronto : Ministry of the Attorney General; Ministry of Energy; Ministry of the Environment, 1992 xv, 339 p. Bibliogr.
MICROLOG 93-00439 5 fiche

This report reviews the objectives of the Intervenor Funding Project Act (IFPA), the events leading up to the passage of IFPA in 1988 and related initiatives now underway that could have an impact on IFPA or its scope. It also discusses the findings of the file search and the submissions received. It looks at the quantitative findings in a series of Tables and sets out excerpts from the submissions in detail in order to make the views known to those deciding the fate of IFPA and to allow respondents access to the views of others. Finally, it contains conclusions about the operations of IFPA during the pilot project and recommendations for changes to the Act or related procedures.

Accessibilité universelle et travaux de rénovation réalisés dans le cadre du PARCQ

par S. Lanctôt. Ottawa : Société canadienne d'hypothèques et de logement, 1991. xviii, 129 p. : ill. Bibliogr.
MICROLOG 93-07611 2 fiche

Elaboré par la Société d'habitations communautaires Logique Inc., conjointement avec le Service de l'habitation et du développement urbain de la Ville de Montréal, le projet avait comme objectif d'établir la faisabilité et les mesures requises pour susciter la création de logements universellement accessibles via les programmes d'aide à la rénovation, pour l'intégration des principes et normes de l'accessibilité universelle aux travaux majeurs de rénovation requis pour les bâtiments. Il se divise en deux étapes. La première, l'expérimentation, a permis de recueillir des informations concernant les bâtiments, les travaux à réaliser, le coût de ces travaux, l'intérêt des propriétaires et autres. La deuxième étape consistait en l'analyse des résultats obtenus, afin de confirmer ou d'infirmer les hypothèses qui sont présentées dans la section suivante. Ce rapport constitue le fruit de cette analyse.

An Account of a workshop on research approaches to predation/competition questions in river fish communities

by C.D. Levings and G.A. Hunter. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, West Vancouver Laboratory, 1992. iv, 66 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2150) ISSN 0706-6473
MICROLOG 93-03485 1 fiche

A workshop was convened to explore alternatives to research on predator-prey relationships in river fish communities. To examine the various possible methods, investigators from the Pacific Northwest presented case studies on approaches they had used to examine predation and competition. These studies were discussed for estimation of predation/competition rates, the influence of behaviour and habitat on rate, the impact of predation/competition on fish production, and modelling and statistical methods. Participants rated a number of techniques and experimental designs for research projects. An annotated bibliography of papers dealing with predation on and competition with juvenile salmonids in rivers is included.

Accroissement des dépenses consacrées aux peuples autochtones

Ottawa : Affaires indiennes et du Nord Canada, 1993. iv, 62 p. : ill. Bibliogr. *L'éd. anglaise (Growth in federal expenditures on aboriginal peoples) : 93-05077/1.*
MICROLOG 93-08785 1 fiche

Les Canadiens ont pris conscience depuis quelques années de l'importance et de la complexité des questions autochtones. Le gouvernement fédéral a réagi en lançant plusieurs initiatives fédérales. Ce document donne une vue d'ensemble de l'évolution des dépenses fédérales consacrées aux programmes autochtones de 197-1976 à 1992-1993. De plus, il approfondit des périodes particulières de ces années afin de comprendre les facteurs et les tendances essentiels qui sous- tendent ces importants investissements fédéraux.

Accurate control testing for clay liner permeability

by R.J. Mitchell. Toronto : Environment Ontario, Research and Technology Branch, Environmental Research, 1991. ii, 57 p. : ill. Bibliogr. ISBN 0-7729-8676-2
MICROLOG 93-05001 1 fiche

Two series of centrifuge tests were carried out to evaluate the use of centrifuge modelling as a method of accurate control testing of clay liner permeability. The first series used a large 3m radius geotechnical centrifuge and the second series used a small 0.5m radius machine built specifically for research on clay liners. Two permeability cells that could easily be moved from bench testing to the centrifuge were fabricated to provide direct data comparisons between the two methods of testing. A consolidated kaolin clay and a compacted illite clay were tested. Four additional tests were carried out to demonstrate the 0.5m radius centrifuge could be used for liner performance modelling to evaluate factors such as volumetric water content, compaction method and density, leachate compatibility, and other construction effects on liner leakage

Acidic extraction and ultrafiltration processing of commercial canola meal : final report

by S.M. McCurdy. Regina : Saskatchewan Agriculture Development Fund, 1992. 29 p. : ill. Bibliogr. *CSI 72228.203.*
MICROLOG 93-06776 1 fiche

The well established markets for various soybean products and food and specialized feed use demonstrate the type of value-added processing that could benefit the entire canola industry. Low pH extraction of canola meal followed by ultrafiltration of the extract was investigated as a means to recover a canola protein concentrate with a low content of antinutritional components. The solubilities of dry matter, protein, glucosinolates, phytate and sinapine were determined for a commercial and a low heat-processed canola meal at four acidic pHs.

Acoustic detection of partial discharge gas insulated switchgear

by A.J. Vandermaar. Montreal : Canadian Electrical Association, Engineering and Operation Division, Electrical Apparatus Section, Station Equipment Subsection, 1992. 14 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06039 1 fiche

Gas insulated switchgear (GIS) requires long outage times to effect repairs, and it is desirable to be able to detect dielectric integrity problems of GIS prior to failure through the use of diagnostic techniques. The use of acoustical techniques to detect partial discharge in GIS is reviewed. The sources of the partial discharge, their acoustic characteristics, and acoustic wave transmission damping are examined. The requirements for acoustic transducers suitable for the purpose of detecting the acoustic signals are reviewed. Conclusions are drawn as to the optimum procedures for acoustic monitoring of GIS

Acoustic signals of shorebirds : a survey and review of published information

by E.H. Miller. Victoria : Royal British Columbia Museum, 1992. iii, 62 p. : ill. Bibliogr. (Royal British Columbia Museum technical report) ISBN 0-7718-9313-2
MICROLOG 93-04726 1 fiche

This report provides a general guide to literature on shorebird acoustics and recommends research priorities. The report lists species for which sound analyses have been published or are available in reports or theses, providing references, and critically assessing the adequacy of existing analyses and coverage. The report begins with an account of the physical analysis of bird sounds, how the sounds can be described, analyzed, and prepared as illustrations for publication; and the technical adequacy of published sound analyses for shorebirds and ways to describe behaviour that accompanies sound signalling. A critical review of coverage in the taxonomic list follows. The taxonomic list is organized alphabetically by family, and by genus and species within each family.

An Active constraints Newton algorithm for the spatial price equilibrium problem -- Rev.

by O. Drissi-Kaitouni and M. Florian. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 24 p. Bibliogr. (Publication ; no. 537) (Publication ; no. 628)
MICROLOG 93-01752 1 fiche

This paper considers the general spatial price equilibrium problem. To solve such problems, a Newton type algorithm is developed that is combined with an active constraints strategy to handle the nonnegativity constraints or upper bounds on the variables. At each iteration of the algorithm, the choice of the initial active set is based on the value of the gradient and the dual variables. Two variants of the algorithm are presented, one in which the Newton equations are solved by the Gauss method and one in which these equations are solved by the conjugate gradient method. Computational results demonstrate the efficiency of the method

Activities related to the prevention of climatic change in some major urban areas of North America

Toronto : Canadian Urban Institute, 1991. 31 p. Bibliogr. (Working paper ; WP-3)
MICROLOG 93-00601 1 fiche

This paper provides a perspective on the need for action to prevent and prepare for global warming and summarizes the potential consequences of inaction on communities in North America. Notes are given on what is or is not happening in the local and regional governments of Chicago, Los Angeles, Montreal, New York, and Toronto and explanations are suggested for the apparent indifference of these local government agencies to global warming. A brief discussion on whether intensive urbanization is a positive or negative factor in the search for a habitable planet concludes the paper.

Actuarial costing of 'The road ahead' : a comparative study

William M. Mercer Limited. Toronto : Ontario Automobile Insurance Review, 1992. 3 v. *Contents: Vol. 1 : Executive summary -- vol. 2 : Actuarial report -- vol. 3 : Technical appendix.*
MICROLOG 93-02606 8 fiche

The actuarial study provides comparative loss cost estimates and corresponding indicated premiums for three alternative automobile insurance products for the policy year beginning on July 1, 1992. The three products under review are the automobile insurance product that was in use prior to the introduction of the Ontario Motorist Protection Plan in 1990; the product that is currently in use; and a new product described in a document recently released by the Minister of Financial Institutions, entitled The Road Ahead. This document provides extensive background and explanation of the methodology and estimates. It also provides actuarial details of the analysis.

An Acute bioassay study of the effluent discharge from the Kimberly Clark pulp mill to Jackfish Bay in July, 1990 after the commissioning of a secondary treatment system

by K Flood .et al. Toronto . Ministry of Environment and Energy, 1993. vii, 49 p. : ill., maps. Bibliogr
MICROLOG 93-07496 1 fiche

The Kimberly Clark mill effluent is discharged to Blackbird Creek and travels about 15 km along the creek before entering Lake Superior at Moberly Bay and in turn out into Jackfish Bay. A 1983 96-hour field bioassay found that the effluent was lethal to rainbow trout throughout Moberly Bay and along the western shoreline of Jackfish Bay. In 1989, the company spent $30m on a secondary treatment system to treat all of the process effluent from the plant before its discharge to Blackbird Creek. This study was undertaken to confirm that the acute lethality problem had been resolved by the new treatment system.

Acute lethality data for Ontario's inorganic chemical sector effluents covering the period from December 1989 to May 1990

by J.T. Lee...et al. Toronto : Environment Ontario, 1992. vii, 69 p. : ill. ISBN 0-7778-0165-5
MICROLOG 93-03237 2 fiche

The Municipal-Industrial Strategy for Abatement (MISA) program is a regulatory program with the ultimate goal of virtual elimination of persistent toxic contaminants from all discharges to Ontario waterways. Under the MISA program, the inorganic chemical sector was required to monitor its discharges (both process and cooling waters) for acute lethality to trout and to *Daphnia magna* by conducting laboratory toxicity tests. This report presents the results for the first six months of self-monitoring by the plants along with the results of audit samples that were tested at the Ministry's laboratory in Rexdale. Toxicity tests of some intake waters, although not required by regulation, were also submitted by industry and have been included in the report.

Adapting to a changing work force : the relocation policies and practices of Canada's top companies

by J.L. MacBride-King. Ottawa : Labour Canada, Women's Bureau, 1992. vi, 61 p. Bibliogr. *French ed. (S'adapter à une main-d'oeuvre...) : 93-02261/1. CSI 22175.200* ISBN 0-662-19954-5
MICROLOG 93-03066 1 fiche

This report looks at the ways leading Canadian companies are adapting their relocation policies and practices to meet the changing needs of employees and their families. It focuses on relocation in the context of workplace innovations aimed at balancing work and family responsibilities. It examines direct support for relocated employees, such as financial assistance with moving expenses or house-hunting trips. In view of the particular implications for women who are spouses of the employee, it also looks at initiatives that address their needs, such as career counselling or job search assistance.

Adapting to the Impacts of Climate Change and Variability : proceedings of the Great Lakes-St. Lawrence Basin project workshop

edited by L. Mortsch, G. Koshida and D. Tavares. Ottawa : Environment Canada, Atmospheric Environment Service, 1993. viii, 78 p. Bibliogr.
MICROLOG 93-07153 1 fiche

The Great Lakes-St. Lawrence Basin project is a multi-year undertaking that is part of the Canadian Federal Green Plan initiative. The goal of the project is to conduct interdisciplinary, integrated studies on the physical, biological, social, and economic impacts of climate change and variability for the area. Regional adaptation strategies to deal with a changing climate will also be explored. This report summarizes the discussions held by the working groups on water management, ecosystem health, land use and management, and human health. It also provides abstracts for papers presented on the project; on information in the decision-making and policy-making process for forestry, water resources, agriculture, and climate change; the state of understanding of climate-sensitive issues; and integration of the regional and economic impacts of climate change.

The Adaptive dimension in core curriculum

Regina : Saskatchewan Education, 1992. ii, 31 p. : ill. Bibliogr.
MICROLOG 93-00642 1 fiche

The adaptive dimension refers to the concept of making adjustments in approved educational programs to accommodate diversity in student learning needs. It includes those practices the teacher undertakes to make curriculum, instruction, and the learning environment meaningful and appropriate for each student. This document provides a comprehensive rationale for adaption. This includes the philosophical, psychological, and pedagogical bases for the position that adaptation of curriculum content, instructional practices, and the learning environment is an appropriate response to managing the challenges associated with maximizing student learning.

L'étude de la Loi sur les municipalités et des lois connexes consiste en une analyse approfondie de la législation municipale et en une étude globale des questions relatives à la prestation des services. Cette étude porte sur les questions touchant les autorités locales et les services fournis, le but étant que la Loi soit plus adaptée aux besoins sociaux et économiques changeants des collectivités. Elle a pour objet d'établir un cadre de travail qui permette aux municipalités et aux autorités locales de régler les problèmes qui se posent à elles avec créativité et d'une manière novatrice.

Adsorption of pentachlorophenol by activated carbon : effects of temperature and pH

by N. Boeker and W.P. Mortimer. Toronto : Ontario Hydro, Research Division, 1992. 29 p. : ill. Bibliogr. (Report ; no. 92-159-K)
MICROLOG 93-04356 1 fiche

Pentachlorophenol (PCP) has been the main wood pole preservative used by Ontario Hydro for the past 40 years and it is still used to treat a significant number of new poles purchased each year. While current restrictions on the disposition of used poles are not difficult to meet, this may change in the future. In anticipation of tighter controls on the disposal of PCP-treated wood, a project was undertaken to investigate the feasibility of chipping the wood, leaching out the PCP and adsorbing the PCP onto activated carbon and subsequently biodegrading the PCP and regenerating the carbon. This report details the carbon adsorption studies completed to date.

Adult education : a position paper

Ontario Public School Boards' Association. Toronto : The Association, 1991. 23 p. *ONTERIS ON05927.*
MICROLOG 93-01243 1 fiche

The Ontario Public School Boards' Association (OPSBA) outlines the fundamental principles it believes should guide policy development with respect to adult education and its funding, and discusses the unique characteristics of adult education as they relate to program delivery, assessment and evaluation, teacher training, 'wrap-around' services, and linkages. OPSBA presents 24 recommendations to address key issues. It suggests that adult education has to be recognized as a legitimate part of the mandate of school boards, that a comprehensive provincial funding model, which includes adult education, must be developed; and that coordination and cooperation in the provision of continuing education programs at the local, provincial, and federal levels must take place

Advance directives and substitute decision-making in personal healthcare

joint report of the Alberta Law Reform Institute and the Health Law Institute. Edmonton : Alberta Law Reform Institute, 1993. ii, 60 p. Bibliogr. (Report ; no. 64) ISSN 0317-1604
ISBN 0-8886-4180-X
MICROLOG 93-06421 1 fiche

The Report for Discussion on Advance Directives and Substitute Decision-Making in Personal Health Care focused on two questions: First, who should make health care decisions on behalf of patients who lack the mental capacity to do so themselves? Second, what, if any, legal mechanisms should exist to enable individuals to exercise autonomy and self-determination in respect of health care decisions made after they become mentally incompetent? This document summarizes the conclusions and major recommendations contained in the Report. It outlines various developments which have occurred since the publication of the Report and discusses the submissions which were received in response to the Report. Finally, it presents recommendations and the draft legislation.

Advanced aquaculture techniques : acoustical conditioning of fish

by P.H. Patrick, E.A. McLeod and J.J. Kowalewski. Toronto : Ontario Hydro, Research Division, 1992. iv, 27 p. : ill. Bibliogr. (Report ; no. 92-64-K)
MICROLOG 93-03290 1 fiche

A multiyear aquaculture program was developed emphasizing behavioral and reproductive physiological aspects of walleye and sturgeon. The behavioral component involves studies on the use of sound to condition animals and their feeding energetics, and efforts to fine tune the optimal feeding requirements of fish held in cage cultures. This study focused on the feasibility of using sound to condition walleye to optimize the feeding and harvesting requirements in large pen and/or release situations. Walleye were grown successfully in the laboratory over the testing period, which began 5 July and ended 4 October. Growth rates were compared with tonal frequencies of 200, 300 and 600 Hz.

Advanced materials research opportunities associated with the electrical transmission and distribution systems in Ontario

by M.C. Ryan. Toronto : Ontario Hydro, Research Division, 1992. iii, 61 p. (Report ; no. 91-122-K)
MICROLOG 93-02935 1 fiche

This report identifies opportunities to conduct advanced materials research into problems associated with the electrical transmission and distribution sysstems in Ontario. Potential research topics were obtained by surveying a number of utility personnel who are experienced in addressing field-related problems, and by forecasting changes that are expected to take place in the electrical system which may influence future research needs. An evaluation of the potential topics indicates that a number of significant problems exist which could benefit from advanced materials research. The majority of research opportunities which are identified relate to problems associated with the electrical distribution system. Although some of these problems are currently being investigated from an electrical, mechanical or 'conventional' materials perspective, an interdisciplinary approach including advanced materials could address the problems more effectively.

Aerial applications of *Bacillus thuringiensis* formulations against eastern blackheaded budworm in Newfoundland in 1990

by R.J. West and J. Carter St. John's : Forestry Canada, Newfoundland and Labrador Region, 1992. v, 10 p. : ill Bibliogr. (Information report , N-X-282) ISSN 0704-7657 ISBN 0-662-19613-9
MICROLOG 93-00212 1 fiche

Outbreaks of eastern blackheaded budworm periodically occur in balsam fir forests in eastern Canada. The present outbreak of the blackheaded budworm in Newfoundland began in 1987 between Plum Point and Roddickton on the Northern Peninsula. Since then the outbreak, alone and in association with the eastern hemlock looper, has caused extensive defoliation of mature balsam fir, particularly in the upper crown. No insecticide is registered for control use against the eastern blackheaded budworm. This study reports on the use of oil- and water-based formulations of *Bacillus thuringiensis*, Kipel 176 and Futura XLV. The two insecticides were applied twice at a dosage of 30 BIU/ha in 2.1 and 1.8 L/ha respectively to reduce larval numbers and protect fir foliage.

Aerodynamic acceptance testing of aircraft ground de/anti-icing fluids flat plate tests

by J.-L. Laforte, G. Bouchard and P.R. Louchez. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1991. xvi, 65 p. : ill. Bibliogr.
MICROLOG 93-03113 1 fiche

Research on de/anti-icing fluid generally deals with protection properties against ice formation and aerodynamic effect at aircraft take-off. This project implemented a new BOEING standard test of aerodynamic acceptance for the use of de/anti-icing fluids that is designed to assess the lift loss due to residual de/anti-icing fluid on the wing at take-off. The test, performed in a rectangular duct, evaluates the boundary layer displacement thickness (BLDT) over a fluid layer applied to a 1.5 m long flat horizontal plate during a wind acceleration simulating ground acceleration of the aircraft. The report describes implementation of the experimental setup in the cold recirculated wind tunnel, and the related instrumentation. A reference anti-icing fluid is used to present and validate boundary layer displacement thickness calculation procedure. Five leading commercial fluids are evaluated to demonstrate the overall procedure for aerodynamic acceptance.

AES monthly forecast techniques and verification

by A. Shabbar. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1991. 52 p. : ill., maps. Bibliogr. (Report ; no. 91-3)
MICROLOG 93-00372 1 fiche

Monthly temperature anomaly forecasts for Canada were made in real-time since January 1986, making use of empirical orthogonal functions of the 50 kPa height field to filter out small-scale or spatially inconsistent circulation features. Forecast height anomalies at selected points are fitted to the five dominant empirical orthogonal functions in a least-square-error sense. The resulting reconstructed 50 kPa height anomalies are then used to specify Canadian surface temperatures using multiple linear regression.

Afrique du Sud : la lutte pour la réforme -- Rév.

par M. Rossignol. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992 30 p. Bibliogr. (Bulletin d'actualité ; 87-12F) *Révisé le 23 mars 1992. L'éd. anglaise (South Africa : the...) sur la même fiche*
ISBN 0-660-93885-5
MICROLOG 93-01841 1 fiche

La situation en Afrique du Sud a beaucoup évolué depuis que F.W. de Klerk est devenu président du pays en 1989. Nelson Mandela a été libéré de prison et les lois discriminatoires ont été abrogées. Cependant, la violence est toujours présente et les négociations constitutionnelles s'annoncent difficiles. En fait, l'Afrique du Sud ne fait qu'entrer dans ce qui sera fort probablement la période la plus difficile de son histoire. Dans ce bulletin, on donne un aperçu de l'enjeu de la réforme constitutionnelle en analysant les affrontements au sein de la société sud-africaine et en examinant le rôle de la communauté internationale.

Afterrise : deep body temperature following exercise (U)

by S. Tuck and A.A. Keefe. Ottawa : Defence Research Establishment Ottawa, 1992. v, 14 p. : ill. Bibliogr. (Technical note ; no. 92-8)
MICROLOG 93-02837 1 fiche

This study was undertaken to document the continued increase in rectal temperature after exercising in the heat and the effects of posture, clothing and temperature in the recovery room during recovery. Five men exercised at a moderate intensity at 35C and 50 percent relative humidity until their rectal temperatures reached 38.5C. All subjects recovered at a room temperature of 35C or 22C while in a sitting or lying posture. These conditions were evaluated while the subject recovered wearing either a Canadian Forces chemical warfare overgarment or light clothing (combat pants or shorts and a short-sleeved shirt). Rectal and skin temperature were measured each minute during exercise and recovery

Age and growth estimation of walleye *Stizostedion vitreum* using opercula

by J.A. Babaluk, J.F. Craig and J.S. Campbell. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1993. v, 31 p. : ill Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2183) *This is the 29th manuscript report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6473
MICROLOG 93-08655 1 fiche

The walleye, *Stizostedion vitreum*, is the most economically valuable commercially fished species in Canada's inland waters and is also an extremely valuable sport fish. In order to sustain these valuable fisheries, careful management strategies are required. For proper assessment and management of these fisheries, determination of growth rates is essential. To calculate growth rates, understand life history parameters and have valid age composition information, accurate ages must be determined for the fish. The objectives of this study were to provide estimates of growth, age at maturity and age composition of walleye populations from information derived from opercula.

The Age structure of construction tradesmen : trends in the 1980s

Canadian Labour Market and Productivity Centre. Construction Sector Committee. Ottawa : The Committee, 1989. 59, 54 p. : ill. *Bilingual (Structure par âge des métiers de la .). CSI 97971.205.*
MICROLOG 93-06940 2 fiche

The purpose of this paper is to examine the evidence supporting the view that Canada's construction labour force is aging. Following a review of some of the factors affecting the age structure of the construction sector, this paper will examine the evidence regarding the view that Canada's construction labour force is growing older. The paper looks at the average age of workers in a particular construction trade and how that average age changes over time, and also analyses the change in the age distribution of a particular construction trade's labour force over time All data are examined on both a national and provincial basis.

Aggregates : a case study of resource management in Ontario : a challenge in communication

by G.A. Jewett. Toronto : Ministry of Natural Resources, Ontario Geological Survey, 1977. iii, 9 p. : ill., maps. Bibliogr. (Ontario Geological Survey miscellaneous paper , 74) *Fold maps not filmed.* ISSN 0704-2752
MICROLOG 93-01779 1 fiche

Aggregates are an essential commodity for any industrial society and are usually relatively so cheap and abundant that they tend to be considered inexhaustible. Deposits of sand and gravel in Ontario available for future extraction may not be sufficient to meet the province's needs beyond 2025 without general understanding by the public of the continuing need for this material. This report details the problem, the facts of aggregate production, the solution, the future, and the need for a provincial policy proposal relating to mineral aggregate development.

Agricultural statistics for Ontario, 1991

Ontario. Ministry of Agriculture and Food. Statistical Services Unit. Toronto . The Unit, 1992. xi, 156 p. : ill. *French ed. (Statistiques agricoles pour l'Ontario, 1991) : 93-01617/2. CSI 56265.002*
MICROLOG 93-00587 2 fiche

Annual compilation of data covering financial details and population; food industry; selected census data; international trade; field crops; fruit, vegetables, and specialty crops; livestock and poultry; dairy; and the 1991 Census of agriculture profiles. Data is derived from telephone, mail-in and enumerative surveys of farmers for agricultural production; the 5-year census of agriculture, particularly those areas dealing with livestock inventory and crop area estimates; and administrative data, consisting of complete or nearly complete counts of imports, exports, and marketings of inspected or controlled commodities. Most data compares the current and previous years, but some historical information is given. Data is given for the province and Canada, and international trade data includes the United States, Mexico, the European Economic Community, and Japan.

Agriculture dans les prairies, 1870-1940

par D. Spector. Ottawa : Parcs Canada, Direction des lieux et des parcs historiques nationaux, 1983. 293 p. : ill. Bibliogr. (Histoire et archéologie ; 65) *L'éd. anglaise (Agriculture on the Prairies, 1870-1940) : 83-2389/3.* ISSN 0227-3551 ISBN 0-660-91004-7
MICROLOG 93-03727 4 fiche

Entre 1880 et 1920, l'élevage joua un rôle d'appoint par rapport à la culture céréalière qui dominait dans les prairies canadiennes. Les améliorations apportées aux techniques perfectionnées de construction des abris firent de l'élevage une entreprise viable dans l'Ouest. Ce document porte précisément sur l'agriculture dans les prairies et se penche surtout sur: les efforts de promotion de l'élevage; l'état de l'art vétérinaire et les progrès de la zootechnie, 1880-1925; les facteurs non techniques de ralentissement de l'élevage dans les Prairies; l'élevage des chevaux dans les Prairies; et, l'élevage dans la vallée Qu'Appelle.

L'Agriculture durable : perspectives et enjeux économiques : rapport de synthèse d'un atelier

par R. Thomas. Ottawa : Conseil des sciences du Canada, 1992. 20, 18 p. *Bilingue (Sustainable agriculture : economic...).* ISBN 0-662-97397-6
MICROLOG 93-07945 1 fiche

Pour compléter les actes officiels de l'atelier le Conseil a produit la présente version condensée dans le dessein de donner une idée d'ensemble du débat économique actuel sur l'agriculture durable. Ce document souligne les difficultés qu'il faut surmonter pour intégrer à la pensée économique traditionnelle les questions de viabilité, de droits sur l'environnement et de solidarité entre les générations, et évoque la nécessité d'élaborer de nouvelles politiques et de transformer les institutions. L'atelier est partie d'une vaste étude pour savoir comment tirer le meilleur parti possible de la science et la technologie afin de nous doter d'un système agricole qui soit durable du point de vue de l'économie et de l'environnement. Plus d'une centaine d'économistes, d'agriculteurs et de représentants des pouvoirs publics ont participé. Une quarantaine de communications traite des sujets variés allant de l'incidence de l'agriculture sur le milieu naturel aux orientations politiques.

Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06233 1 fiche

British Columbia Hydro is preparing a 25 year utilization plan for Burrard Thermal Generating Station, which is a 900 megawatt natural gas-fired, steam boiler facility on the eastern Burrard Inlet near Vancouver. Historical emissions from the plant and ambient air quality in the region are reviewed to place plant operations in context of the technological modifications which have been made in the previous ten years. Environmental effects criteria and regulatory developments which may constrain planning for the plant are reviewed and evaluated. The findings of the Burrard plant air quality reviw are summarized, including indentification of the difficulties which arise in evaluating the impact of an isolated source of nitrogen oxides in an urban area and in determining emission reduction options.

Airborne remote sensing for verification of the Biological and Toxin Weapons Convention

Ottawa . External Affairs and International Trade Canada, 1993. iv, 43 p. : ill.
MICROLOG 93-08538 1 fiche

This paper is intended to contribute to the evaluation of airborne remote sensing as one of a number of potential measures for the verification of compliance with the Biological and Toxin Weapons Convention (BTWC). It will attempt, where possible, to address specific observations to the three areas of activity of interest (development, acquisition or production, and stockpiling or retaining), recognizing that clear descriptions and delineations of these areas of activities do not exist. Finally, in relation to the criteria, it must be recognized that there are overlaps. As a result, this paper's commentary is addressed to what is, in effect, a composite of these three criteria.

Aircraft boarding of wheel chair passengers, phase 3 : prototype development and evaluation

prepared for Transportation Development Centre, Policy and Coordination, Transport Canada ; by M. McCarthy. Ottawa : W.R. Davis Engineering Limited, 1991. ix, 58 p. : ill. Bibliogr. *Fold ill. not filmed.*
MICROLOG 93-06332 1 fiche

This is the third phase of a project on the boarding of disabled passengers onto large aircraft without a system to allow level entry into the aircraft, such as a loading bridge or a passenger transfer vehicle. This report describes the design, fabrication, and evaluation of the enclosed pallet device known as the passenger transfer module (PTM). The PTM was evaluated at Fredricton, Charlottetown, and Moncton airports. Personnel and equipment prevented its planned evaluation at Prince George, British Columbia and Thunder Bay, Ontario.

Aircraft ground de/anti-icing fluid holdover time field test program for the 1990-91 winter

prepared for Transportation Development Centre, Policy and Coordination, Transport Canada ; by Aviation Planning Services Ltd. Montreal : The Corporation, 1991. xxiv, 257 p. : ill.
MICROLOG 93-01469 3 fiche

Results of a study to manage, conduct and analyze holdover time tests used to assess the time effectiveness of commercially produced de/anti-icing fluids. The tests were carried out in order to accept or reject holdover time tables produced by AEA/ISO and presently being used by European aircraft operators. Through the participation of air carriers, fluid manufacturers, universities and government organizations, testing was carried out at six Canadian sites and seven other sites around the world. Standard test procedures were developed which consisted of pouring anti-icing fluids onto clean plates, exposing the plates to precipitation and recording the elapsed time to one of three possible end conditions. Seven commercially available fluids were tested. Failure time was affected by variables including precipitation, type of fluid, temperature, humidity, wind and type of precipitation.

Study to manage, conduct, and analyze holdover time tests used to assess the time effectiveness of Type 1.5 anti-icing fluids. Testing was carried out at Dorval, Quebec and St. John's, Newfoundland. Test procedures consisted of pouring de-icing fluids onto clean aluminum plates, exposing the plates to either natural or artificial precipitation, and recording the elapsed time to the end condition. Four anti-icing fluids were tested and it was hypothesized that failure time was affected by such variables as precipitation, temperature, humidity, wind, and fluid thickness. Testing also investigated the potential use of an ice detector in making the failure determinations.

Aircraft take-off performance and risks for wet and contaminated runways in Canada

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by D.C. Biggs...et al
Ottawa : Sypher:Mueller, 1991. xl, 480 p. : ill. Bibliogr.
MICROLOG 93-01468 6 fiche

This report documents the results of a study into the risks associated with degraded performance during rejected and continued take-off from wet and contaminated runways. A comprehensive review of world-wide accident and incident data was undertaken to identify the severity of the problem and the factors involved. Runway condition characteristics, the correlation of runway friction test devices with the friction experienced by aeroplanes, and take-off performance estimation on wet and contaminated runways were reviewed. Performance estimates were examined on the basis of the ratio of contaminated vs dry friction. A method is outlined for classifying runway conditions based upon ICAO SARPS, FAA/NASA trials, and the practices of leading countries and airlines. The frequency of wet and contaminated runways in Canada, the likelihood of critical events on the take-off run, and the take-off weight distribution were determined. These frequency and probability distributions and runway, weather and aircraft performance data were used in a probabilistic analysis of the risk of take-off accidents. A number of counter measures were examined, including the JAR acceptable means of compliance for wet and contaminated runways.

Airlock door inflatable seals qualification performance test program, phase II

by R.J. Lewak. Toronto : Ontario Hydro, Research Division, 1992. iii, 107 p. : ill. (Report ; no. 92-78-K)
MICROLOG 93-02983 2 fiche

This report describes the Phase II qualification performance testing program and its results performed on 12 Dacron fabric reinforced silicone rubber airlock door inflatable seals manufactured by the Sealmaster Corp. and the Presray Corp. Following the Phase I testing program on four seals from each manufacturer, it was decided that Phase II testing would concentrate gamma irradiation and operational testing, both of which had caused the failures of the seals in Phase I. A large door/frame gap and a small gap from Phase I were modified so that operational testing could be conducted in a gamma radiation field. Testing protocols based on conditions in the Bruce A and B and Darlington Nuclear Generating Station (NGS) and on conditions in the Pickering NGS were devised. Both contained initial inspection and air pressure retainment tests followed by operational tests under gamma irradiation, accelerated thermal aging, and a second operational test. The radiation dose along with the number of cycles and door/frame gaps differed for each protocol. Air pressure retainment tests along with cross seal leakage tests occurred at specified cycle levels in each protocol

Airtightness of concrete basement slabs

G.K. Yuill and Associates. Ottawa : Canada Mortgage and Housing Corporation, 1991. xi, 45 p. : ill. (SRC publication ; no. I-4800-23-C-91) *Appendix A: Concrete foundation air leakage study (SRC publication ; no. I-4800-23-C-91).*
MICROLOG 93-03150 1 fiche

Project to develop and evaluate means of making basement floors airtight to keep out radon bearing soil air. The project used laboratory tests of the airtightness of several floor assemblies and a field test of the airtightness of a floor in a real house. In the laboratory tests, several arrangements of polyethylene films were tested as seals of the floor-wall joint and as crack seals. Also tested were concrete slabs without polyethylene films and a concrete slab with a crack created and sealed with a waterstop strip. In the field tests, a lapped and caulked polyethylene air barrier was installed in the basement of a house using techniques that could be applied by a house builder. A concrete floor was poured on top of it. This report provides the results of the laboratory and field tests.

Akwesasne to Wunnumin Lake : profiles of aboriginal communities in Ontario

Toronto : Ontario Native Affairs Secretariat ; Ministry of Citizenship, 1992. ii, 272 p. : maps. Bibliogr. *French ed. (Akwesasne à Wunnumin Lake : profils...) : 93-00220/3.*
ISBN 0-7729-8782-3
MICROLOG 93-00219 3 fiche

People are generally unfamiliar with the size, number, and diversity of the Aboriginal communities in Ontario. Until now, there has not been a comprehensive reference source to provide that type of information. This publication brings together basic demographic information about Aboriginal people and their communities. Its focus is communities where more than half of the population is made up of Aboriginal people, including populated Indian reserves. To complement the population data and the community profiles, it lists the names and addresses of key Aboriginal organizations in Ontario

Alberta barley production survey

Edmonton : Alberta Agriculture and Rural Development, Field Crop Development Centre, 1992. 24 p.
MICROLOG 93-08489 1 fiche

During fall 1991 and early winter 1992, an extensive survey was conducted covering eight agro-ecological areas of Alberta plus an irrigation area superimposed over southern Alberta. District Agriculturists selected 412 barley growers to complete a 28-page questionnaire dealing with all aspects of barley production practices. The producers were asked to select one of their barley fields and answer questions based on the treatment that field received for the production of the 1991 crop. The data was sorted and the effects of abnormal moisture, hail, and disease were eliminated as much as possible. A top group of farmers, based on yield, was identified for each area. This report compares the management factors that contributed to the high yields shown by each of the farmers.

Alberta canola production survey -- Rev.

Edmonton : Alberta Agriculture, Food and Rural Development, Field Crop Development Centre, 1993. 49 p.
MICROLOG 93-07817 1 fiche

During the fall of 1991 and early winter of 1992, an extensive survey was conducted in the province of Alberta. 322 canola growers were selected and sent a 28 page questionnaire dealing with all aspects of their canola production practices. The producers were asked to select one of their canola fields and answer questions based on the treatment that field received for the production of the 1991 crop. This document is the result of that survey. It presents information on the market the canola was grown for, previous cropping history of the field, soil type, average yield, soil texture, soil problems, tillage practices, summerfallow year tillage operations, equipment used for summerfallow year tillage, herbicide used on summerfallow, and other information.

Alberta miscellaneous lake level data, 1991

prepared by Water Survey Section, Survey Branch, Technical Services Division ; submitted by Paul Valentine. Edmonton : Alberta Environment, Technical Services Division, Survey Branch, Water Survey Section, 1992. xv, 262 p. *CSI 35282.003.*
MICROLOG 93-08056 3 fiche

Annual summary of lake level data collected from 251 lakes in 1991. Most of the lakes were monitored to obtain an indication of maximum and minimum levels during the winter, late spring, mid-summer and fall, although in some cases, more frequent observations are taken for a specific project. Lakes are arranged in alphabetical order, with a brief station description followed by the data for the year. For the first time, all data presented in this report has been compiled using software developed 'in-house'. The development of this program has provided a means of analyzing the lake level data that wasn't available in the past. A historical list of maxima and minima for the period of record is found in the appendix.

Alberta pocket gopher survey

by M.T. Nietfeld and L.D. Roy. Vegreville, Alta. : Alberta Environmental Centre, 1993. x, 19 p. : maps. Bibliogr. ISBN 0-7732-0911-5
MICROLOG 93-08893 1 fiche

Pocket gophers are important fossorial rodent pests of haylands and pastures in Alberta. They feed on a variety of plants, but prefer legumes and other broad-leaved forbs. A telephone survey of Agricultural Services Board Fieldmen (ASBF) was conducted in 1990 to assess the extent and severity of pocket gopher problems in Alberta. Additional agricultural data was used to estimate the area inhabitated by gophers and the economic loss to Alberta farmers from pocket gopher damage.

MICROLOG 93-05653 5 fiche

This report focuses on consumption of alcohol and other drugs by Canadians aged 15 and over, related behaviour, and consequences. The survey was carried out by statistics Canada on behalf of Health and Welfare Canada in March 1989. In total, 11,634 Canadians 15 years of age and over participated in the survey. Respondents were asked a broad array of questions about their use of alcohol and other drugs, the extent of use, patterns of use, and the circumstances and settings associated with use. Questions addressed health, social and economic problems arising from the misuse of alcohol and illicit, prescription, and over- the-counter drugs, and they were asked what could be done to prevent such problems.

Algal biopolishing of zinc : final report

by M. Kalin and W.N. Wheeler. Toronto Boojum Research Limited 1992 vii, 58 p . ill. Bibliogr *CANMET contract 23440-1-9009 01-SQ*
MICROLOG 93-01556 1 fiche

Periphytic algae grow in mining effluent ponds and streams characterized by extremes in pH, elevated metal concentrations and high suspended solids and containing metals in much higher concentrations than waste water. They could therefore be used as renewable polishing agents. This project identified the processes which related periphytic algae to zinc removal from waste water using an abandoned polymetallic mine in central Newfoundland that had a number of circum-neutral waste waters containing 20-43 mg/L zinc. Six serial polishing

ponds were built in summer 1989 receiving a flow ranging between 2.1 L/min-11.4 L/min. Alder branches in each pond provided about 100 sq m of surface area for the growth of algae. The residence time of water in the ponds was from 16-80 days.

Les Allocations d'aide aux familles : statistiques, 1991

Québec : Régie des rentes du Québec, Direction de la statistique et du développement des programmes, 1993. 74 p. : ill.
CSI 67299.002. ISSN 1192-2559 ISBN 2-550-27218-8
MICROLOG 93-04470 1 fiche

Ce régime de rentes a été créé dans le but d'assurer aux travailleuses et aux travailleurs rémunérés du Québec et aux personnes à leur charge, une protection de base contre la perte de revenus pouvant résulter de la retraite, du décès ou de l'invalidité. Le programme québécois d'allocations d'aide aux familles comprend quatre volets distincts: l'allocation familiale, l'allocation pour jeune enfant, les allocations à la naissance et l'allocation pour enfant handicapé. Les tableaux ventilés en fonction de variable socio-économiques aident à situer les clientèles de la Régie en fonction de l'environnement social québécois. Finalement, les renseignements fournit dans ce document permettent de cerner les lignes de force que constituent certains champs de la sécurité du revenu.

Allometric body/scale relationship in Atlantic salmon *Salmo salar* in the marine phase

Gilles Tremblay, Louis A. Giguère, and Dept of Fisheries and Oceans, Maurice-Lamontagne Institute. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1993. 17 p. (Canadian translation of fisheries and aquatic sciences ; no. 5586) *Originally published in French, by Maurice-Lamontagne Institute, at Mont-Joli, Que.* ISSN 0704-3716
MICROLOG 93-02847 1 fiche

Although backcalculation methods using scale measurements have been applied to various fish species including the Atlantic salmon, there have been few detailed studies on the relationship between body length and scale radius (body/scale relationship) in this salmonid. This paper describes the body/scale relationship during the marine period, established from a sampling of the entire range of sizes backcalculated. The study is based on the body/scale relationship of the stock of Atlantic salmon in the St.-Jean River near Gaspe, Quebec.

An Allozyme survey of white hake *Urophycis tenuis* from the southern Gulf of St. Lawrence

by D. Clay...et al. Moncton, N.B. : Dept of Fisheries and Oceans, Gulf Fisheries Centre, 1992. v, 12 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1908) ISSN 0706-6457
MICROLOG 93-04481 1 fiche

Genetic variation in either protein or DNA as determined by molecular studies can be used to identify stock structure. One of the most common procedures is protein (enzyme) electrophoresis. Two geographically separate concentrations of white hake were identified in the southern Gulf of St. Lawrence from analysis of annual and seasonal resource survey data. One is offshore along the slope of the Laurentian Channel and the other inshore ranging from St. Georges Bay, Nova Scotia to Miscou Island, New Brunswick. This allozyme survey was conducted using both starch and cellulose acetate gel electrophoresis to determine if an adequate amount of genetic variation exists to assess the degree of their reproductive separation.

L'Alphabétisation chez les immigrants et les membres des communautés culturelles

avis présenté à la Ministre des communautés culturelles et de l'immigration. Montréal : Conseil des communautés culturelles et de l'immigration, 1992. 63 p. Bibliogr.
CSI 67245.202. ISBN 2-550-26173-9
MICROLOG 93-04980 1 fiche

Dans la première partie de cet Avis, on présente d'abord les diverses catégories analytiques utilisées généralement pour décrire l'analphabétisme et l'alphabétisation. On décrit ensuite, dans ses diverses dimensions générales, la situation de l'analphabète allophone au Québec. Enfin, on présente un profil sommaire de trois clientèles plus spécifiques à l'intérieur de cette population visée. La deuxième partie est consacrée à décrire l'expérience québécoise d'alphabétisation auprès des clientèles allophones, en précisant les diverses approches utilisées, les difficultés qui subsistent et les voies qui semblent les plus prometteuses. Les conclusions sont résumées sommairement. Les recommandations, groupées par thème, complètent l'Avis en proposant des façons appropriées pour habiliter les allophones analphabètes ou faiblement scolarisés à participer plus pleinement et de façon plus autonome à la vie de la société québécoise.

Alternate finfish species aquaculture development planning report

prepared by the Subcommittee on Alternative Finfish Aquaculture Development ; under the direction of M. Hill. Halifax : The Dept., 1992. 23 p. (Manuscript and technical report series , project report no. 92-06)
MICROLOG 93-06714 1 fiche

In this report, the potential of ten alternative finfish species as aquaculture candidates in Nova Scotia is reviewed. Species included Atlantic cod, Arctic char, Atlantic halibut, turbot, eel, pollock, wolffish/catfish, seabream, seabass/striped bass, and haddock. Factors considered include: climate for development, site criteria, seedstock, technology and research, processing and marketing, financial aspects, training requirements, and habitat.

Alternative communications : issues and strategies for people with alternate communication needs

Edmonton : Premier's Council on the Status of Persons with Disabilities, 1992. 71 p. : ill.
ISBN 0-7732-1068-7
MICROLOG 93-00702 1 fiche

Government communicates with Albertans in numerous ways about policies, programs and events. However, the Alberta government has no policy about access to services and information by people with alternate communication needs. This paper raises awareness of the issues associated with communication disabilities and describes strategies that will move closer to a vision of full participation. It provides figures on the prevalence of the visual and hearing impairment in Alberta. It also shows figures on the potential market for materials in alternate formats in Canada and includes people who have disabilities other than hearing or vision.

Ambient air sampling for PCDD/PCDF near two pulp mills in northern Ontario

by P. Steer. Toronto : Ministry of the Environment, 1992. 42 p. : ill., maps Bibliogr.
ISBN 0-7778-0425-5
MICROLOG 93-03768 1 fiche

It is generally accepted that pulp mills are a source of polychlorinated dibenzo-p-dioxins (PCDD) and dibenzofurans (PCDF). Historically, the discharge of these toxic chemicals has created water quality problems rather than air quality degradation. However, the burning of sludge of bleached mill origin is not uncommon and this practice may lead to somewhat higher PCDD/PCDF concentrations in the local airshed. This report gives the results of a one-year monitoring program undertaken to determine whether there are detectable levels of PCDD/PCDF in ambient air in the vicinity of pulp mills. One site near James River-Marathon Inc. in Marathon and another near Malette Kraft Pulp in Smooth Rock Falls were selected for monitoring. Each site is about one half km from the nearby mill. Air samples were collected once every 28 days for 48 hours.

L'Aménagement de la langue : pour une description du français québécois : rapport et avis

au Ministre responsable de l'application de la Charte de la langue française. Québec : Conseil de la langue française, 1990. 65 p. Bibliogr. ISBN 2-550-20814-5
MICROLOG 93-07123 1 fiche

Le Conseil de la langue française a entrepris une réflexion profonde et globale sur les notions de qualité de la langue et de normes. Ce travail de réflexion, amorcé lors du colloque 'La qualité de la langue... après la loi 101' tenu en 1979, a déjà donné lieu à la publication de deux ouvrages, La norme linguistique (1983) et La crise des langues (1985). En 1989, le Conseil a décidé d'axer sa réflexion sur la notion de qualité de la langue appliquée à la langue générale, parlée et écrite, des Québécois et, pour ce faire, il a créé un comité. Ce rapport rappelle brièvement les principales étapes de l'histoire récente de ce dossier.

Based on material obtained by field expeditions of the National Museums of Canada since 1955, and from other sources, this study provides new information on the distribution and ecology of semiterrestrial and terrestrial amphipods of the North American Pacific and adjacent coastal marine regions. It revises the component species within formal new generic and informal systematics-ecological groups, based mainly on newly recognized taxonomic characters and employing numerical taxonomic methodology. The study also outlines primary facts that contribute to the anomalous regional combination of primitive and advanced morphological types within beach fleas and sandhoppers, and the total absence of native terrestrial species in the North American Pacific coast

Analyse commerciale du pétoncle au Québec, 1991

par P. Vincent. Québec . Ministère des pêches et des océans, Région du Québec, Direction de l'économique, de la statistique et de l'informatique, 1992. iii, 21 p. : ill. Bibliogr. (Rapport d'analyse économique et commerciale ; no 121) (Rapport d'étude ; 91-12F) *CSI 21105.072.* ISSN 0847-1185 ISBN 0-662-97560-X
MICROLOG 93-06157 1 fiche

Ce rapport vise à informer les divers intervenants de l'industrie des pêches au Québec de la situation commerciale de l'industrie du pétoncle en 1991. L'analyse commerciale fait le bilan de ce qui s'est passé globalement en 1991 pour ensuite s'orienter principalement sur le marché américain avec un bref aperçu du marché français. L'offre et la demande pour la production domestique y sont également abordées.

Analyse comparative des dépenses par élève : description des postes (annexes A1 et B1)

Toronto : Ministère de l'éducation, 1991. 36, 36 p. *Bilingue (Per pupil survey : description...). CSI 55108.016. ONTERIS: ON05989*
MICROLOG 93-00614 1 fiche

Cette analyse comparative des dépenses scolaires par élève ventile l'information par conseil par grandeur croissante. Chaque rapport pour les conseils scolaires est divisé selon le niveau d'école, et en comtés, régions, et villes désignées. L'analyse se base sur les états financiers de 1990 et les prévisions budgétaires pour 1991. Les tableaux porte sur l'effectif moyen, l'administration, les services informatiques, l'entretien, la transportation des élèves, les dépenses en immobilisations, la dette, dépenses courantes de fonctionnement par élève, et le taux de subvention, entre autres.

Analyse de l'industrie de la construction au Québec, 1991

Québec : Commission de la construction du Québec, Service Recherche et organisation, 1992. 96 p. : ill. *CSI 67148.003.* ISSN 0317-5901 ISBN 2-550-22019-6
MICROLOG 93-01155 2 fiche

L'analyse de ces informations permet de tracer un portrait de l'activité sur les chantiers et de la population qui y oeuvre. Ainsi, les données contenues dans ce document posent un diagnostic sur l'état général de l'industrie de la construction, dans l'ensemble du Québec et chacune des régions. Il présente d'abord les principaux indicateurs économiques de l'industrie ainsi que les faits saillants survenus au cours de l'année en matière de relations du travail; il étudie les principales caractéristiques des employeurs; et, se penche sur la question des salariés assujettis au Décret de la construction. Finalement, les quatres annexes qui complètent ce document fournissent, non seulement certaines définitions nécessaires à son interprétation, mais aussi près de 40 tableaux statistiques complémentaires à ceux inclus dans le texte.

Analyse de la rentabilité des titres émis dans le cadre du REA

Montréal : Caisse de dépôt et placement du Québec, 1992. 51 p. : ill. (Recherche) *CSI 67132.204.* ISSN 0840-8246 ISBN 2-550-19187-0
MICROLOG 93-04546 1 fiche

L'objectif principal de cette étude est d'analyser la rentabilité du capital émis dans le cadre du REA et ce, du strict point de vue de l'actionnaire investisseur. Pour ce faire, on examine le total des placements selon le nombre d'émissions, le montant et la capitalisation relative. De plus, on aborde les rendements, et la participation québécoise relativement à la capitalisation et aux rendements. Finalement, le document présente la méthodologie.

Analyse des besoins de formation de niveau collégial en environnement : rapport de recherche

Québec : Gouvernement du Québec, Ministère de l'enseignement supérieur et de la science, Direction générale de l'enseignement collégial, Direction des programmes, Service de la planification des programmes, 1992. 68 p. Bibliogr. *CSI 67322.201.* ISBN 2-550-27434-2
MICROLOG 93-07077 1 fiche

Ce document constitue une synthèse des conclusions qui se dégagent des sous-projets qui figurent dans un document en annexe. La présentation des définitions et des concepts qui servent de cadre à la recherche inaugure la synthèse. Elle est suivie par un état de la situation de la formation générale initiale en environnement. Le document traite ensuite de la formation professionnelle. Un portrait de l'offre de formation en provenance des collèges publics est d'abord tracé. Il est suivi du portrait de l'emploi en environnement au Québec et de la détermination des besoins sur les plans qualitatif et quantitatif. Quelques éléments de prospective terminent cette synthèse.

Analyse des tendances temporelles et régionales en matière d'utilisation de l'échographie prénatale

par G.M. Anderson. Ottawa : Commission royale sur les nouvelles techniques de reproduction, 1992. vii, 24 p. Bibliogr. *L'éd. anglaise (An Analysis of temporal and...) sur la même fiche.* ISBN 0-662-97854-4
MICROLOG 93-07450 1 fiche

L'échographie prénatale peut soit faire de l'évaluation diagnostique complète des femmes enceintes chez qui on redoute certaines affections, soit être administrée systématiquement à toutes les femmes enceintes afin de dépister des affections insoupçonnées et susceptibles d'être traitées et, ainsi, d'améliorer le résultat de la grossesse. Si l'intérêt diagnostique de l'échographie est unanimement reconnu, son utilité en tant que technique de dépistage systématique chez toutes les femmes enceintes demeure très discutée. La présente étude a été réalisée à partir des données figurant sur les factures des médecins afin de montrer l'évolution qui a touché l'utilisation de l'échographie prénatale en Ontario et en Colombie-Britannique.

Analyse du rendement d'un portefeuille obligataire

par P. Drolet. Montréal : Caisse de dépôt et placement du Québec, 1992. 46 p. Bibliogr. (Recherche) *L'éd anglaise (Analysis of the return...) : 93-04487/1.* ISSN 0840-8246
ISBN 2-550-19187-0
MICROLOG 93-04488 1 fiche

Ce document présente un modèle d'analyse du rendement d'un portefeuille de titres obligataires. Construit à l'aide du modèle d'analyse du rendement de la gestion active de la Caisse de dépôt et placement du Québec, le modèle décompose le rendement du portefeuille et de l'indice de référence en plusieurs facteurs. Ces facteurs permettent de quantifier en points centésimaux l'incidence de plusieurs décisions du gestionnaire, concernant par exemple la répartition tactique de chaque type d'obligations dans le portefeuille et le positionnement du portefeuille sur la courbe de rendement. L'exemple présenté tout au long de ce document illustre l'application de chaque facteur à l'analyse du rendement et fournit un cadre de référence à l'analyste, au gestionnaire ou à toute autre personne qui s'intéresse au rendement d'un portefeuille obligataire.

Analyse économique de la pêche côtière au Québec, 1987-89

par G. Lalande et N. Dubé. Québec : Ministère des pêches et des océans, Région du Québec, Direction de l'économique, de la statistique et de l'informatique, 1990. 32 p. : ill. Bibliogr (Rapport d'analyse économique et commerciale ; no 68) *L'éd. anglaise (Economic analysis of the Quebec...) sur la même fiche. CSI 21105.266.* ISSN 0847-1185 ISBN 0-662-96449-7
MICROLOG 93-01681 1 fiche

Au cours des dernières années, on a constaté une baisse relativement importante de la ressource débarquée par les flottes côtières du Québec. Afin de situer le problème, cette analyse dresse le portrait de la performance de la flotte côtière au Québec de 1987 à 1989. Dans ce rapport, on montre les relations qui existent entre le nombre de bateaux, le volume et la valeur des débarquements et les revenus des pêcheurs. Ce document vise donc à sensibiliser les intervenants du milieu aux problèmes que les flottes côtières ont à faire face et ainsi leur permettre d'évaluer des avenues de développement possibles.

Analyse pluriannuelle de rentabilité des entreprises de pêche du Québec, 1984-1985-1986 : les cordiers de moins de 35 pieds

Québec : Pêches et océans, Région du Québec, Division des services économiques, 1988. iii, 70 p. . ill. (Rapport d'étude ; 88-5F)
CSI 21105.289. ISBN 0-662-94952-8
MICROLOG 93-03450 1 fiche

Cette publication est le résultat de la mise en parallèle de la performance financière de la flotte des cordiers de moins de 35 pieds, pour les années 1984, 1985 et 1986. Ce rapport traite exclusivement des cordiers de moins de 35 pieds, c'est-à-dire des bateaux de moins de 35 pieds de longueur hors tout, ayant pêché, au cours de l'année de référence, avec un engin fixe à cordes tel le filet maillant, la palangre ou la trappe. Il examine donc le revenu total; les coûts variables d'opération; les produits pétroliers; les coûts d'entretien et de réparation; les coûts d'engins; les coûts fixes d'opération; les frais de main-d'oeuvre; l'amortissement; le revenu net; les frais financiers; et, le revenu de trésorerie.

Analysis and control of a multilevel GTO thyristor inverter for static compensation

by Y. Zhuang and R.W. Menzies. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power Systems Planning and Operating Section, HVDC and SVC Controls Committee, 1993. 8 p. : ill. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05186 1 fiche

This paper investigates the use of a multilevel GTO thyristor inverter as a static compensator. The design allows the voltage rating of the inverter to be considerably increased without the inherent problems of series connection of the GTO thyristors. Fundamental frequency switching of the inverter produces a staircase type waveform with reduced harmonic generation. The report discusses the operation and control of the multilevel inverter and the advantages of such a design over other currently proposed designs with respect to losses and harmonic generation.

Analysis of accuracy and reliability of Loran-C at Pemberton

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by G. Lachapelle, B. Townsend [and] T. Speakman. Calgary, Alta. : University of Calgary, 1991. xii, 43 p. : ill., maps. Bibliogr.
MICROLOG 93-03105 1 fiche

The availability, reliability and stability of Loran-C signals around Pemberton Airport in British Columbia were investigated using data gathered from May-June 1987 and May 1989-February 1990. Eleven other sites in an area within 80 km of the airport were also occupied to study the effect of the topography on Loran-C and to confirm that differential Loran-C is not a viable option to improve navigation accuracy in this mountainous area. The feasibility of using a GPS-based mobile system to calibrate Loran-C distortions along continuous profiles was demonstrated using selected road sections around Pemberton.

Analysis of collocated sampling results for volatile organic compounds

by P. Steer. Toronto : Environment Ontario, Air Resources Branch, 1993 18 p. ill
MICROLOG 93-05720 1 fiche

In the spring 1989, a three-site trial network of Volatile Organic Compounds (VOC) samplers was initiated. This network has grown substantially and now consists of 14 sites across the province collecting samples on a one in 12 day schedule. As part of the quality assurance efforts for the network, a roving duplicate sampler was used to determine the reproducibility of the sample and analytical methods. This report presents results for the calendar year 1991 when the duplication sampler was installed in downtown Hamilton, Ontario.

The Analysis of dioxins and furans in sediment

by Y.D. Stokker and E.A. Kokotich Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1991. 43 p. Bibliogr. (NWRI contribution ; 91-119) (National dioxin interlaboratory QC study ; no. 2)
MICROLOG 93-06302 1 fiche

This report describes the National Dioxin Interlaboratory Quality Control Study No. 2, the second in a series of intercomparison studies conducted by the Quality Assurance Group at the National Research Institute on the analysis of polychlorinated dibenzo-para-dioxins and polychlorinated dibenzofurans in sediment. The study evaluated the quality and comparability of the data generated by commercial and government laboratories for the analysis of these compounds in naturally-contaminated freeze-dried and wet sediments. The analytical data submitted by 11 Canadian laboratories for the study were evaluated by various statistical treatments to identify outlying results and to assess laboratory performance for precision, accuracy, and bias. A comparison of different methodologies employed by the participants in the study is also presented.

An Analysis of responses to the Report of the French Language Education Governance Advisory Group

by Denis Haché, Stacy Churchill ; assisted by Julie Boissonneault. Toronto : Ministry of Education, 1992. 101 p. : ill. *French ed (Analyse des réponses au rapport .) : 93-00314/2. ONTERIS: ON05996.*
MICROLOG 93-00615 2 fiche

Presents an analysis of the responses made to the 'Report of the French Language Education Governance Advisory Group.' Provides analysis suitable for presenting general trends and major issues raised by citizens, school boards, public agencies and associations in responding to proposals in the Advisory Group Report. Contains a full tabulation of responses to the report by language of respondents making submissions, as well as by region of the province from which the submission originates, and by several categories of respondents, such as school boards, associations, individuals and others. Quantitative trends are identified with respect to each of the 57 recommendations of the report of the advisory group, qualitative analysis of commentaries in the submission is used as a means of identifying underlying issues of relevance to policy makers and citizens concerned with the future of education in the province.

An Analysis of temporal and regional trends in the use of prenatal ultrasonography

by G.M. Anderson. Ottawa : Royal Commission on New Reproductive Technologies, 1992. vii, 21 p. Bibliogr. *French ed. (Analyse des tendances...) on the same fiche.* ISBN 0-662-20060-8
MICROLOG 93-07450 1 fiche

Prenatal ultrasound examination is a technology that can be used either as part of a diagnostic work-up for women suspected of specific conditions during pregnancy or as a screening test routinely applied to women in order to help identify unsuspected conditions that could be treated, leading to an improved pregnancy outcome. Although there is agreement on the value of ultrasound examination in diagnosis, there is debate over the appropriate use of this technology as a routine screening procedure for all pregnant women. This study used physician billing data from Ontario and British Columbia to examine the temporal trends and patterns of prenatal ultrasound use.

An Analysis of the linkages between Canadian trade flows, productivity and costs

by P.S. Rao and T. Lemprière. Ottawa : Economic Council of Canada, 1992. xi, 139 p. : ill. Bibliogr. (Working paper ; no. 46) *French ed. (Les Liens entre les échanges ..) : 93-00124/2 CSI 22215 272* ISSN 1180-3487
MICROLOG 93-00125 2 fiche

This paper analyses the linkages between Canadian productivity, costs, and trade. It provides a brief summary of the recent trends in Canada's export and import flows and cost performance. It discusses the factors that theoretically influence Canada's trade patterns and flows. It also econometrically estimates equations for Canada's exports to, and imports from, the United States, Japan, the European Community, and the newly industrialized countries of Asia (Hong Kong, Singapore, South Korea, and Taiwan). These equations are derived for 14 broadly defined manufacturing industries. It uses relative costs rather than relative prices as key explanatory variables in the equations.

Analysis of the response of healthy and declining sugar maple trees to fertilization

by D. Beals...et al. Toronto : Environment Ontario, 1992. 57 p. : ill. Bibliogr. ISBN 0-7778-0031-4
MICROLOG 93-01919 1 fiche

A fertilizer trial program was begun in 1988 to assess the usefulness of inorganic fertilizer amendments to combat decline of sugar maples in Ontario. Two stands were selected on the Canadian Shield in Muskoka region and two in the Peterborough area on calcareous soils. One stand in each area was tapped for maple syrup production and the other was used as a control. Healthy and declining trees in each stand were assessed for canopy decline using a numerical index of tree stress symptoms. Three healthy and three declining trees in each stand were fertilized in early November 1988 with one of nitrogen, phosphorous, potassium, calcium, magnesium lime or combined nutrient addition. Healthy and declining trees were also selected at each stand to be controls, and were not fertilized. Trees were assessed for decline and foliage and soil samples were collected and analyzed for a variety of chemical parameters prior to fertilization in 1988 and subsequent to fertilization in 1989 and 1990. Statistical techniques were used to assess overall responses in decline index to fertilizer amendments for both locations and decline specific responses. The relationships between soil and tree chemistry and decline status were also analyzed.

Les Années de transition, 7e, 8e et 9e années : directives et modalités d'application

Toronto : Ministère de l'éducation, 1992. 8 p. *ONTERIS: ON06091* ISBN 0-7778-0584-7
MICROLOG 93-02019 1 fiche

Traite des directives et modalités d'application des années de transition. Le programme des années de transition sera conçu de façon à ce que les élèves puissent atteindre tous les résultats d'apprentissage visés dans les 4 grands champs d'études: le langage; les arts, la personne, être social; les mathématiques, les sciences et la technologie. En 7e et 8e année, le programme d'études empruntera une approche intégrée vis-à-vis de l'apprentissage et mettra en relief les rapports qui existent entre les 4 champs d'études.

Annual statistical report, 1991-92

Saskatchewan. Prescription Drug Services. Regina : The Branch, 1992. 25 p. : ill. *CSI 72244.002.* ISSN 1187-8991
MICROLOG 93-05022 1 fiche

The Prescription Drug Plan was established to reduce the direct cost of prescription drugs to Saskatchewan residents; to provide coverage for quality pharmaceutical products of proven therapeutic effectiveness; to reduce the cost of drug materials by encouraging effective price competition and quantity discounts; and to encourage the rational use of drugs through research, consultation with professional associations, and educational programs directed at physicians, pharmacists and the general public. This statistical supplement describes the history, other background information to the Plan, presents highlights for 1991-92, presents the organization of the Branch, benefits of the Plan, and other activities of the Branch. Financial information is included.

The Applicability of data bases on combined environmental extremes for calculation of loads on offshore structures

Norske Veritas (Canada) Ltd. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1989. vi, 72 p. : ill. Bibliogr. (Report ; no. 89-1)
MICROLOG 93-00252 1 fiche

Study to investigate the applicability of environmental data bases to the calculation of load combinations on offshore structures. The principal Canadian agencies that archive wind, wave, ice, current, and earthquake data were consulted and the nature and origin of the data, the spatial and temporal coverage, and the quality control are assessed to determine the parameters required. Software capabilities are evaluated for their quality and the efficiency of the output products, the availability of user-defined data set operations and the possibility of incorporating load combination techniques. The role of load combinations in structural design and decision-making is investigated, with both technical literature and design codes being studied to substantiate the recommendations regarding applied data analysis. Three possible work plans are suggested.

The Application and effectiveness of the coastal fisheries forestry guidelines in selected cut blocks on Vancouver Island

by D.B. Tripp, A. Nixon and R. Dunlop. Nanaimo, B.C. : Ministry of Environment, Lands and Parks, Fish and Wildlife Division, 1992. vi, 25 p. ill.
MICROLOG 93-00511 1 fiche

The guidelines were developed jointly by the forestry industry and the environmental agencies responsible for integrating resource management in coastal watersheds as a common means for applying the management principles required to meet the objectives of each agency's mandate. Part of the development process included an evaluation of their effectiveness after a trial period of use throughout coastal B.C. In March 1992, an evaluation of forest harvesting operations in a random selection of cut blocks on Vancouver Island, within Region 1, was begun to determine the degree of compliance with the guidelines by a number of forest industry operators. The monitoring program addressed the appropriate application of the guidelines in the field, their success, and the impact on fish habitat where the guidelines were not applied or were not successful. This report is a summary of the results.

Application of a pulse microcatalytic reactor for the kinetic modelling of catalytic cracking of gas oil, vol. 1 : final report

by H. Farang, M. Larocca and H. De Lasa. Ottawa : Canada Centre for Mineral and Energy Technology, 1992. xxii, 223 p. : ill. *CANMET contract: 23440-7-919401-SS.*
MICROLOG 93-04286 3 fiche

The unsteady state pulse technique was applied to several commercial catalysts and gas oil feedstocks. Equilibrium catalysts were obtained and impregnated with metal naphthenates under vacuum followed by calcination. Surface science techniques such as B.E.T., scanning electron microscopy, and secondary ion mass spectroscopy analysis were used to confirm the effectiveness of the artificial aging method. Part 2 of the research examined the effects of the addition of metal traps on the FCC catalyst as a step prior to its use in a catalytic cracking process. Experimental runs were performed in a pulse microcatalytic fixed bed using different temperatures and carrier gas flows. In between injections, the bed was fluidized to avoid coke profiles and reactant channelling. The poisoning effects of nickel and vanadium were demonstrated on different catalysts and the influence of nickel and vanadium metals was investigated on gasoline yield, Research Octane Number of the gasoline, coke yields and light gases yield and selectivity. Experimental results were analyzed with a three lump model featuring gas oil, gasoline, and gas plus coke, and a five lump model where gas oil was split into paraffins, naphthenes, and aromatics.

The Application of AES environmental data to ice interaction modelling : final report

Ian Jordaan and Associates Inc. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1989. v, 123 p. ill Bibliogr. (Report ; no. 89-8)
MICROLOG 93-00364 2 fiche

Report on the role of the Atmospheric Environment Service data bases for calculating extreme ice loads on offshore structures, with particular attention on the Sea Ice Climate Information System (CRISP). Landfast and pack ice sites in the Beaufort Sea are used to illustrate the appropriate extremal probabilistic techniques. Critical ice load scenarios are defined and seasons for which each scenario applies are determined from the data. Probability distributions of the geometrical features of the pack ice and of the ice velocity are calculated. Where processes are combined, design parameters are obtained by combining probability distributions. Emphasis is also placed on extremal probabilistic methods. Since maximum ice loads are specific to structure design, representative parameters such as floe kinetic energy and momentum are calculated. The study also updated velocity distributions conditional upon collision with the structure

An Application of ecosite mapping to assess land sensitivity to forest harvesting in the Corner Brook Lake watershed, western Newfoundland

by A.R. Van Kesteren. St. John's : Forestry Canada, Newfoundland and Labrador Region, 1992. viii, 55 p. : ill. Bibliogr. (Information report ; N-X-280) ISSN 0704-7657 ISBN 0-662-19611-2
MICROLOG 93-00210 1 fiche

The Corner Brook Lake watershed provides municipal and industrial water supplies for the City of Corner Brook. The approximately 90 sq km of land contains a valuable timber resource within a short hauling distance of a major paper producer in the city. A land sensitivity assessment of the watershed was undertaken through an application of ecosite mapping concepts common to current Canadian ecological land classification practice. Ecosites were delineated as homogenous pedologic, geomorphologic and hydrologic land units using conventional air photo interpretation. Additionally, a simple provisional water yield assessment based on ecosite rankings was undertaken to address water supply concerns. Ecosite mapping was produced at an operational scale of 1:12,500 and maps were digitized and entered into a GIS to aid in application of the data base.

Application of micro-electronic technology to assist elderly and disabled travellers

by Jouko A. Parviainen , in co-operation with Wally G. Atkinson [and] Margaret L. Young. Montreal : Transport Canada, Policy and Coordination, Transportation Development Centre, 1991. xii, 66 p. Bibliogr.
MICROLOG 93-01474 1 fiche

This report presents an exploratory investigation into micro-electronic hardware and software technologies that can best be adapted for both personal usage and usage on-board road vehicles to assist elderly and disabled travellers. It identified those system functions and features that have the potential to improve mobility, increase personal safety and security, and make travelling more predictable and enjoyable. The potential features are categorized as the functional areas of travel advisory and navigation; specialized transportation advisory; vehicle monitoring, safety and performance, vehicle control; driver monitoring and assist; and primary and secondary driving controls. The report further documents specific application packages ranging from simple accessible entrance locators to enhanced night vision systems and driver monitoring and advisory systems.

Application of neural nets to the excitation control of a generating unit

by O.P. Malik and Y. Zhang. Montreal : Canadian Electrical Association, 1992. 14 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06081 1 fiche

Description and basic characteristics of artificial neural nets (ANNs) are given in this paper. Application of a popular type of ANN, the multi-layer perceptron as a power system stabilizer (PSS) providing a supplementary control signal to the generator excitation system is illustrated. Using the error back propagation algorithm, the proposed ANN based PSS is trained to match the performance of a self-optimizing pole-shifting adaptive PSS. Simulation studies on a single machine infinite bus system demonstrate the effectiveness of the ANN based PSS.

Application of the BIRIS range sensor for wood volume measurement

by F. Blais...et al. Ottawa : National Research Council Canada, Institute for Information Technology, 1992. v, 19 p. : ill. Bibliogr.
MICROLOG 93-03702 1 fiche (Available on fiche only)

Description of the application of the BIRIS range sensor to the estimation of timber volume. Techniques tested include a radial method to be used while processing logs to extract, in real time, the exact profiles and diameters along the length of every log; and an axial method for butt scaling of tree length piles or truckload measurement. A description of the range sensor emphasizing its use at the harvest site, the method for camera registration, the algorithms used to measure the volume of wood, and some results of real log measurements are presented. A comparison with current measurement methods is included.

Application software for testing and evaluation of asphalt mixes : computer-controlled operation of the MTS 810 testing system

by R. Raciborski, K.K. Tam and D.F. Lynch. Toronto : Ministry of Transportation, Engineering Materials Office, 1992. 24 p. Bibliogr. (Materials information report ; MI-161) ISBN 0-7778-0525-1
MICROLOG 93-02100 1 fiche

Seven custom computer application programs were developed to provide automatic control of bituminous mix testing using the servohydraulic materials test system (MTS Model 810). Documentation was prepared for each of the programs, including a summary of the test procedure, the source code listing, program control functions, user's operation guide, an example of program output and other useful information. This report describes the testware and elements that are common to all the automated testing procedures documented separately. The system user is provided with essential information on computer terminal setup, definition of terms, measurement principles, using the programs, and transferring of test results to an IBM-compatible computer

An Appraisal of the Lake Diefenbaker commercial whitefish fishery, 1975-85

by M.Y. Chen. Regina : Saskatchewan Natural Resources, Fisheries Branch, 1992. viii, 60 p. : ill., maps. Bibliogr. (Fisheries technical report ; 92-4)
MICROLOG 93-01615 1 fiche

Lake Diefenbaker supported a whitefish commercial fishery from 1976-85, after which all indications pointed to a severe depletion of the larger fish most vulnerable to commercial fishing. Earlier studies had suggested that the Lake Diefenbaker whitefish were fast-growing fish with a life span of 6-7 years and that there was little chance of successful natural production because of severe winter water draw-down. It was then recommended that catchable stock be harvested as quickly as possible. This study addressed the current population, the extent to which natural reproduction operated, the movement and distribution of the population, the level of sustainable harvest, and resumption of commercial fishing.

Apprendre à intervenir auprès des femmes violentées : synthèse d'une recherche-action sur une expérience de formation féministe

Ann Pâquet-Deehy, Maryse Rinfret-Raynor, Ginette Larouche ; et la collaboration de Marie-France Ouimet à l'écriture. Montréal : Université de Montréal, Faculté des arts et des sciences, Ecole de service social, 1992. 23, 20 p. Bibliogr. *Bilingue (Training social workers...).* ISBN 2-921041-11-1
MICROLOG 93-06467 1 fiche

Ce résumé de recherche s'adresse à toute personne susceptible d'intervenir auprès de femmes violentées. Il synthétise les données reliées à l'expérience subjective de quinze intervenantes en formation à l'apprentissage d'un nouveau modèle d'intervention féministe auprès des femmes battues alors que, concurremment à cette formation, les participantes devaient appliquer ce modèle dans leur propre milieu de travail. L'expérience de formation ainsi que la recherche-action qui a été menée parallèlement, sont basées sur un modèle d'intervention féministe auprès des femmes violentées développé par une travailleuse sociale, Ginette Larouche. Le 'Guide d'intervention auprès des femmes violentées' a été largement diffusé dans le milieu des affaires sociales. La recherche-action avait comme but d'améliorer la formation et d'enrichir le modèle.

Aquaculture : cultivating the future : strategy for the 90s

Ottawa : Fisheries and Oceans Canada, 1991. 40 p. : ill. ISBN 0-662-17920-X
MICROLOG 93-07858 1 fiche

Canada's aquaculture sector has seen exciting and rapid growth over the last fifteen years Recognizing Canada's potential to be a leading world aquaculture producer, the Department of Fisheries and Oceans has worked in consultation with the industry and the provinces to develop an Aquaculture Strategy that will position the sector for the turn of the century. The Aquaculture Strategy is based on two components: an examination of the industry's current outlook and needs, and an extensive review of the policies pursued so far. The roots of the new Aquaculture Strategy lie in the first statement of national goals and principles for aquaculture, 'National policy goals for aquaculture'. This strategy builds upon the growth that has been fostered to date, continues to support the industry's sustained growth, while encouraging sound cooperative relationships with other users of Canada's aquatic resource.

Aqueous uranium concentrations in the natural environment

by M.T. Anderson. Ottawa : Atomic Energy Control Board, 1992. iv, 102 p. : ill. Bibliogr. (Research report ; INFO-0411)
MICROLOG 93-08413 2 fiche

The Canadian Nuclear Fuel Waste Management program is based on the premise that high level waste can be safely isolated in deep underground crystalline rock masses. To check the accuracy of the thermodynamic and experimental models used in predicting the geochemical environment in a deep repository, knowledge of the concentrations of uranium and other elements occurring naturally in groundwater is essential. This study used published geochemical data from groundwater and surface water throughout the world to compare the concentration of naturally occurring dissolved uranium to lithology, sampling depth, pH, Eh, HCO3, SO4 and PO4 concentrations. A total of 1,286 chemical data entries were used in the statistical comparisons.

Aquifer vulnerability : Sheffield Farm Project : regional water balance

Dartmouth, N.S. : Environment Canada, Conservation and Protection, Water Quality Branch ; Inland Waters Directorate, Atlantic Region, Water Planning and Management Branch ; Agriculture Canada, 1992. v, 46 p. ill. Bibliogr.
MICROLOG 93-01762 1 fiche

Environment Canada, in cooperation with Agriculture Canada, is leading a five-year study to determine the environmental behaviour of pesticides and nitrates in the climatic, physiographic and soil conditions found in the Atlantic Region. One of the goals of the project is to gain knowledge on agricultural practices that can be applied to avoid unacceptable contamination of ground water by pesticides and fertilizers. Although the focus of research is on ground water and the potential impact of applied pesticides and fertilizers, it is necessary to understand the overall hydrologic cycle as it occurs on and around Sheffield Farm, located five km north of the Kentville Agriculture Experimental Station in Nova Scotia. This report provides the results of a regional water balance, conducted monthly, of the Sheffield Farm study area, based on the best information (hydrometric and climatic) available and describes the study area and climate, the water balance model, data availability, and the analysis.

Aquifer vulnerability : Sheffield Farm Project : year two, 1989-90, report

Dartmouth, N.S. . Environment Canada, Conservation and Protection, Inland Waters Directorate, Atlantic Region, Water Planning and Management Branch, 1990. vii, 104 p. : ill., maps. Bibliogr.
MICROLOG 93-03518 2 fiche

A five-year project to determine the environmental behaviour of pesticides and nitrates in the climatic, physiographic and soil conditions found in Atlantic Canada is being conducted to provide a site and logistics model for those evaluating the chemistry and fate of agrochemicals in groundwater, particularly relating to the guidelines for pesticide registration in Canada, and to evaluate agricultural practices that can be applied to avoid unacceptable contamination of groundwater by pesticides and fertilizers. The study involves application of pesticides and fertilizers to crops in a controlled manner but closely following normal agricultural practices. Groundwater quantity and quality are monitored through a series of piezometers and lysimeters. The Agriculture Canada Sheffield Farm, Kings County, Nova Scotia, is the site for all field experiments. This report describes the activities and results of the second year of the study, including continuation of site requirements from year one.

présentée en quatre rapports distincts qui sont ici refondus en un seul travail, chacun des rapports en constituant un chapitre. Une première partie portait sur la vie et l'oeuvre de Jacques Cartier. Le second chapitre fut consacré à l'étude approfondie du deuxième voyage de Cartier avec insistance sur le premier hivernement connu d'Européens en sol canadien. Le troisième chapitre faisait état des relations franco-indiennes au cours des trois voyages du pilote malouin et des questions qui en découlent. Enfin, le dernier chapitre avait pour objet de montrer l'influence de l'oeuvre de Cartier dans la seconde moitié du XVIe siècle, soit jusqu'à l'expédition de Champlain. Ce document se penche précisément sur la dernière partie, soit l'archéologie de sauvetage au parc Cartier-Brébeuf (Québec) en juillet-août 1969

Archives publiques Canada : Rapport annuel 1984-85

Ottawa : les Archives, 1985. 116, 114 p. : ill. *Bilingue. CSI 22274 001.* ISBN 0-660-53979-6
MICROLOG 93-01220 3 fiche

Le principal mandat des Archives nationales du Canada consiste à acquérir et conserver les archives historiques d'importance nationale, d'origine tant publique que privée, et de les rendre accessibles en conformité avec les lois. Les Archives assurent aussi des services consultatifs et opérationnels en matière de gestion des documents aux ministères et organismes du gouvernement fédéral. Le rapport annuel pour l'exercice financier fait le bilan des activités de l'année dans ces différents domaines d'intérêt et présente les perspectives d'avenir. On inclut la liste des publications et des expositions, ainsi qu'un organigramme des Archives et des tableaux statistiques.

Arctic sea-ice cover and sea-ice cover anomalies over eastern Canadian waters

by T. Agnew. Saskatoon, Sask. : National Hydrology Research Centre, Atmospheric Environment Service, Canadian Climate Centre, 1990. ii, 39 p. : maps. Bibliogr. (Report ; no. 90-2)
MICROLOG 93-03306 1 fiche

This report describes the results of an analysis of the northern hemispheric sea-ice cover database for its representativeness over eastern Canadian Arctic waters. The database identifies the average freezeup and breakup patterns in the Canadian Arctic Islands, Baffin Bay/Davis Strait, and Hudson Bay area and can be used for sea-ice variability and anomaly studies. Sea-ice anomalies for the 1982-83 El Nino winter are compared to atmospheric temperature and circulation anomalies over the Baffin Bay/Davis Strait area. Sea-ice anomaly charts for the entire 1953-88 period are calculated.

Arms control and disarmament -- Rev.

by J. Lee. Ottawa : Library of Parliament, Research Branch, 1992. 23 p. Bibliogr. (Current issue review ; 87-13E) *French ed (Le Contrôle des armements...) on the same fiche. Revised 16 March, 1992.* ISBN 0-660-14621-5
MICROLOG 93-00720 1 fiche

In the post-war era, discussion of the prospects for a continued peace, or the eventuality of war, inevitably converge on the arms race. Controlling the arms race is argued by some to be a necessary element in the promotion of international stability. Others argue, however, that in fact arms control does little to contain the arms race--it simply codifies it. This paper provides a brief overview of the various forums in which arms control negotiations take place, some of the accomplishments achieved and, where appropriate, Canada's contribution to these.

Aromatic hydrocarbon concentrations in sediments of Placentia Bay, Newfoundland

by J.W. Kiceniuk. St. John's : Dept. of Fisheries and Oceans, Newfoundland Region, Science Branch, 1992. iv, 12 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1888)
ISSN 0706-6457
MICROLOG 93-04934 1 fiche

Although Placentia Bay has a low potential for contamination from combustion sources because of its low population levels, the Come By Chance oil refinery is located at the northeast end of the bay and tanker traffic to the refinery results in periodic oil spills. This study examined the potential for contamination of recent sediments with polycyclic aromatic hydrocarbon (PAH) due to tanker and refinery activity. Sediment samples were taken from the area of the Come By Chance refinery, Woody Island, Wild Cove, and Port Royal Arm, all in the north end of Placentia Bay. Samples were extracted using dichloromethane extraction of dried sediment for determination of total aromatic hydrocarbon content and hexane extraction of wet sediment for estimation of the bioavailability of hydrocarbons and determination of more volatile compounds. Class analysis of aromatic hydrocarbons was conducted on an NH2 column with detection at 255 nm.

Artificial aging of distribution-class composite insulators

by C. De Tourreil and P.J. Lambeth. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, 1992. 15 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06064 1 fiche

This paper describes experience with a technique for evaluating the ability of composite insulators to withstand natural weather in polluted conditions. The insulators are coated with cement and aged in salt fog at near-normal electrical stress. After one week at one salinity the insulator flashover voltages are measured in clean fog. This cycle is repeated at progressively higher salinities. Insulators are classified by the number of aging cycles they withstand without excessive damage or frequent flashovers. Other diagnostics, e.g. visual damage, total charge and flashover voltage in clean fog were evaluated as means of differentiating between insulators surviving the same number of aging cycles.

Aspects nutritionnels et économiques des poissons et des fruits de mer

par J. Bourdages. Québec : Ministère des pêches et des océans, Région du Québec, Direction de l'économique, de la statistique et de l'informatique, 1992. iv, 49 p. : ill. Bibliogr. (Rapport d'analyse économique et commerciale ; no 117) (Rapport d'étude ; 91-13F) *L'éd. anglaise (Nutritional and economic aspects of fish...) : 92-07833/1.* ISSN 0847-1185 ISBN 0-662-97450-6
MICROLOG 93-04566 1 fiche

Les perspectives de consommation révèlent que les viandes blanches, incluant les poissons et fruits de mer, verront leur popularité augmenter, et ce, notamment, pour des raisons de santé. Dans ce contexte, il importe que certains aspects nutritionnels et économiques du poisson fassent l'objet d'une étude plus approfondie. Tout d'abord, le premier chapitre situe l'importance des poissons et fruits de mer dans l'alimentation des Canadiens. Les barrières psychologiques freinant la consommation y sont aussi abordées. L'une d'elles, le prix d'achat des produits marins, fait l'objet d'une étude plus approfondie au chapitre deux. Le chapitre suivant informe sur les aspects nutritionnels des poissons et fruits de mer. Finalement, les effets bénéfiques sur la santé d'une consommation accrue de produits marins sont analysés.

Aspects of the demand for migratory game bird hunting licences in Alberta

by P.C. Boxall. Edmonton : Alberta Forestry, Lands and Wildlife, Fish and Wildlife Division, Socioeconomic and Program Services Section, 1989. ix, 28 p. : ill. Bibliogr. (Occasional paper ; 3)
MICROLOG 93-02124 1 fiche

This study uses economic theory to investigate aspects of the demand for migratory game bird hunting licences in Alberta. Demand is defined as the observed number of federal migratory bird licences sold to Albertans in a given year. Although many people who did not purchase licences would still like to hunt, their decision not to buy a licence was influenced by licence prices, the supply of birds available, and the time and weather. This paper investigates the significance of the relationship between some of these factors and licence sales in Alberta.

Assessment of cropping systems in Manitoba using agroecological resource regions

Ottawa : Agriculture Canada, Research Branch, 1993. 53 p. Bibliogr. (Technical bulletin ; 1993-4E) *CSI 22403.206* ISBN 0-662-20366-6
MICROLOG 93-07033 1 fiche

This study characterized and compared farm-level cropping systems in Manitoba, using a biophysical framework for database organization and presentation. The province was subdivided into agroecological resource areas (ARAs) (areas of similar landscape, soil classification, and parent material), then grouped into 10 agroecological resource regions (ARRs), which are areas of similar agriculture production potential based on ARA parameters and agroclimatic conditions. A farm-level cropping systems legend, based on the type and proportion of crops within a farm unit, was developed using census of agriculture data in consultation with local agronomic and soils specialists. Four specialized systems and eight dryland systems were identified, with the eight dryland systems further subdivided into low pasture and moderate pasture variants. Irrigation and horticulture systems were not assessed

Assessment of factors affecting the performance of Ontario sewage treatment facilities : technical facilities

prepared for Ontario Ministry of the Environment, Environment Canada, and the Municipal Engineers Association ; by XCG Consultants Ltd. Toronto : The Ministry ; Ottawa : The Dept., 1992. xv, 109 p. : ill. Bibliogr. ISBN 0-7778-0097-7
MICROLOG 93-03770 2 fiche

In May 1991, an investigation was begun to identify factors that contribute to poor performance at Ontario municipal sewage treatment plants (STPs). The project comprised two parallel project stages, with Study 1 further subdivided into two components. Study 1, Phase 1 identified the principal factors limiting the performance of Ontario STPs and recommended optimization approaches to address these performance limiting factors. Study 1, Phase 2 will demonstrate the effectiveness of selected optimization approaches recommended in Phase 1. Study 2 was designed to evaluate the United States Environmental Protection Agency's composite correction program as a tool for diagnosing and subsequently improving the performance of Ontario STPs. This report presents the findings of Study 1, Phase 1.

prepared for Little Harbour Fisheries ; by Claire E. Carver and André L. Mallet Halifax : Dept. of Fisheries, 1992. 33 p. : ill. Bibliogr. (Report ; no. IDD 106) ISBN 0-88871-197-2
MICROLOG 93-04233 1 fiche

This study assessed the effects of trays, plots, Nortene bags, and the upweller system on the performance of one-year-old quahogs at Chance Harbour and Melmerby on the Northumberland Strait shore of Nova Scotia. Quahogs used in the experimental treatments were successfully overwintered both in indoor tanks and on oyster tables, and pre-conditioned in the upweller from 17 May to 4 July. Comparing quahog growth within treatments allowed an evaluation of such factors as site, location, water depth, seagrass cover, sediment type, and elevation above the substrate.

An Assessment of fish handling procedures and biological factors on herring roe quality and yield

by R. Crawford, D. Tully and S. MacInnis. S.l. : Canada/Nova Scotia Economic Regional Development Agreement, Fisheries Subagreement, 1988. iv, 41 p. : ill. Bibliogr. (ERDA report ; no. 12) ISBN 0-88871-143-3
MICROLOG 93-04412 1 fiche

Study of fish handling procedures and biological factors in the herring roe industry. Fish are compared from the boat hold to fish immediately iced at sea and then to fish transported to the plant for roe extraction. The biological aspects of roe maturity, weight, fish size, and male/female ratio were examined for their influence on roe yield and grading. The causal factors for blood vascularization or bloodiness of roe were also examined.

Assessment of impacts from the Ruttan Mine site upon downstream waterways

by D.J. Green and A.E. Beck. Winnipeg : Dept. of Environment, Environmental Management Division, Water Quality Management Section, 1992. ix, 156 p. : ill., maps. Bibliogr. (Water quality management report ; no. 92-8)
MICROLOG 93-06789 2 fiche

Zinc and copper ore mining operations at Ruttan Mine in northeastern Manitoba commenced in 1973. A study was undertaken to assess impacts that Ruttan Mine discharges might have on downstream water quality, fish and aquatic fur bearers. A description of the study area, a review of mine operations, field sampling methods, analytical procedures, and results are presented. Results include detailed water quality data, metal residues in fish muscle tissue, metal residues in aquatic fur bearers, fishery and fur bearer production.

Assessment of lake whitefish and other species in Lac des Iles and Pierce Lake in Saskatchewan

by W.K. Liaw. Regina : Saskatchewan Natural Resources, Fisheries Branch, 1992. iv, 100 p. : ill. Bibliogr. (Fisheries technical report ; 92-3) *CSI 72257.200.*
MICROLOG 93-04877 2 fiche

Both Lac des Iles and Pierce Lake have a long history of commercial fishing dating back to the early 1900s, with the mainstay of the fishery the lake whitefish. Since the mid-1970s, there has been a drastic decline in the harvest and a decline in the stock abundance and quality of the fish is suspected as the cause for the collapse of the lake whitefish fishery. This study was conducted to update the biological status of the major fish species in these lakes with special emphasis on the lake whitefish populations. Test netting and standard gang gill nets was conducted in Lac des Iles in fall 1988 and in summer 1989, and in Pierce Lake in summer 1989. The data obtained were compared with those from previous studies and long-term commercial fishing records were used for trend analysis of stock abundance and for estimation of the potential maximum sustainable yields of the lake whitefish.

Assessment of lot regrading programs, related bylaws and public information

by D. Armstrong. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1992. viii, 179 p. : ill. Bibliogr. ISBN 0-88654-374-6
MICROLOG 93-01421 3 fiche

Over the past 10 years, heavy rainstorms in some areas of Edmonton and Strathcona County have caused sanitary sewer systems to back up, overloading sewage treatment plants and discharging raw sewage into the North Saskatchewan River. Both municipalities increased the capacity of the sanitary sewer system in affected areas, began a public awareness and education campaign to improve lot grading and began lot regrading programs. This project assessed these education and lot regrading programs and drew up guidelines for future lot regrading programs in developed areas. Information was obtained from interviews with municipal personnel involved in the administration and implementation of the programs; from plans, pamphlets, reports and copies of bylaws; from questionnaires delivered to over 500 householders, of whom 150 replied; and a field survey of 63 lots. The main issues addressed were the right of entry and enforcement, public education, implementation, efficiency and effectiveness.

Assessment of nursery grow-out strategies for juvenile quahogs *Mercenaria mercenaria* in Nova Scotia

submitted to Little Harbour Fisheries ; by C.E.A. Carver and A.L. Mallet Halifax : Dept. of Fisheries, 1991. ,22 p. : ill., maps. Bibliogr. (Report ; no. IDD 101) ISBN 0-88871-200-6
MICROLOG 93-04313 1 fiche

In Atlantic Canada, natural populations of the hard clam or quahog occur along the Northumberland Strait and the north coast of Prince Edward Island where water temperatures are warm enough to permit spawning and recruitment. Until 1985, there was a small fishery but then demand rose and remains at a very high level. It is not known if the stocks can sustain this level of fishing. This study compared the effectiveness of a land-based upweller system with other strategies for growing quahogs from 1-10mm. Various forms of suspension culture, as well as oyster bags and bottom seeding, were evaluated. The study also examined the spawning status and size frequency distribution of the quahog population at a local commercial lease.

Assessment of oilspill modelling using SeaSonde current observations

by D.O. Jodgins and J. Huang. Ottawa : Environment Canada, Environmental Protection Directorate, 1992. v, 257 p. : ill., maps. Bibliogr. (Report ; EE-133)
MICROLOG 93-08104 2 fiche

In this study a comparison is made of oilspill trajectories modelled with surface currents measured with the HF radar against trajectories modelled using the depth-averaged tidal currents, derived from the finite element (FE) model, to which a surface wind-drift current has been added using locally measured winds. The model-plus-wind current approach characterizes about the best one can do in many coastal locations in Canada. The purpose of this study is to examine the nature of errors that arise from the simplified approach, and to comment on the benefits arising from the use of remotely sensed data for emergency response.

Assessment of technology for treatment of natural gas plant waste sludges

prepared by B.H. Asano Associates and Stanley Industrial Consultants Ltd. ; for Environmental Research Advisory Council, Canadian Petroleum Association and Conservation and Protection, Environment Canada. Ottawa : The Association, 1992. xiii, 261 p. : ill. Bibliogr.
MICROLOG 93-04013 4 fiche

This study identified, reviewed, and assessed potential technology or combination of technology options for treating waste sludges produced by the gas processing industry. A literature and technology review was conducted to identify potential treatment technologies and/or technology combinations; identify economics (capital and operational) and assess applicability to Western Canada field and climatic conditions. The physical and chemical characteristics of gas plant waste sludge was reviewed and a profile of priority waste sludges was prepared. Ranges of contaminants were identified, including organics, metals, sulphur, and hydrocarbons likely to influence treatment efficiencies. Technology screening and assessment methodology used in previous technology assessment studies was reviewed and preliminary screening and detailed evaluation criteria and associated weighting factors were developed. The key elements of a conceptual future work plan for field demonstration testing of selected technologies were identified.

Assessment of the 1992 snow crab *Chinonoecetes opilio* exploratory fishery in Bay of Islands, western coast of Newfoundland

by P. Mallet, R Campbell and M. Moriyasu. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1993. vi, 15 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2189) ISSN 0706-6473
MICROLOG 93-05411 1 fiche

An exploratory snow crab fishery was initiated in Bay of Islands on the western coast of Newfoundland in 1987. Since the beginning of the fishery, it has been managed under no quota limitations. From 1987-91, landings were less than 15 tonnes per year but in 1992, landings increased to 199 tonnes, although the fishery had to be closed a number of times because of the high incidence of soft-shelled crab in the catches. For the first time in 1992, a post-season trawl survey was conducted to evaluate the available biomass and provide scientific advice for the establishment of a sound management plan. The survey sampled 25 stations during the day time using a 25 meter otter trawl.

Assistance programs for agriculture and the food processing sector in the United States : summary of report

Ottawa : Agriculture Canada, Policy Branch, Competitiveness Division, Agri-Food Policy Directorate, 1992. ii, 67 p. (Working paper ; APD 92-1)
MICROLOG 93-03295 1 fiche

This study was carried out to identify and collect comprehensive information on federal, state and local support to agriculture and food processing in the United States from 1985-89. The study identifies and examines support programs provided by the federal government, by state governments in California, Iowa, Kansas, New York, North Dakota, Texas and Wisconsin and by a sample of 28 county governments in the seven states. It identifies support programs relating to wheat, corn, barley, soybeans, cattle, hogs, milk, eggs, chicken, turkey, apples and potatoes. The study also identifies support to the food products industry at the three-digit SIC level. The range of programs includes cash grants, loans, loan guarantees, equity infusions, contributions to government enterprises and government-sponsored enterprises, price guarantees, provision of goods and services at below-market prices, tax expenditures and government procurement. The value of a subsidy is measured on a cash-outlay basis. The value of most farm loan programs is established as the excess of market interest over the interest actually paid.

Assurance-chômage : jugements touchant la Loi sur l'assurance-chômage et la Charte -- Rév.

par J.-D. Bélanger. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992 16 p. (Etude générale ; BP-191F) *Révisé en septembre 1992. L'éd anglaise (Unemployment insurance : decisions...) sur la même fiche.* ISBN 0-660-94129-5
MICROLOG 93-07438 1 fiche

Deux jugements de 1988 de la Cour fédérale, l'un de la Division de première instance, l'autre de la Cour d'appel, ont eu recours à la Charte pour déclarer inconstitutionnelles certaines dispositions de la 'Loi de 1971 sur l'assurance-chômage'. En plus de s'appliquer à des situations concrètes assez fréquentes de nos jours, ces jugements expriment un changement dans l'attitude de la société envers les parents au foyer et les personnes âgées. Ce document se penche particulièrement sur l'affaire Schachter: prestations pour les pères naturels restant à la maison; et, sur l'affaire Tétreault-Gadoury: prestations pour les travailleurs âgés de 65 ans et plus.

Assurance-dépôts : description de divers systèmes

par N. Pothier. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992 13 p. Bibliogr. (Etude générale ; BP-308F) *L'éd. anglaise (Deposit insurance...) sur la même fiche.* ISBN 0-660-94061-2
MICROLOG 93-07442 1 fiche

Dans ce texte, on présente dans un premier temps une comparaison entre les institutions qui détiennent des dépôts et les compagnies d'assurance. Dans un second temps, on décrit brièvement divers systèmes de protection des dépôts à travers le monde afin d'illustrer dans quelle mesure les gouvernements de divers pays participent à la protection des dépôts. On examine très brièvement le système de protection des dépôts au Canada puisqu'on examine cette question de façon plus détaillée dans le cadre d'une autre étude.

Asymmetric shape and variable tail thickness in multinomial probabilistic responses to significant transport service level changes -- Rev.

by M.J.I. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. ii, 24 p. : ill. Bibliogr. (Publication ; no. 893) (Cahier ; 9311) (Discussion paper ; no. 13)
MICROLOG 93-05460 1 fiche

This paper considers five types of mode choice models, all of which contain the LINEAR LOGIT as an embedded special case. The model types belong to the BOX-COX LOGIT, DOGIT, and INVERSE POWER TRANSFORMATION families. The paper focuses on particular features of the probabilistic response curve that can make a difference in the evaluation of changed transport conditions, such as fares and speeds. With a sample of four intercity passenger modes for 120 Canadian city pairs in 1976, evidence of both modal captivity and asymmetric response was found that would make a difference to the evaluation of significant service improvements. From a modelling point of view, the LINEAR LOGIT form is easily rejected in favour of any of the five types of generalizations explored.

At home with Alzheimer disease : useful adaptations to the home environment

Ottawa : Canada Mortgage and Housing Corporation, 1990. 14, 16 p. : ill. *Bilingual (La Maladie d'Alzheimer...).* ISBN 0-662-57987-9
MICROLOG 93-05256 1 fiche

This document contains suggestion based on the results of a study on the ways in which private homes may be adapted for Alzheimer patients and their caregivers. The suggestions are clustered into four groups, according to the intent of the practical changes, that is: to increase the safety and security of the patient; to adapt to their wandering, pacing, and confusion about where they are; to prevent or reduce their anxiousness and restlessness; and to meet caregivers' needs.

At what price higher education in Africa? A case study of higher education systems in Cameroon

by J.L. Ngu and S.Y. Kwankam. Ottawa : International Development Research Centre, 1992. 91 p. : ill. (Manuscript report ; 318e) ISBN 0-88936-634-9
MICROLOG 93-02063 2 fiche (Available on fiche only)

This document sets out to evaluate higher education in one country in the hope that lessons can be learned which will be of benefit to other African countries. It summarises what is not well with the present system. It describes how certain pressing problems have been addressed. It also brings hopes and aspirations into focus in proposals for future orientation of higher education in Cameroon and its innovation in the education system, relevance to Cameroon, and continuing evaluation. It proposes an evaluation questionnaire incorporating these principles.

Atelier sur l'évaluation des incidences des exportations (EIE) : résumé des débats

Atelier sur l'évaluation des incidences des exportations (1993 : Calgary, Alb.). Calgary, Alb. : Office national de l'énergie, 1993. ii, 24 p. *L'éd. anglaise (Export Impact Assessment...) : 93-06434/1.* ISBN 0-62-20630-4
MICROLOG 93-08621 1 fiche

L'évaluation des incidences de l'exportation (EIE) s'inscrit dans le volet "audience publique" de la méthode d'examen axée sur les conditions du marché, méthode par laquelle l'Office évalue les demandes de licence d'exportation de gaz naturel à long terme. L'EIE permet à l'Office de déterminer si une exportation proposée risque d'empêcher les Canadiens de satisfaire leurs besoins en énergie à des prix du marché raisonnables. Ce document présente le résumé des débat lors de cet atelier, tenu à Calgary le 1er avril 1993. On y a abordé les scénarios, l'approvisionnement en gaz, la demande et le transport, et les principes et processus sous-tendant de l'EIE.

Atelier sur le dépérissement dans les érablières : cahier des conférences

préparation et mise en page: Guy Boudreault et Gaston B. Allard. Saint-Hyacinthe, Québec : Centre de recherche acéricole, 1989. iv, 159 p. : ill. Bibliogr. ISBN 2-551-12172-8
MICROLOG 93-06458 2 fiche

Depuis quelques années, les producteurs acéricoles et les chercheurs sont préoccupés par le dépérissement qui affecte un nombre croissant d'érablières au Québec. Ce problème qui frappe actuellement nos forêts de feuillus, n'est ni nouveau ni particulier au Québec. par contre, il se distingue par son ampleur et le nombre d'essences touchées. Devant l'importance du phénomène, de plus en plus de chercheurs tentent d'élucider les différents mécanismes qui conduisent au dépérissement. Ce document présente le compte rendu de l'atelier sur le dépérissement dans les érablières tenu à Saint-Hyacinthe les 23 et 24 février 1989. Cet atelier visait à augmenter la concertation entre les chercheurs et à diffuser l'information aux intervenants du milieu acéricole sur les travaux effectués dans le domaine.

The Atlantic Canada Opportunities Agency : the action and cooperation programs

by G. Beaumier. Ottawa : Library of Parliament, Research Branch, 1991. 17 p. Bibliogr. (Background paper ; BP-282E) *French ed. (L'Agence de promotion économique...) on the same fiche.* ISBN 0-660-14571-5
MICROLOG 93-01846 1 fiche

In 1987, the Atlantic Canada Opportunities Agency (ACOA) set out to pursue four main activities known as the four pillars of ACOA: advocacy of Atlantic Canadian interests at the federal level, coordination of federal programs and policies in the region; the promotion of cooperation among all participants in the region's economy; and the promotion of business actions that develop economic opportunities. Though all four activities had been carried out by that government before the creation of the Agency, only the Action Program and the Cooperation Program have readily comparable antecedents. This paper examines the performance of the Action and Cooperation programs, and compares it with earlier efforts.

The Atlantic environmental resource directory, 1989 : a directory of non-profit environmental and development organizations in Atlantic Canada

by L.L. Cuthbertson. Fredericton : Atlantic Environmental Network, 1989. 94 p. *At head of title: Open the doors to environmental and development issues in Atlantic Canada.* ISBN 1-921924-00-3
MICROLOG 93-02726 2 fiche

This directory lists 161 non-profit groups in the Atlantic region, along with contacts for the environmental networks across the country and in New England and appropriate federal and provincial offices in Atlantic Canada. The directory was compiled from questionnaires sent out to a list of contacts that were on an original mailing list of groups known to have taken stands on environmental issues in the past. Follow-up mailouts and phone calls were also made. As well, some contacts were discovered through word-of-mouth. Groups are listed alphabetically by province and are classified by subjects. Information includes address and phone number, contact, date formed, number of members, scope, language and objectives. Groups and resources are indexed by subject area and groups are listed by resources available, environmental networks, Eastern states-United States citizen groups, labour unions, federal and provincial government

Atlas canadien des glaces de mer basé sur l'imagerie d'un système de détection en hyperfréquences, juillet 1987 à juin 1990

par E. LeDrew...et al. Ottawa : Environnement Canada ; Agence spatiale canadienne, 1992 xiv, 80 p. : cartes géogr. Bibliogr. (Etudes climatologiques ; no 44) *Bilingue (Canadian sea ice atlas).* ISSN 0068-7715 ISBN 0-660-57966-9
MICROLOG 93-04522 1 fiche

Cet Atlas regroupe des cartes des glaces de mer dans l'hémisphère Nord réalisées à partir des données recueillies par la génération actuelle de capteurs à hyperfréquences passives - le Special Sensor Microwave Imager (SSM/I) - du Defense Meteorological Satellite Program de l'aviation américaine. Le document présente également un survol des éventuels liens de processus entre la glace de mer, l'atmosphère et l'océan, liens qui peuvent donner une idée de l'importance mondiale des régions polaires. Il illustre les différents types de glace de mer. En outre, on y explique les principales de la télédétection en hyperfréquences et la manière dont on peut déduire les caractéristiques de la glace de mer des données hyperfréquences. Pour certaines régions du Canada, on effectue des comparaisons entre l'évolution saisonnière de la glace de mer et des observations climatologiques particulières.

Atmospheric parameters influencing the rate and type of ice build-up on energized insulators

by M. Farzaneh, S. Xie and J.-F. Drapeau Montreal : Canadian Electrical Association, 1992. 12 p. ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06065 1 fiche

The accumulation of ice and wet snow on electrical lines sometimes leads to the interruption of electricity due to mechanical damages, conductor gapping or insulator flashover. Mechanical damages due to excessive ice or snow accumulation and also interruptions caused by conductor galloping are well-known to line designers and taken into consideration when designing lines. Contrary to this, the effect of ice and wet snow on the withstand voltage of outdoor insulators is less known. A systematic study of ice accretion on energized insulators was undertaken jointly by the Université du Québec à Chicoutimi (UQAC) and the Institut de recherche d'Hydro-Québec (IREQ). One of the objectives of the joint project was the simulation of atmospheric conditions favouring the accumulation of artificial ice similar to that accreted under natural conditions. This paper reports the results of the study and suggests the most severe conditions relating to the highest probability of flashover on ice-covered insulators.

An Attainable version of high literacy : approaches to teaching higher-order skills in reading and writing

by C. Bereiter and M. Scardamalia. Toronto : Ontario Institute for Studies in Education, 1986. 32 p. Bibliogr. *ONTERIS: ON04729.*
MICROLOG 93-00618 1 fiche

Aims to make 'high literacy' attainable by the majority of students through proposed new models of curriculum and instruction. 3 teaching models are presented: an exercise model, a knowledge base model, and an intentional learning model. The latter teaches problem-solving strategies, self-regulatory procedures, executive structures, and intentional learning procedures: all higher order skills that emerge as consistently distinguishing the more from the less competent readers and writers. School environments would function like learned professions, involving teachers and students in a continual growth in literacy. In such an environment, teachers would teach the higher-order cognitive skills, as well as learn, and students would support one another's learning efforts, thereby fostering a kind of 'professionalism' among themselves.

The Attainment of ambient water quality objectives in 1990

Victoria : B.C. Environment, Water Management Division, Water Quality Branch, 1991. vi, 204 p. : maps.
MICROLOG 93-04987 3 fiche

The task of setting water quality objectives in priority basins in British Columbia began in mid-1982. By the end of 1990, water quality objectives had been set for 30 bodies of water throughout the province. Monitoring to check the attainment of objectives began annually in 1987. This report presents the results of monitoring conducted in 1990 to check the attainment of objectives in water basins in Vancouver Island, Skeena, Northern and Southern Interior, Kootenay, and the Lower Mainland.

Attention to music experiences needed at grade 7 and 8

by S. Reid. Toronto : Ontario Educational Research Council, 1992. 18 p. Bibliogr. *Paper presented at Ontario Educational Research Council annual conference. ONTERIS: ON06153.*
MICROLOG 93-05955 1 fiche

Expands on the conjecture that experiencing is the way that we learn about life, and that learning by doing is the best way for the young musician. Gives answers to the questions 'What experiences in music meet the needs of the adolescent learner?' and 'What are the best ways for our students to experience music so that they can perceive music and respond fully?' Students must first listen to many varieties of music (including music relevant and familiar to them). And students must also perform in choirs, bands, operettas and the like. They should also create new sounds and music, as far as possible. The paper ends with further suggestions toward implementing a music program with an experimental foundation, including the necessity for music to be an integral part of the learning experience.

Atténuation sonore de projets routiers et qualité de vie : dimension spatio-temporelle

par G. Ouimet. Hull, Québec : Conseil canadien de la recherche sur l'évaluation environnementale, 1992. 34 p. : ill. Bibliogr. (Rapport manuscrit ; MR11-92)
MICROLOG 93-05375 1 fiche

Cette recherche s'attarde précisément aux écrans acoustiques installés en bordure d'autoroute, à leur impact sur les populations riveraines et plus éloignées. L'effet de la présence ou de l'absence d'un écran acoustique sur la qualité de vie des résidents est évaluée ainsi que l'acceptation sociale dont il est l'objet. Ce rapport porte sur ces questions et se penche particulièrement sur l'historique de la construction de l'écran de l'autoroute des Laurentides et la méthodologie.

An Automatic graphical procedure for rapid evaluation of interlaboratory studies : report

by S.S. Selliah. Toronto : Environment Ontario, 1992. 40 p. : ill. Bibliogr. ISBN 0-7729-9894-9
MICROLOG 93-01811 1 fiche

With the increased use of analytical data from multiple sources, contributing laboratories are encouraged to participate in as many interlaboratory studies as possible to ensure data quality and comparability. It becomes necessary to develop techniques that minimize the analytical workload, provide rapid, comprehensive evaluation, and present the study findings in a form that is easily understood by all participants. This report describes a graphical procedure that requires only two samples to be analyzed by each participant, is automated, and each participant is able to visualize their performance. The method can also distinguish between different types of errors and identify possible causes of error seen in laboratories not performing satisfactorily. The report also identifies possible remedial action for the different types of errors and discusses the historical background and theory, the various trigonometric calculations, operational instructions, and listings and explanations of the computer programs.

Automobile spare parts : an overview of the market : Guatemala

Guatemala, Guatemala : Canadian Embassy, Trade Division, 1991. 20 p.
MICROLOG 93-02167 1 fiche

Automobile spare parts are all those components of a vehicle, such as moter-mechanical, chassis or electrical, which by implication, at one time or another need to be replaced to insure the satisfactory overall performance of an automobile or truck. This survey analyzes the market with a view to increasing the participation of Canadian manufacturers in a sector that offers very good potential and in which they traditionally have had very limited success. It provides a brief analysis of the short and long term potential emphasizing the perspectives and problems Canadian exporters might encounter and also recommends the best strategy for market penetration.

L'Avenir de l'agriculture durable

par S. Dakers. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992. 33 p. Bibliogr. (Etude générale ; BP-290F) *L'éd. anglaise (Sustainable agriculture : future dimensions) sur la même fiche.* ISBN 0-660-93846-4
MICROLOG 93-01773 1 fiche

L'agriculture durable est-elle une philosophie, un mode d'agriculture ou une stratégie de gestion? Les trois termes ont été utilisés tour à tour pour la désigner, et chacun donne un éclairage qui contribue à expliquer cette notion multidimensionnelle complexe. Etant donné qu'aucune définition n'a rallié tous les suffrages, il est évident que l'expression revêt un sens différent pour différentes personnes. Ce document se penche sur la question et examine principalement: les ressources naturelles; les pratiques agricoles; l'incidence des utilisations conflictuelles des terres sur l'espace agricole; le rôle du gouvernement; et, une bibliographie sélective.

Avoidance-preference reactions of rainbow trout after prolonged exposure to chromium (VI)

by I. Anestis. Hull, Que. : Canadian Environmental Assessment Research Council, 1986. 25 p. : ill. Bibliogr. (Manuscript report ; MR1-86)
MICROLOG 93-05313 1 fiche

Avoidance-preference reactions were studied in rainbow trout pre-exposed for 7-20 weeks to potassium dichromate solutions ranging from 0.01-3.0 mg/l as CR(VI). Experiments were performed in an hydraulic channel partly divided along its length and at a flow depth of 30 cm, combining steep and shallow gradient characteristics. This report provides the results of the tests.

Avoine nue : production et alimentation animale

par V.D. Burrows...et al. Ottawa : Agriculture Canada, 1993. 22 p. : ill. *L'éd. anglaise (Production and feeding...) sur la même fiche.*
ISBN 0-662-97996-6
MICROLOG 93-07152 1 fiche

Les cultivars courants d'avoine vêtue ont une écale assez épaisse. Cette dernière recouvre le grain proprement dit et continue d'y adhérer après le battage. En revanche, les cultivars d'avoine nue qui sont moins connus ont une écale mince comme du papier qui se détache de l'amande au moment du battage. Le rapport décrit la production de l'avoine nue, les cultivars, l'alimentation des volailles et des porcs, recommandations, et perspectives d'avenir.

En première partie du rapport se trouve une revue technique des principaux cycles de PACA. Cette revue vise à familiariser le lecteur avec les systèmes à absorption et à faciliter la compréhension du reste du rapport. La section qui suit résume l'état actuel de la technologie. Cette section est séparée en deux parties. La première traite des systèmes présentement sur le marché tandis que la seconde couvre les systèmes en phase de R et D. La partie suivante est consacrée aux principaux groupes de R et D dans le monde et à leurs activités. Les coordonnées des personnes qui ont été rencontrées sont données dans l'annexe A. Il y a ensuite une section qui donne un aperçu des utilisations existantes des PACA au niveau mondial. Finalement, des recommandations sont faites sur l'orientation du programme de R et D canadien.

on Unit 1 showed that the average weighted efficiency for the unit was below the specified value, modifications were made but no improvement was shown, so the unit was left to continue operating. Studies into improving the performance of the turbines were reactivated in 1988 and a preliminary assessment showed that turbine upgrading was likely to be economic. Phase II of the study documented the performance and usage of the existing equipment; identified expected improvements in performance due to the possible replacement and modifications to the existing equipment; estimated the costs and benefits of the project and undertook an economic analysis of the proposed upgrading; and developed and justified a plan of implementing of the upgrading project. This paper describes the results of the Phase II study.

B.C. Hydro Control Centre Redevelopment Project

by J.P. Thomson. Montreal : Canadian Electrical Association, Telecontrol and Telecommunications Section, 1992. 22 p. : ill. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06222 1 fiche

In December 1988 British Columbia Hydro embarked on a redevelopment of its system control centre and two of its five area control centres. The project is scheduled for completion at the end of 1993. An overview is presented of the project with emphasis on its unique technical features and project organization and management issues for this type of redevelopment project. The System Control Centre will comprise supervisory control and data acquistion (SCADA), automatic generation control, and energy management system functions, while some of the the area control centres will include SCADA or backup automated generation control capability. Redevelopment requirements, B.C. Hydro's remote control structure, control backup philosophy, control functionality, and project planning and implementation are discussed.

B.C. Hydro's distribution automation plans

by R.E. Nielsen. Montreal : Canadian Electrical Association, Engineering and Operating Division, Telecontrol and Telecommunications Section, Data, Automation and Control Subsection, 1992. 9 p. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06218 1 fiche

British Columbia Hydro owns and operates an extensive 12 kilovolt and 25 kilovolt distribution system. In 1990 the Customer Service Group realized that in order to increase operating efficiency, improve reliability, and to satisfy corporate goals, a strategic program was needed to develop plans for distribution automation, and a multi-disciplined project team was assembled to analyze distribution automation and control. The results of a high level cost-benefit study are presented. Distribution automation and control functions and impact areas, communications systems, functions and scenarios, and ranges of benefit/cost ratio are discussed. These results will be used to develop the requirements for pilot projects which will demonstrate optimum scenarios.

Backfill alternatives in Ontario mines

Falconbridge Limited. Sudbury, Ont. : The Corportion, 1990. 2 v. : ill. Bibliogr. *At head of title: Canada-Ontario Mineral Development Agreement. Contents: Vol 1 : Report -- vol. 2 : Appendices. CANMET contract: 23440-6-9011-01-SQ.*
MICROLOG 93-01522 12 fiche

Project to determine the relative merits of various backfilling alternatives, including high modulus fill, to underground stability in mining a massive ore deposit; and to establish general engineering specifications for a range of high quality, low placement cost backfills applicable to the bulk mining of rich ore bodies. The report includes a review of backfill engineering principles and some simple design methods. A series of site visits were conducted to various mines in Ontario and Quebec to review the current state of backfilling operations in Canadian mines. A laboratory centrifuge at Queens University was used to develop design specifications for innovative techniques that have some potential to reduce fill costs, including reinforcement with geotextiles and the placement of layered and sloped wall fill. An investigation of the potential of monolithic packing systems

commonly used in coal and soft rock mining and an extensive series of laboratory strength tests were conducted. In situ monitoring and instrumentation is included as a series of case studies as well as case studies of previous backfill instrumentation by Falconbridge and Kidd Creek Mines.

Backfill study for direct embedment of tubular steel poles

by H.S. Radhakrishna. Toronto : Ontario Hydro, Research Division, 1992. i, 23 p. : ill. (Report ; no. 91-287-K)
MICROLOG 93-02980 1 fiche

Tubular poles of weathering steel are proposed for 115kV and 230kV circuits as an alternative to wood poles and lattice steel structures. The poles are embedded in a 0.8-1.0 m diameter hole, with the annular space between the pole and the augered hole filled with a suitable backfill. A field study was carried out at Ontario Hydro's construction yard just east of the Milton Transformer Station to improve the state-of-the-art backfilling and to develop specifications for the backfilling. The study evaluated a range of commonly used granular backfills and excavated soil for their compactability and mechanical properties such as strength and deformability; assessed the compactive effort required for each backfill of lift thickness and compaction time per layer; the benefit of adding cement to granular backfills; and the practicality of a compactionless method of pole embedment. This report describes the results of the field trials and assessment of different backfills and backfilling procedures.

Background document on the development of the draft petroleum refining sector effluent limits regulation

Ontario. Water Resources Branch. Toronto : The Branch, 1992. x, 155 p. Bibliogr.
ISBN 0-7778-0049-7
MICROLOG 93-01593 3 fiche

In 1986, the Ontario Ministry of the Environment (MOE) announced the Municipal-Industrial Strategy for Abatement (MISA) whose ultimate goal is the virtual elimination of persistent toxic contaminants from all discharges into Ontario's waterways. Under the first phase, dischargers were required to monitor and report on the contaminants present in their effluent streams. The second phase developed effluent compliance limits through a consultative process involving MOE, Environment Canada and industry. This document describes the steps involved in the development of limits and contains the background technical information used.

Background information on refrigerator/freezer test methods and field tests

by M.T. Wong. Toronto : Ontario Hydro, Research Division, 1992. 8 p. Bibliogr. (Report ; no. 92-100-K)
MICROLOG 93-02931 1 fiche

Refrigerators/freezers constitute the largest segment, or about 25% of the 6000 kW.h/yr used for appliances and lighting in a typical household. There is a potential for substantial energy savings. Design changes suggest a possible 46% reduction from the baseline consumption. However, do present laboratory tests properly assess these changes? A project co-funded by CEA and Ontario Hydro has been initiated to answer this question, develop an improved method if necessary, and test innovative models.

La Balance des paiements -- Rév.

par F. Poschmann. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992. 14 p. : ill. Bibliogr. (Bulletin d'actualité ; 86-

10F) *Révisé le 29 octobre 1992. L'éd. anglaise (Balance of payments) sur la même fiche* ISBN 0-660-94143-0
MICROLOG 93-06754 1 fiche

L'évolution de la balance des paiements est d'actualité parce qu'il s'agit d'une mesure de la performance commerciale du Canada sur le plan international, qui a des répercussions sur les marchés des changes. Aussi, la balance des paiements influe sur la façon dont l'économie du pays est perçue sur la scène internationale. Elle constitue un compte rendu de toutes les opérations commerciales entre le Canada et le reste du monde pendant une année donnée et elle indique si le pays possède assez de devises pour faire face à tous ses engagements envers l'étranger. Ce document se penche sur le contexte et l'analyse de la balance des paiements y inclus sa composition et l'évolution de la situation. Il se termine avec une description des mesures parlementaires, la chronologie des résultats et des tableaux statistiques sectoraux.

Balancing work and family responsibilities : discussion paper

Toronto : United Food and Commercial Workers Union ; Ontario Women's Directorate, 1992. 17, 17 p. *Bilingual (L'Equilibre entre le travail et...). A joint Change Agent Project.*
MICROLOG 93-00299 1 fiche

This document specifies what a family is. It addresses the question of whether balancing work and family responsibilities is a women's issue or a workplace issue. It argues that change is needed in several areas affecting the family. It identifies these areas as childcare; maternity/paternity leave; family leave; eldercare; reduced work week; variable work-schedule options; easing the problems of injured workers; coping with stress, protecting programmes; and awareness of changing family roles. It also identifies ways the union can respond to the challenges of coping with family, work and union responsibilities.

Balsam fir Christmas tree needle retention versus timing of bud flush

Truro, N.S. : Dept. of Natural Resources, Forestry Branch, Forest Research Section, 1992. 8 p. : ill. Bibliogr. (Forest research report ; no. 41)
MICROLOG 93-06582 1 fiche

To enhance the quality and growth of Christmas trees, the Christmas Tree Council of Nova Scotia began a program to select genetically superior balsam fir trees for seed orchard development. One phase of the program involves the selection of trees with late flushing buds. Since there is a concern that late flushers might exhibit poor post-harvest needle retention, a study of harvested early and late flushing balsam fir Christmas trees was carried out in 1991/92 to determine if bud flush time is related to needle retention. This note provides the results of the study.

MICROLOG 93-00754 1 fiche

The Bankruptcy Act is a commercial statute which provides for the orderly and equitable distribution of the assets of an insolvent person amongst her or his creditors. The present Act dates back to 1949. In 1988, the Department of Consumer and Corporate Affairs published proposed revisions to eight key areas of the Bankruptcy Act. And on 13 June 1991, Bill C-22, containing the proposed Wage Claim Payment Act and amendments to the Bankruptcy Act was introduced in the House of Commons. Many of the proposals put forward in the bill are based upon the reforms suggested by the Department in 1988. This paper presents the reform proposals in Bill C-22.

Bark Lake area (NTS 41J/NE), districts of Algoma and Sudbury

by D.F. VanDine. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1980. iii, 12 p. : map. Bibliogr. (Northern Ontario engineering geology terrain study ; 93) *Fold. map not filmed.* ISSN 0709-4671 ISBN 0-7743-4369-9
MICROLOG 93-03077 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Bark Lake area, districts of Algoma and Sudbury. Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In fall 1977, roads in the area were traversed and observed terrain conditions recorded as further verification of the office studies. The report describes the geological setting and engineering terrain units, including bedrock, moraine, glaciofluvial, glaciolacustrine, alluvial, and organic landforms.

Baromètre 1992 : rapport des indicateurs de la pauvreté des enfants, Campagne 2000

par D.S. Hubka. Ottawa : Conseil canadien de développement social, Centre de statistiques internationales sur le bien-être social et économique des familles et des enfants, 1992. 42, 42 p. : ill. Bibliogr. *Bilingual (Countdown 92 : Campaign 2000...). CSI 22562.200.*
MICROLOG 93-06509 1 fiche (Available on fiche only)

Campagne 2000 a été instaurée afin que la pauvreté des familles et des enfants soit une priorité des pouvoirs publics, que les gouvernements soient tenus responsables, qu'on élabore de nouvelles politiques, qu'on informe, et qu'on crée un vaste mouvement d'action en vue d'éliminer ce fléau du Canada. Il est un projet national d'éducation et d'action social sans orientation politique, qui vise la mise en oeuvre de la résolution tripartite prise par la Chambre des communes en vue d'éliminer la pauvreté chez les enfants au Canada d'ici l'an 2000. Ce rapport fait progresse la mission de Campagne 2000, de mieux faire connaître au public la situation de la pauvreté infantile.

Barrage sur la rivière Oldman : rapport

Commission d'évaluation environnementale du barrage sur la rivière Oldman (Canada). Hull, Québec : Bureau fédéral d'examen des évaluations environnementales, 1992. i, 56 p. : ill. Bibliogr. (Processus fédéral d'évaluation et d'examen en matière d'environnement ; 42) *L'éd. anglaise (Oldman River dam : report) : 93-04843/1.* ISBN 0-662-19562-6
MICROLOG 93-04842 1 fiche

L'examen environnemental du barrage sur la rivière Oldman s'est déroulé de novembre 1990 à avril 1992. Il a été effectué dans le but d'évaluer le concept et la sureté du barrage proposé, et de se pencher sur l'importance des impacts environnementaux et socio-économiques éventuels du barrage proposé et de son exploitation, ainsi que sur les possibilités d'atténuer ces impacts. Il vise également à présenter des recommandations. Bien que le rapport examine de nombreux impacts environnementaux et socio-économiques, il considère principalement les impacts sur les pêches, la faune et les écosystèmes forestiers riverains ainsi que les impacts sur la bande indienne des Piégans.

Barrier-free design guide -- Rev.

Edmonton : Alberta Labour, Client Services Division, Technical Services, 1993. 81 p. : ill.
MICROLOG 93-07226 1 fiche

This guide outlines the minimum building requirements for persons with disabilities. It is based on the 1990 Alberta Building Code which is reviewed and revised every 5 years. The Code outlines the requirements for a broad range of building occupancy classifications where it is expected that facilities normally used by the public would also be used by persons with disabilities. It presents information on general design considerations, site development, circulation, public facilities, communication, and general information and residential requirements.

La Base de données canadienne : les patients détenus aux termes d'un mandat du lieutenant-gouverneur

par S. Hodgins et C.D. Webster. Ottawa : Ministère de la Justice, Sous-direction de la recherche et du développement, Section de la recherche, 1992. v, 12 p. Bibliogr. (Document de travail , WD1992-6f) *L'éd. anglaise (The Canadian database : patients held on...) sur la même fiche.*
MICROLOG 93-08143 1 fiche

Les tentatives antérieures visant à rassembler des données étaient limitées du fait que les commissions fournissaient des renseignements tirés de systèmes ayant des caractéristiques particulières et convenant mal à la recherche. Ce projet a compilé systématiquement des données sur chacun des cas assujettis à un mandat du Lieutenant-Gouverneur au cours d'un délai de 3 ans. La base de données a été conçue de manière à permettre l'étude des modifications prévues des règles de droit. Les données citées dans ce document répondent à 3 critères: elles sont systématiques et fiables, elles permettent une étude au cours d'une période de 3 années consécutives, et elles fournissent les données de base nécessaires permettant d'étudier à l'avenir les conséquences des nouvelles réformes législatives. On traite du nombre de patients assujettis à un mandat; le roulement; les troubles psychiatriques et la gravité des crimes répertoriés; le temps que les patients sont assujettis et le pourcentage de ce délai passé à l'hôpital; les facteurs diffèrent selon les provinces quant aux caractéristiques des patients assujettis; les rapports entre le diagnostic, le crime et la durée de la détention; l'évolution des caractéristiques de la population assujettie au cours de la période, et, sont les commissions conformées à leurs obligations?

Baseline monitoring of mountain whitefish *Prosopium williamsoni* from the Columbia River system near Castlegar, British Columbia : health, contaminants and biology

by D.E. Boyle...et al. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, West Vancouver Laboratory, 1992. x, 120 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1883) *CSI 21105.508.* ISSN 0706-6457
MICROLOG 93-06407 2 fiche

In January 1991, adult mountain whitefish were collected from two sites on the Columbia River downstream of the Celgar bleached kraft pulp mill (at Genelle and below Trail) and at two reference sites on the Kootenay River (Brilliant Reservoir and Kootenay Lake at Balfour). All retained fish were measured in the field for gross internal and external abnormalities and gill, kidney, spleen, and pyloric caeca tissue samples were collected from each fish for bacteriological, virological, and histological examination. Detailed methods for these and other analyses are given. Twenty- two fish caught at Genelle and 26 fish from Brilliant Reservoir fish were selected for enzymatic and contaminant studies. Age and sex were determined for each of the fish.

A number of deterministic methods are presently used to assess spinning reserve requirement in interconnected generating systems. The emphasis when using a deterministic approach to unit commitment and spinning reserve assessment is to minimise the total operating cost and in doing so a system faces different degrees of risk throughout the day. A probabilistic approach can be used to recognize the stochastic nature of system components and to incorporate them in a consistent allocation of spinning reserves between the pool members. This paper illustrates the basic aspects of a probabilistic technique designated as the Two Risks Concept which can be utilized to assess spinning reserve requirements in interconnected generating systems. The technique is developed on the basis of each area in a multi-area configuration fulfilling 2 different risk criteria.

The Beads from Fort Lennox, Quebec

by K. Karklins. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1978. 212 p. : ill., maps. Bibliogr. (History and archaeology ; 20) *Bound with: The Archaeology of Fort Lennox, Ile-aux-Noix, Quebec, 1964 season.* ISSN 0225-0101 ISBN 0-660-01673-7
MICROLOG 93-03697 3 fiche

The collection of beads from Fort Lennox, Quebec, is composed of eight glass and non-glass necklace beads, as well as 231 small embroidery beads which form a beaded garniture. These specimens represent nine distinct types. The beads were recovered from the Navy barracks, the shipwrights' hut, and the extant men's barracks. None of the beads are distinctive enough to be useful as chronological indicators. This document presents information on drawn glass beads, wound glass beads, and non-glass beads. It provides a discussion of the collection.

Beaufort Sea extreme waves study

by B.M. Eid and V.J. Cardone. Ottawa : Environmental Studies Research Funds, 1992. x, 268 p. : ill., maps. Bibliogr. (Environmental Studies Research Funds report ; no. 114) ISBN 0-921652-13-5
MICROLOG 93-04909 3 fiche

This study developed new and definitive estimates of the extreme wave climate in the Canadian Beaufort Sea, with emphasis on offshore exploration areas in deep and shallow water. The hindcast approach used included assembly of a comprehensive data base of archived meteorological, wave, and ice cover data; identification and ranking of historical storm occurrences during the potential open-water season, over as long a period as allowed by the data and selection of a top-ranked severe wave generating storm population (30 storms); adaptation and validation of accurate numerical hindcasting procedures to specify time histories of surface wind fields, wave fields, and directional spectra in each hindcast storm; hindcast production of the selected storms; and statistical analysis of hindcast extremes at a selected number of model grid points. The ODGP spectral ocean wave model, as adapted recently to shallow water and a variable ice edge, was used for the wave hindcasts. Wind fields were calculated from the sea surface pressure fields using a proven marine planetary boundary layer model.

Beaufort Sea ice design criteria : acquisition of data on EIFs

Canatec Consultants Ltd. Ottawa : Environmental Studies Research Funds, 1992. xiii, 149 p. : ill., maps. Bibliogr. (Environmental Studies Research Funds report ; no. 115) ISBN 0-921652-15-1
MICROLOG 93-03469 2 fiche

An extreme ice feature (EIF) is defined as something that causes extreme design loads on an offshore production platform (greater than 300,000 tonnes). This project developed an extreme EIF data base using data from the STAR-1 and STAR-2 Synthetic Aperture Radar (SAR) systems and other available remotely sensed data, and, if possible, identified the means of continuing the data base in the future. Statistical analyses were carried out on the EIF data obtained and an estimate made of the impact rate of EIFs against structures in the Southern Beaufort Sea.

Behaviour of Bruce NGS-A fuel irradiated to a burnup of [about] 500 MWh/kgU

by M.R. Floyd...et al. Chalk River, Ont. : Atomic Energy of Canada Limited, Chalk River Laboratories, 1992. 16 p. : ill. Bibliogr. *At head of title: AECL research. Presented at the Third International Conference on CANDU Fuel.* ISSN 0067-0367 ISBN 0-660-14785-8
MICROLOG 93-03866 1 fiche

Fuel elements from three fuel bundles discharged from Bruce Nuclear Generating Station A at burnups of 478-518 MWh/kgU were examined in the Hot-Cell Facilities at Chalk River Laboratories to establish defect causes, fission-gas release and grain growth, dimensional behaviour, sheath-deuterium pickup, and CANLUB behaviour and oxidation of the sheath and fuel. This report gives the results of the examination.

Behavioural approaches to injury prevention

by P.A. Hader. Montreal : Canadian Electrical Association, Engineering and Operating Division, Health and Safety Section, 1993. 8 p. Bibliogr. *Presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05153 1 fiche

Safety has typically been managed by analysis of accidents and accident statistics and then developing rules, procedure, policies, and programs all aimed at prevention of future accidents. This approach is problematic because it depends on a small database and it is reactive. The behavioural approach to safety management is a process for continuous improvement in safe work performance. This document presents an overview of how this approach is being installed in a utility and the results achieved to date.

Belledune Generating Station status report

by E. Rivenbark and C. Hickman. Montreal : Canadian Electrical Association, Thermal and Nuclear Power Section, 1991. 9 p. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06249 1 fiche

The design and construction of the first 450 megawatt unit of the 900 megawatt coal-fired Belledune generating station project is reviewed. This will be the first utility generating station in Canada to come into service with a flue gas desulphurization system. Features of environmental significance are highlighted, with particular emphasis on sulfur dioxide emissions control using the flue gas desulphurization system. The role of the new station in New Brunswicks's sulphur dioxide control strategy is defined, including a related sulphate deposition monitoring program and supplemental control programs, and fuel delivery and handling and freshwater supplies are discussed.

Benchmarking Ontario's benchmarks

by C. Suurtamm. Toronto : Ontario Educational Research Council, 1992. 21 p. Bibliogr *Paper presented at the OERC Conference ONTERIS: ON06063*
MICROLOG 93-02035 1 fiche

Assesses the boards' definition of 'benchmarks'. The provincial benchmarks are designed to address the accountability of the province for the system of education provided by the Ministry of Education. Benchmarks are to be used to assess both individual students' achievements and educational programs. At the Toronto Board of Education, a benchmark constitutes a holistic evaluation with very specific criteria to guide a teacher's assessment. It gives a teacher a point of reference defined by student achievement. Benchmarks have been developed for language arts and mathematics for grades 3, 6 and 8 and teachers have access to the benchmark library of videotapes and print. The North York board uses the word 'learning outcomes' as direct statements of what students are expected to know and the word 'benchmark' to measure or describe student learning. Suggested methods to measure these outcomes include teacher observation, checklists, student journals, rating scales, self-report inventories and tests. The Ottawa board has developed a computerization of benchmarks to keep a profile on each student.

Beneficiation of silica sands, phase I : overview of 'high tech' markets for Saskatchewan silica sand

I.M.D. Laboratories Ltd. Barrie, Ont. : The Company, 1992. 22 p. *CANMET contract: 23440-1-9173-01-SQ.*
MICROLOG 93-08326 1 fiche

This overview covers Saskatchewan silica resources in the form of naturally occurring, round-grain sands as opposed to quartz or quartzite. The study reviews all resources, then focuses on high- technology uses. It describes the geological environment for current commercial sources, the end-use high-technology process; major consumers of high purity silica sand in North America; major producers of encapsulating and potting compounds in North America; other world markets; major suppliers to North American and international markets, specifications for high purity silica products, and trends.

Beneficiation of silica sands, phase II : detailed processing tests on composited samples from four silica sand deposits in the Province of Saskatchewan and their potential in 'high tech' and other industrial applications for silica sand

I.M.D. Laboratories Ltd. Barrie, Ont. : The Company, 1993. 56 p. *CANMET contract. 23440-1-9173/01-SQ*
MICROLOG 93-08328 1 fiche

Outline of results obtained in Phase II of a study into the high-technology use of silica sand deposits in the province of Saskatchewan. Phase II examined a range of beneficiation processes that could be used singly or in combination to upgrade the sands from Hanson Lake, Red Deer, Red Deer Bluff, and Nipekamew River to the best chemical purity possible. The effect of each of the processes on improving chemical purity was examined sequentially, and the end product purity of the beneficiated sands compared with commercially available silica sands used in various industrial applications, emphasizing potential utilization in high technology products. Processed samples were analyzed using X-ray fluorescence or by the induced coupled plasma technique. Atomic absorption was used for some elements.

Benefit-cost analysis of a decision support system for ATC during thunderstorms

for Transportation Development Centre, Policy and Coordination, Transport Canada ; by Romi Singh. Montreal : Aviation Planning Services, 1990. vii, 111 p. : ill., maps. Bibliogr.
MICROLOG 93-04646 2 fiche

Thunderstorms are disruptive and expensive for airport operations. Making the best use of available capacity in bad weather depends not only on the ability to forecast the space available for aircraft movements, but also on the air traffic controllers' ability to integrate the forecast information into a dynamic operational plan. This study examined the costs and benefits of a decision support system (DSS) that could be used by air traffic controllers during thunderstorms, with Pearson International Airport in Toronto, Ontario as a focus. Work included a review of the literature and of current predictive models, preliminary investigations of approaches to the development of a DSS, and a benefit-cost analysis of such a system. The tracks of storms and their areas of influence were obtained from doppler radar for three days in July 1989. Aircraft movement, control centre staffing, and other relevant operations during this period were also documented and analyzed.

Benthos and bottom sediment field collections, Upper Athabasca River, April to May 1992

R L & L Environmental Services. Edmonton : Northern River Basins Study, 1993. iii, 43 p. : ill. Bibliogr. (Northern River Basins Study project report ; no. 2) ISSN 1192-3571 ISBN 0-662-20009-8
MICROLOG 93-07236 1 fiche

The Northern River Basins Study was initiated through the Canada-Alberta-Northwest Territories Agreement Respecting the Peace-Athabasca-Slave River Basin Study, signed in September 1991. The study was conducted to characterize the cumulative effects of pulp mill development on the water and aquatic environment of the study area by coordinating with existing programs and undertaking appropriate new technical studies. This report provides the results of a pilot project to obtain samples of benthic aquatic macroinvertebrates, epilithon (algae, bacteria, and fungi that cover stones in the aquatic system), and sediments from six sites in the Athabasca River. The samples were analyzed for organic contaminants (dioxins, furans, chlorophenols, and PCBs), resin acids, metals (arsenic, vanadium, copper, chromium, lead, zinc, and methyl mercury) and stable isotopes (carbon, nitrogen, sulphur). Quantitative samples of aquatic invertebrates were also collected to document differences among sites in species composition, numeric density, and other relevant population or community characteristics.

Better use of nitrogen for barley under zero tillage

by S.S. Malhi and M. Nyborg. Ottawa : Agriculture Canada, Research Branch, 1993. v, 6 p. Bibliogr. (Technical bulletin ; 1993-2E) ISBN 0-662-20281-3
MICROLOG 93-07240 1 fiche

It is now known that zero tillage increases organic matter in soil, improves soil tilth, and conserves water. It also has lower labour, fuel, and machinery requirements, and is one of the most effective measures for preventing soil erosion. Zero tillage consistently produced lower barley yield than conventional tillage when nitrogen fertilizer was broadcast, so field experiments were conducted in central and north-central Alberta on Gray Luvisol and Black Chernozem soils to determine the reasons for the lower yields and to investigate methods to reduce the yield gap between zero and conventional tillage. This bulletin reports the results of those experiments.

Bias due to selective dichotomization of multilevel exposure classes in risk analysis studies

by S.B. Peralta. Toronto : Ontario Hydro, Research Division, 1992. 14 p. Bibliogr. (Report ; no. 92-50-K)
MICROLOG 93-02916 1 fiche

General equations are developed for odds and risk ratio calculation in risk analysis studies with multilevel exposure metrics, specifically for the four-level Wertheimer-Leeper code used in electromagnetic field health studies. For an m-level code there are m-1 ways of categorizing subjects as exposed or unexposed, this dichotomization may be biased to maximize (or minimize) the risk parameter. This is illustrated using Monte Carlo simulations of health data. Results vary depending upon the dichotomy used, indications of increased risk, decreased risk, window effects, and inverse window effects are obtained, reflecting the range of conflicting results found in present-day electromagnetic field research.

Bibliography of New Brunswick geology, 1839 to 1988

by L.R. Fyffe and D.M. Blair. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1989. ii, 225 p. (Geoscience report ; 89-3) ISSN 0838-2565
MICROLOG 93-04400 3 fiche

This bibliography incorporates references to the geoscientific literature accumulated over the past 150 years. The 2,800 entries include approximately 1,400 references from the earlier 1969 edition, as well as references to the post-1969 literature. Federal and provincial government reports and papers from geoscientific and technical journals compose the majority of entries, but theses, field guides, consultant reports, and articles from books and newspapers are also listed. Abstracts are not included. Each entry provides information on author, year of publication, title of article, source, and page numbers. Items are listed alphabetically by author.

Bibliography of the history of Quebec and Canada, 1981-85

by P. Aubin and L.-M. Côté. Quebec : Institut québécois de recherche sur la culture, 1990. 2 v. *Citations are in English or French (Bibliographie de l'histoire du Québec...).*
ISBN 2-89224-142-1
MICROLOG 93-07011 23 fiche

This volume of the Bibliography of the history of Quebec and Canada encompasses close to 29,000 entries. Virtually everything is included here from prehistory to philately, and where titles wer omitted from the previous volumes, they have been included in this one. Judgments regarding importance or scientific value have been purposely avoided and the choice has been restrained to writings with a diachronic perspective in any field of human past. All titles appear in the systematic section, which is composed of 6 main subdivisions (general history, prehistory, ethnohistory, explorations, Eurocanadian occupation, demographic and genealogical repertoires) with further divisions by subject areas. Other sections provide access by keywords not already used, authorship and the index of terms used. An annex provides the list of over 800 periodicals where were consulted in the preparation of this document.

Bilan 1991 : accidents, parc automobile, permis de conduire

Québec : Société de l'assurance automobile du Québec, 1992. 185 p. : ill. *Sur la couv.: Dossier statistique CSI 67171.201.* ISSN 0829-2264 ISBN 2-550-26919-2
MICROLOG 93-04524 2 fiche

Le Bilan 1991 porte sur les accidents de véhicules routiers, les victimes, les titulaires de permis de conduire et les véhicules en circulation. Il présente le même type de renseignements statistiques que les publications antérieures, et cela sur une période de cinq ans, retenant ainsi l'élément continuité dans les productions statistiques. Il est composé de deux grandes parties. La première brosse un tableau des principaux faits saillants de l'année 1991 et de l'évolution au cours des années 1987-91. La seconde partie du Bilan rassemble l'ensemble des tableaux statistiques et des graphiques. Elle est divisée en deux sections: la première regroupe les statistiques sur le phénomène des accidents de véhicules routiers et la deuxième section porte sur les titulaires de permis de conduire et les véhicules en circulation. Chaque section débute avec des renseignements généraux afin de faciliter la compréhension des données.

Biochemical genetic stock identification of chum salmon in southern British Columbia, 1988, and update, 1985-87

by L. Hop Wo...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, South Coast Division, 1989. vii, 22 p. (Canadian data report of fisheries and aquatic sciences ; no. 749) ISSN 0706-6465
MICROLOG 93-06123 1 fiche

Genetic variability among chum salmon stocks has been used to identify the origins of chum salmon since 1981, with a genetic stock identification (GSI) program now occurring on every major chum fishery in Southern British Columbia. This report includes GSI procedures and results for the 1988 fishing season and re-analyzes the 1985-87 data due to Canada and the United States establishing a common baseline for these three years. The 1988 Johnstone Strait fishery intercepted mainly Fraser River and Johnstone and Georgia Strait returning chum stocks. The mid- Vancouver Island, Nanaimo, and Nitinat terminal fisheries were dominated by stock returning to their respective areas. A total of 6,056 chum salmon were analyzed for genetic variability over two months.

Biological characteristics of coastal populations of sockeye salmon *(Oncorhynchus nerka)* in British Columbia

by D.T. Rutherford...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, 1992. vii, 47 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1849) ISSN 0706-6457
MICROLOG 93-00918 1 fiche

Mature sockeye salmon inhabiting 28 lakes along the British Columbia coast were examined to document variation in life histories and biological characteristics that might prove useful as markers for stock identification. Characteristics examined include length and age at maturity, age at smolting, scale patterns, prevalence of the myxosporean parasite *Myxobolus arcticus* and allele frequencies at up to 32 loci. Where possible, inferences are made about the biology and productivity of these coastal populations by considering their life histories and rates of growth in fresh water, especially in comparison to sockeye from Shuswap Lake in the Fraser River.

Biological control of the Russian wheat aphid in Saskatchewan : final report

by J. Doane. Regina : Saskatchewan Agriculture Development Fund, 1991. viii, 83 p. : ill. Bibliogr. • ISSN 0829-9455
MICROLOG 93-08352 1 fiche

The Russian wheat aphid was first detected in Saskatchewan in late summer 1988, lightly infesting winter cereals in southwestern Saskatchewan. In 1989 and 1990, weekly surveys were conducted in spring wheat fields and field borders in two areas of southern Saskatchewan to collect cereal aphids and their natural enemies, and to monitor for the Russian wheat aphid. In 1990, cereal aphid populations and associated predators at three widely separated locations in the province were compared and collections of aphids attacked by parasites were conducted whenever they were encountered in grain fields. Importations of two species of a predatory fly were made from Yugoslavia and the U.S.S.R. and were released in the province in August 1991 into grain fields infested with the English grain aphid and the bird-cherry oat aphid. Releases of two species of ladybird beetles of European origin but established in eastern Canada and the U.S. were made near Pike Lake and Saskatoon.

Biological test method : acute test for sediment toxicity using marine or estuarine amphipods

Ottawa : Environment Canada, Conservation and Protection, Environmental Protection Service, 1992. xxiii, 83 p. : ill. Bibliogr. (Report ; EPS 1/RM/26) *French ed. (Méthode d'essai biologique : essai de toxicité ..) : 93-04850/2.*
ISBN 0-662-20429-8
MICROLOG 93-05485 2 fiche

This report describes the methods recommended by Environment Canada for performing static 10-day tests for sediment toxicity, using one or more species of marine or estuarine sediment-burrowing amphipods. General or universal conditions and procedures are outlined for preparing for and undertaking the test. Additional conditions and procedures are stipulated that are specific to the intended use of the test, such as assessment of samples of field-collected sediment, sludge or other solid waste, or chemical introduced to sediment. Included are instructions on collecting, identifying, and transporting test organisms; sorting and handling procedures; holding and acclimation conditions; sample transport and storage; test facility requirements; procedures for preparing test sediments and test initiation; specified test conditions; appropriate observations and measurements; endpoints; methods of calculation; the use of reference toxicants; and test validation.

Biological test method : toxicity test using luminescent bacteria *Photobacterium, phosphoreum*

Ottawa . Environment Canada, Environmental Protection Service, 1992. xxii, 61 p. Bibliogr. (Report ; EPS 1/LL/24) *French ed. (Méthode d'essai biologique...) : 93-04125/1.* ISBN 0-662-20379-8
MICROLOG 93-04126 1 fiche

Description of methods recommended by Environment Canada for performing toxicity tests with the luminescent bacterium *Photobacterium phosphoreum*. General conditions and procedures are outlined for testing a variety of substances. Additional conditions and procedures are stipulated that are specific for assessing samples of chemical, effluent, leachate, elutriate, receiving water, and sediment or other solids such as soil. Included are instructions on sample handling and storage, test facility requirements, procedures for preparing test solutions and initiating tests, specified test conditions, appropriate observations and measurements, endpoints, methods of calculation, and the use of reference toxicants.

Biophysical criteria for shellfish culture in British Columbia : a site capability evaluation system

by S.F. Cross and B.C. Kingzett. Courtenay, B.C. : Ministry of Agriculture, Fisheries and Food, Aquaculture and Commercial Fisheries Branch, 1992. iv, 56 p. : ill. Bibliogr. ISBN 0-7718-9332-9
MICROLOG 93-04732 1 fiche

This document presents a set of shellfish biophysical criteria that are appropriate for a general evaluation of the capability of a potential beach or off-bottom (deep-water) site for the culture of Pacific oyster, Japanese scallop, and Manila clam. The report discusses the environmental variables important in the selection of a site for the biological requirements of each species. A numerical criteria system is developed that provides the basis upon which areas can be categorized for probable culture capability using tolerances and optima for each species. An example of how the system may be used in an evaluation of site capability is presented and the limitations and subjectivity of the proposed assessment approach are discussed.

Biophysical resources of the East Kootenay area, vol. two : vegetation groups and types

by E.C. Lea. Victoria : British Columbia. Ministry of Environment, 1989. xxii, 297 p. : ill. Bibliogr. (MOE technical report ; 5)
ISSN 0821-0942 ISBN 0-7718-9062-1
MICROLOG 93-00523 4 fiche

As part of a biophysical reconnaissance inventory of the southern rocky Mountain Trench and the adjacent Rocky Mountains within B.C., the vegetation, its successional stages, and its relationships with climate, soils and other landscape characteristics was studied. The vegetation was sampled in over 1000 releves and information on soils, terrain, and topography was recorded. For 80 of these releves, soils were analyzed in detail in the laboratory. The vegetation was classified for forest regions, sections, zones, subzones, and vegetation types. The study area is located mainly within the dry interior region and includes parts of the interior wet belt region. The report describes 138 vegetation types, climax and serial communities, and discusses the function of soils, terrain, local climate, and other characteristics in the ecosystem. The role of each vegetation type in succession is discussed and resource values and constraints to use are determined for each type.

Bis(2-chloroethyl) ether

Ottawa : Health and Welfare Canada ; Environment Canada, 1993. v, 15 p. Bibliogr. (Priority substances list assessment report)
At head of title: Canadian Environmental Protection Act. French ed. (Oxyde de bis(2-chloroéthyle)) on the same fiche. ISBN 0-662-20378-X
MICROLOG 93-06667 1 fiche

The Canadian Environmental Protection Act requires the federal Minister of the Environment and the federal Minister of National Health and Welfare to prepare and publish a Priority Substances List that identifies substances, including chemicals, groups of chemicals, effluents, and wastes that may be harmful to the environment or constitute a danger to human health. The Act requires both Ministers to assess these substances and determine whether they are toxic. The assessment of whether bis(2-chloroethyl) ether (BCEE) is toxic was based on the determination of whether it enters or is likely to enter the Canadian environment in a concentration or quantities or under conditions that could lead to exposure of humans or other biota to levels that could cause harmful effects. Data gathered indicated that BCEE is not currently used or produced in Canada. This organic compound can be formed as a by-product in some industrial processes and was reported at measurable concentrations in in-plant industrial effluents at two industrial facilities in southern Ontario.

Boiler blowdown toxicity reduction tests

by D.W. Rodgers. Toronto : Ontario Hydro, Research Division, 1992. iv, 6 p. Bibliogr. (Report ; no. 92-211-K)
MICROLOG 93-04394 1 fiche

Boiler blowdown effluent from both nuclear and thermal stations was often toxic to fish and *Daphnia magna* in toxicity tests conducted during Phase 1 of the provincial Municipal Industrial Sewage Abatement Program (MISA) program. Two samples of boiler blowdown were supplied by Bruce Nuclear Generating Station A and Lakeview Thermal Generating Station following standard MISA collection protocols. Acute toxicity tests were conducted with rainbow trout and D. magna. For all samples, duplicate toxicity tests were conducted on 80 L subsamples of untreated boiler blowdown and 80 L subsamples of boiler blowdown to which a sufficient quantity of a 1 M solution calcium chloride had been added to increase the hardness to 100 mg/L CaCO3. For all samples other than the 18 November samples from Bruce A, duplicate 80 L samples were recirculated for 12-16 hours over a limestone/biological filter. As positive controls, both rainbow trout and D. magna were tested in 100 percent deionized water. Results of toxicity tests were entered and LC50 calculated using OME's programs.

Bottom trawl survey of young-of-the-year lingcod *Ophiodon elongatus* in the Strait of Georgia by the R/V *Caligus*, June 15 - August 3, 1991

by G.D. Workman, K.L. Yamanaka and L.J Richards. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1992. iv, 35 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2167) ISSN 0706-6473
MICROLOG 93-03487 1 fiche

Lingcod stocks in the Strait of Georgia, British Columbia have declined for the past two decades. With the closure of the commercial fishery in 1990, commercial catch and effort data are no longer available for the Strait of Georgia for stock assessments. This study was conducted in the nearshore waters along the east coast of Vancouver Island from Sidney to Comox to survey young-of-the-year lingcod.

Bracke seeding rate trial : fifth year results

by R.G. Sidders. Thunder Bay, Ont. : Ministry of Natural Resources, Northwest Region Science and Technology, 1993. iv, 19 p. : ill. Bibliogr. (Technical report ; no. 72)
MICROLOG 93-06464 1 fiche

This study tested five Bracke seeding rates (5, 10, 17, 28, and 38 viable seeds per scalp with a control of 0 seeds) to determine which would attain optimal area stocking and seedling density after five years for jack pine. The trial was established north of Thunder Bay during the fall 1983. The area was seeded using a two-row, four-mattock Bracke. The blocks were assessed in fall 1984, 1985, 1986, and 1988. Data collected included number and condition of scalps, number of stocked scalps, and number

Brainstorming Workshop : improving the section's effectiveness within the organization

Brainstorming Workshop (1991 . Toronto, Ont.). Toronto : Ontario Hydro, Research Division, 1992. i, 18 p. (Report ; no. 92-124-K)
MICROLOG 93-02905 1 fiche

In response to the changing priorities within Ontario Hydro that had led to a reduction in the volume of traditional work, Mechanical Testing and Development Section organized a one-day brainstorming workshop on Wednesday, December 4, 1991, to discuss ways in which the Section could adapt to their new environment. The workshop was split into a morning and afternoon session. This report contains the results of discussion from all the groups, as an Appendix, and a description of the general discussion from the afternoon session. Also included is a list of six major recommendations derived from discussion with the group leaders and some comments on implementation.

Breaking down the barriers : report

Ontario. Human Resources Secretariat. Employment Systems Review Taskforce. Toronto : The Task Force, 1991. 45 p.
MICROLOG 93-01435 1 fiche

Last fall, two Employment Systems Reviews (ESR) were piloted. An ESR identifies barriers to employment opportunities for people from designated employment equity groups--women, racial minorities, people with disabilities, francophones, and native people, by identifying problems with employment systems--hiring, training, promotion, and the like. This document provides key recommendations concerning the elimination of barriers. It includes additional recommendations by employment system. It discusses implementation and monitoring plans and contains recommendations by date of implementation and area of responsibility.

Breeding low anthocyanogen barley for Saskatchewan : final report

by Y.A. Hormis...et al. Regina : Saskatchewan Agriculture Development Fund, 1992. 94 p. Bibliogr. *CSI 72228.208.*
MICROLOG 93-06783 1 fiche

The final report on research to breed proanthocyanidin-free (ant-minus) lines of two-rowed malting barley for Saskatchewan conditions. A known property of many proanthrocyanidins is their ability, in conjunction with proteins, to produce haze in beer. Criteria included good malting quality, strong straw, resistance to prevalent diseases, earliness, and drought resistance. New crosses, F1, F2, F3, F4 and F5 generation, ant-minus preliminary yield tests, standard yield tests, eastern prairie barley tests, and a Pd.D. thesis comparing normal and ant-free genotypes are presented.

Breeding waterfowl surveys in the Liard Plain and Teslin River basin, northern British Columbia, 1989

by W.A.C. Nixon and J. Majiski. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1991. vi, 32 p. Bibliogr. (Technical report series ; no. 150) ISSN 0831-6481 ISBN 0-662-19533-7
MICROLOG 93-01765 1 fiche

In spring 1989, a survey of breeding waterfowl was begun to estimate populations in selected areas of northwest British Columbia and to determine the species composition of waterfowl breeding in these areas. Two study areas were chosen to represent boreal forest wetlands between 600m and 800m elevation, south of Teslin Lake in the headwaters of the Teslin River and southwest of Watson Lake in the Liard Plain. This technical report contains a brief review of survey methodologies and the results of the breeding pair surveys conducted in northwest B.C. Total numbers and mean number of birds per wetland are presented for total birds observed as well as for indicated pairs. Breeding population estimates for the two study areas are also given.

Bridging the gap between the Rayleigh and Thomson limits for various convex bodies

by G.R. Fournier and B.T.N. Evans. Ottawa : Defence Research Establishment Valcartier, 1993. v, 26 p. : ill. Bibliogr. (DREV report ; R-4692/93)
MICROLOG 93-04516 1 fiche

Any complex military system or scenario that involves electro-optical devices requires understanding the propagation of radiation through natural aerosols and smokes/obscurants Given present and future electro-optical capabilities of fire-control systems, full spectrum obscurants will be required as effective countermeasures. The most efficient obscurants generally require that the obscuring particles be made from highly refractive materials such as metals. This work considers the calculation of the extinction efficiency from small, non-spherical particles. The report first demonstrates a transform that bridges the gap for spheres and infinite cylinders and generalizes to other convex bodies when a Rayleigh or Thomson-like series can be obtained. The report presents the results of a comparison between the newly obtained series and the exact codes for spheres and spheroids.

Brighter futures : Canada's action plan for children

Ottawa : Government of Canada, 1992. 47 p. *French ed. (Grandir ensemble : plan d'action...) : 93-03284/1.* ISBN 0-662-19574-4
MICROLOG 93-03285 1 fiche

This document provides background information on the lives of children in Canada and the changing social environment that is affecting them. It discusses the eight goals that relate to Canada's children: children's rights, their healthy growth and development, the status of women and girls in society, the role of the family, the plight of children in difficult circumstances, education, and the environment. It looks at how Canada's programs of aid to developing countries address those eight goals and the two others set by the Summit leaders: protecting children in conflict zones and reducing world poverty. Finally it outlines the actions Canada has taken since the World Summit and those it will take in the future to achieve the Summit's goals.

British Columbia earthquake response plan : interim

Victoria : Ministry of Attorney General, Provincial Emergency Program, 1992. x, 99 p. ISBN 0-7718-9317-5
MICROLOG 93-02956 2 fiche

This plan describes the responsibilities, organization, and concept of operations necessary for emergency response to a major earthquake in British Columbia. It is designed to react to the most serious subduction earthquake which has been forecast, and which would affect the Southwestern coastal regions of the province where more than half of the population lives. A smaller earthquake, whose damage could be more localized, is also the concern of this plan. The basic premise of this plan is that local governments remain responsible for managing and conducting their own emergency operations.

British Columbia mineral output : statistical summary, 1980-92

Victoria . Ministry of Energy, Mines and Petroleum Resources, Mineral Policy Branch, Mineral Statistics Section, 1993. ii, 25 p
MICROLOG 93-07310 1 fiche

This publication updates a series of provincial statistics on British Columbia's mineral industry production dating back to the 1800s. Its focus is mainly historical and it summarizes annual data for the most recent 12-year period, 1980-92. Estimates of 1992 are included in some tables to make the data as timely as possible. The data cover major active mineral and coal mines, highlights of 1991 and 1992, solid mineral production and value; major metal production, markets, sales, and value; metal and coal prices; coal production, markets, and values; and employment

British Columbia seabird colony inventory, report no. 1 : east coast Moresby Island

by M.S. Rodway, M.J.F. Lemon and G.W. Kaiser. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1988. xiii, 276 p. : maps. Bibliogr. (Technical report series ; no. 50) ISSN 0831-6481 ISBN 0-662-16564-0
MICROLOG 93-00185 4 fiche

Seabird colonies along the east coast of Moresby Island were surveyed from 1982-86 as part of the B.C. Seabird Colony Inventory Program to establish baseline estimates of breeding seabird populations using standardized survey techniques to allow future comparisons and monitoring of those populations. Total or partial counts were performed on all colonies of surface nesting species, and on small storm-petrel and alcid colonies. On large colonies of burrow nesting species, distribution and total numbers of burrows were determined using systematically spaced quadrats. Burrow occupancy rates were determined with a variety of sampling schemes on large alcid colonies but were not determined on storm-petrel or small alcid colonies. This report presents detailed survey methods and results for each island.

Broom and gorse in British Columbia : a forestry perspective problem analysis

by K. Zielke...et al. Victoria : Ministry of Forests, 1992. v, 19 p. : ill. Bibliogr. *At head of title: Silviculture.* ISBN 0-7718-9275-6
MICROLOG 93-00891 1 fiche

Broom, an erect deciduous shrub, and gorse, a similar evergreen shrub with spines, were introduced to British Columbia many years ago and have now spread to become competitors with crop trees on some forest sites. This report investigates the presence of the two shrubs as competing species, their impact on crop trees and other non-forest resources and their control. The investigation consisted of a literature review of foreign studies (especially New Zealand) and telephone interviews of B.C. foresters, biologists and other experts in the field. Experience from elsewhere was compared to the perceptions and experiences of practitioners in B.C.

Bruce B NGS 1992 vacuum building outage : inspection of vacuum building roof seal replacement

by R.J. Lewak. Toronto : Ontario Hydro, Research Division, 1992. iii, 31 p. : ill. (Report ; no. 92-181-K)
MICROLOG 93-04377 1 fiche

Description of the replacement of the Bruce Nuclear Generating Station B Vacuum Building roof seal during the May 1992 vacuum building outage. During the replacement, inspections were performed of the procedure and a visual inspection was made of the old roof seal and the new polyester fabric reinforced silicone rubber roof seal. Hardness measurements were taken of points on the old roof seal, including patches and splices, the new roof seal including the splice, and samples of new roof seal material that will be installed both internally and externally to the vacuum building. The replacement procedure as well as the surface of the new and old roof seal was videotaped for future reference.

Bruce NGS B, 1992 outage vacuum building inspection of concrete

by E.J. McColm. Toronto : Ontario Hydro, Research Division, 1992. i, 55 p. : ill. (Report ; no. 92-175-K)
MICROLOG 93-04380 1 fiche

The concrete of the Bruce Nuclear Generating Station B vacuum building was inspected during the station outage in May 1992. The inspection consisted of visual inspection, nondestructive testing, and limited concrete coring to expose reinforcing steel for examination and half-cell potential measurements. Inspection activities were performed while the building was under vacuum, at atmospheric pressure, and undergoing pressure and douse tests. Locations inspected in 1981 and 1982 as part of pre-commissioning activities were re-examined to determine whether or not changes had occurred in the concrete over the past 10 years. This report summarizes the results of the inspection and also includes data obtained during pre-commissioning.

Bruce X Longwood television reception survey

by G.K. Hatanaka. Toronto : Ontario Hydro, Research Division, 1992. iii, 35 p. : ill. Bibliogr. (Report ; no. 92-252-K)
MICROLOG 93-04371 1 fiche

Property owners living close to a proposed 500kV transmission line route often express concern over the possible effect of the line on their television reception. These concerns are then followed by complaints of interference after the line has been built. To effectively deal with the situation on the Bruce Nuclear Power Development X Longwood Transformer Station transmission line route, it was decided to compare before and after conditions to give a reasonable evaluation of the line impact Measurements were performed at 19 committed owner sites and six additional sites along the transmission line route. The before survey was conducted from 24 November 1987 to 8 June 1989 and the after survey was performed from 27 February 1991 to 25 July 1991. This report summarizes the results of the measurements and assesses the impact of the transmission line television reception.

The Buchan-Leacock transition years survey, 1990-91

by C.R. Turner. Scarborough, Ont. : Scarborough Board of Education, Program Dept., Research Centre, 1991. vi, 153 p. (Research report ; no. 90/91-08) *ONTERIS: ON05880*
MICROLOG 93-00338 2 fiche

The Buchan-Leacock Transition Years Pilot Project, initiated by the Scarborough Board, was designed to last for at least 2 years, with the 1st year (1990-1991) focusing on the planning of the project. A committee, of staff members from John Buchan Senior Public School and Stephen Leacock Collegiate Institute, was formed to create a framework for initiating the project in the Buchan-Leacock Schools. It worked with the research centre to create a survey for students in grades 8 and 9 which covered classroom impressions; feelings about homeroom; homework, exams and study skills; comfort at school; school personnel; and general feelings about the transition from grade 8 to grade 9. In addition, questionnaires were developed for teachers at Buchan-Leacock which asked about students' needs; teaching and evaluation strategies; homeroom; school environment; general feelings about student needs in the transition years; and feelings about Buchan-Leacock teachers' involvement in the Transition Years Pilot Project.
Questionnaires were sent to all grade 8 and 9 students and to all grade 7 through OAC teachers. The report gives the results of this survey by grade level, summarizes the findings and gives an in-depth look at survey responses.

Budget des dépenses 1993-94, partie I : plan de dépenses du gouvernement

Canada. Ministère des finances. Ottawa : Approvisionnements et services Canada, Groupe communication Canada, Edition, 1993. 75, 73 p. *Bilingue (1993-94 estimates...government...). CSI 21104.012* ISBN 0-660-57985-5
MICROLOG 93-04950 2 fiche

Le Budget des dépenses indique au Parlement le niveau et la nature des dépenses prévues par le gouvernement fédéral pour l'exercice à venir. Il a pour objet de renseigner les députés, à qui il incombe de comprendre et d'évaluer les prévisions de dépenses et de demander des comptes au gouvernement. Cette 1re partie fournit au Parlement un aperçu des prévisions qu'elle situe dans le contexte du cadre des dépenses globales. Les éléments suivants sont inclus dans le document: un aperçu du plan de dépenses, le plan de dépenses par enveloppe, les dépenses par catégorie de paiement, les budgets de fonctionnement et la budgétisation axée sur la rentabilité, et les initiatives de gestion.

Budget des dépenses 1993-94, partie II : budget des dépenses principal

Canada. Ministère des finances. Ottawa : Approvisionnements et services Canada, Groupe communication Canada, Edition, 1993. v, 390, v, 372 p. *Bilingue (1993-94 estimates...main...). CSI 21104.013*
MICROLOG 93-04939 9 fiche

Le Budget des dépenses indique au Parlement le niveau et la nature des dépenses prévues par le gouvernement fédéral pour l'exercice à venir. Il a pour objet de renseigner les députés, à qui il incombe de comprendre et d'évaluer les prévisions de dépenses et de demander des comptes au gouvernement. Cette 2e partie comprend la présentation du Budget des dépenses principal pour chacun des ministères et des organismes gouvernementaux. La présentation de chaque programme se compose de quatre sections: objectifs, tableau d'activité, paiements de transfert, et fonds renouvelable. Un index complète le document.

MICROLOG 93-04635 4 fiche

Les titres de la troisième partie du budget contiennent des détails pour chaque ministère et programme et fournissent de plus amples renseignements sur les coûts. On présente les autorisations pour 1993 94 et l'emploi des autorisations en 1991-92. Pour chaque programme, on présente les points saillants des plans pour 1993-94 et un sommaire des besoins financiers; les points saillants du rendement récent, et un examen des résultats financiers. On décrit le mandat, l'objectif et l'organisation des programmes et services, et on donne une perspective de planification qui explique les facteurs externes qui influent sur chaque programme, les initiatives et l'efficacité. On analyse chaque activité et programme en présentant les dépenses relatives détaillées. Les renseignements supplémentaires présentés donne un aperçu des besoins financiers par article et détails des besoins en personnel, par groupe professionnel.

Le Budget fédéral de 1992 : un commentaire

par M.G. Wrobel. Ottawa : Bibliothèque du Parlement, Service de recherche, 1992. 10, 9 p. (Etude générale ; BP-288F) *Bilingue (The 1992 federal budget...).* ISBN 0-660-93844-8
MICROLOG 93-01817 1 fiche

Le 25 février 1992, le ministre des Finances, l'honorable Don Mazankowski, a déposé son premier budget à la Chambre des communes. Ce budget, comme celui de 1991, a fait l'objet de certaines critiques. Cette étude présente quelques commentaires sur le budget fédéral de 1992. Elle aborde les nouvelles initiatives financières, les recettes, les dépenses, la situation financière, et les effets de la récession.

Building commitment for change : a focus on school leadership : final report for year two of the research project : implementing the primary program

principal investigators: Kenneth Leithwood and Byron Dart ; research associates: Doris Jantzi and Rosanne Steinbach. Victoria : Ministry of Education, 1991. i, 186 p. Bibliogr.
MICROLOG 93-06868 3 fiche

This document discusses the process of primary program implementation. It looks at a model of the policy implementation process, and a quantitative and qualitative test of the model. It also discusses school leadership and the primary program. It focuses on different orientations of school leader to primary program implementation and the consequences for schools; variations in how school leaders solve primary program implementation problems by themselves, and in collaboration with teachers; and transformational leadership. It provides a summary and recommendations.

The Burrard utilization study report : review and analysis of the future role of Burrard Thermal Generating Station

Vancouver, B.C. : BC Hydro, 1993. 24 p. : ill. ISBN 0-7726-1800-3
MICROLOG 93-06951 1 fiche

In April 1991, B.C. Hydro established a multi-disciplinary project team to conduct an in-depth study of the Burrard Thermal Generating Station and to make a set of recommendations on its future. In November 1992, the Burrard Utilization Study Team completed its work and submitted its report to Hydro management. It was found that the vast majority of the public had little knowledge of the plant, although those that did know about it were very interested in its future. This document is part of B.C. Hydro's response to the need for information. It describes the role of the plant in the system and its relationship to Lower Mainland air quality; the options for bringing NOx emissions into line with public targets, along with other environmental issues; and provides a financial analysis of the options.

Cadre de référence pour le plan quinquennal d'investissements universitaires, 1992-97

Québec : Gouvernement du Québec, Ministère de l'enseignement supérieur et de la science, Direction générale de l'enseignement et de la recherche universitaires, 1992. 64 p. *CSI 67323.007.* ISBN 2-550-26687-0
MICROLOG 93-06696 2 fiche

Ce document a pour objet de présenter le cadre de référence qui a permis l'élaboration du plan quinquennal d'investissements universitaires pour les années à venir, lequel doit être approuvé par le gouvernement conformément à la loi sur les investissements universitaires. Le document comprend trois sections. La première présente le contexte général dans lequel le plan quinquennal est préparé. La deuxième présente les différentes composantes du plan ainsi que les formules de calcul qui permettent de déterminer les montants alloués à chaque composante. Quant à la dernière section, elle résume l'essentiel de la contribution totale du ministère de l'Enseignement supérieur et de la Science et des autres sources de financement en matière d'investissements universitaires pour la période quinquennale et pour l'année fiscale.

Le Cahier d'idées amélioré : liens entre la categorie de sexe, la culture, les sciences et les écoles

Ottawa : Fédération canadienne des enseignantes et des enseignants ; Toronto : Direction générale de la condition féminine de l'Ontario, 1992. 140 p. Bibliogr. *L'éd anglaise (The Better idea book...) : 93-03181/2.* ISBN 0-88989-263-6
MICROLOG 93-08175 2 fiche

Dans la première partie de ce document on définit et commente les idées principales qui façonnent l'intérêt national pour les jeunes filles et les SMT, on essaie de voir dans quelle mesure cet intérêt s'inscrit dans d'autres intérêts et on démontre qu'il est nécessaire de traiter la question des SMT dans un contexte général dans lequel l'expérience des femmes est prise en compte. La partie suivante présente des critiques de l'étude des SMT avec, en toile de fond d'autres aspects de la question du sexisme en milieu scolaire. Dans la quatrième partie, on résume trois études canadiennes et une américaine portant sur les adolescents, puis on examine leurs conséquences pour l'enseignement dispensé aux jeunes femmes. Dans la cinquième partie, on étudie les limites des tests en tant qu'indicateurs de réussite et on présente un aperçu des préoccupations à l'égard des préjugés existes dans les tests. Au sixième chapitre, on revient sur l'argument de l'impératif économique dans les mesures visant l'enseignement des SMT et on analyse les répercussions de l'étude des mathématiques, des sciences et des techniques au niveau postsecondaire. Le septième chapitre est l'amorce d'un débat qui doit être poursuivi par le corps enseignant et par les autres éducateurs. Finalement, le huitième chapitre résume les conclusions les plus importantes du document, et donne quelques conseils pour changer les choses.

Caisse de métro de type grand gabarit : étude conceptuelle, phase II

par A.G. Fontaine. Québec : Gouvernement du Québec, Ministère des transports ; Ottawa : Transports Canada, 1990. xxiii, 70 p. : ill. (Etudes et recherches en transports) (Technologie et instrumentation) ISBN 2-550-26160-7
MICROLOG 93-03561 2 fiche

Ce rapport résume le travail accompli au cours de la phase II du projet. Il relate différentes étapes qui ont permis d'en arriver à la fabrication du chaudron d'une caisse de voiture de métro de type grand gabarit faite principalement en acier inoxydable. Il est aussi question des essais sur banc qui ont permis de tirer des conclusions afin de diminuer le poids et d'augmenter la rigidité de la caisse en torsion, améliorations qui pourront être apportées lors d'une éventuelle fabrication en série. Le rapport se divise en sept sections. Dans l'introduction, il est question des objectifs, de la nature des travaux effectués et de l'organisation générale. La section 2 concerne spécifiquement la conception de la caisse, faite notamment par CAO. Dans la section sur l'analyse structurale on explique les buts et la méthode employée. La section 4 présente l'outillage. Les sections suivantes traitent de la fabrication de l'assemblage ainsi que des essais structuraux sur banc. Finalement, en plus des améliorations qui pourront être apportées à la caisse comme telle, on souligne l'importance de projets de ce genre qui contribuent à développer l'expertise technique afin que l'industrie québécoise soit en mesure de compétitionner sur le marché international.

Calstock area (NTS 42F/NE), districts of Algoma and Cochrane

by D.F. McQuay. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1980. iv, 18 p. : maps. Bibliogr. (Northern Ontario engineering geology terrain study ; 30) *Fold. maps not filmed.* ISSN 0709-4671 ISBN 0-7743-4306-0
MICROLOG 93-02315 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Calstock area, districts of Algoma and Cochrane. Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In summer 1978, roads in the area were traversed and observed terrain conditions recorded as further verification of office studies. The report describes the geological setting and engineering terrain units, including bedrock, moraine, glaciofluvial, glaciolacustrine, alluvial and organic landforms. An example of a derived map giving terrain conditions for general construction is included.

Cameron Falls GS concrete condition survey

by E.J. McColm. Toronto : Ontario Hydro, Research Division, 1992. ii, 56 p : ill (Report ; no. 91-242-K)
MICROLOG 93-02978 1 fiche

An investigation was undertaken from 8-19 July 1991 to evaluate the condition of the concrete at Cameron Falls Generating Station. The investigation consisted of a review of construction records, visual observation, concrete coring, in situ nondestructive testing, and laboratory testing of specimens prepared from the concrete cores. Selected core holes were also examined visually with a borehole camera. As part of the laboratory work, the concrete was petrographically examined. This report summarizes the results of the investigation.

Ottawa : le Commissaire, 1992. 112, 86 p. : ill. *Bilingue. CSI 22195.001.* ISBN 0-662-59183-6
MICROLOG 93-00010 3 fiche

Ce rapport porte principalement sur la Loi sur la protection des renseignements personnels. Cette loi donne aux individus accès à leurs renseignements personnels détenus par le gouvernement fédéral; protège la vie privée des individus en restreignant le nombre des personnes qui peuvent consulter les renseignements; et donne aux individus un certain contrôle sur la collecte et l'usage des renseignements par le gouvernement. Ce document en explique le mandat et fournit de l'information sur la Division des plaintes, la Direction de l'observation et la gestion, ainsi qu'un organigramme. Il traite des questions suivantes: la protection de la vie privée par la Charte, les secteurs des banques et des télécommunications, le secteur privé, la vie privée au travail, le dépistage génétique, et la perfection de la loi.

Canada. Forestry Canada. Pacific and Yukon Region : Annual program review 1992-93

Victoria : The Region, 1993. 24 p. : ill.
CSI 22519.002.
MICROLOG 93-08589 1 fiche

In fulfilling its mission to promote the sustainable development and competitiveness of Canada's forest sector, the Pacific and Yukon Region of Forestry Canada has six strategic objectives. The first one is to help protect the forests of British Columbia and the Yukon from insects, disease attacks and wildfire; secondly, to develop technical solutions and build knowledge on sustainable forestry and the third objective is to survey and deliver applied programs within areas of our substantial expertise. Connecting British Columbia and Yukon forestry with emerging high-tech and new science solutions is the fourth objective; the fifth one is to manage targeted federal forestry programs on a sustainable basis. Finally, the sixth objective is to help British Columbia and Yukon forestry decision-makers connect with the domestic and international agendas by gathering and disseminating market and industry intelligence. This report examines the programs in place to meet all six objectives.

CSI 22145.001. ISBN 0-662-59401-0
MICROLOG 93-03793 1 fiche

L'Office a pour tâche d'enquêter sur les prix des produits de pêche et, s'il y a lieu, de recommander des mesures déjà prévues par la Loi en cas de chute des prix. Essentiellement, les mesures législatives servent à protéger les pêcheurs de baisses trop rapides de prix et des pertes de revenus qui s'ensuivent, baisses dont les causes échappent au contrôle des pêcheurs ou des producteurs. Ce rapport annuel fournit des informations sur la situation de l'industrie canadienne de la

Canada's immigration program -- Rev.

by M. Young. Ottawa : Library of Parliament, Research Branch, 1992. 35 p. (Background paper ; BP-190E) *Revised July, 1992. French ed. (Le Programme canadien d'immigration) on the same fiche.* ISBN 0-660-14908-7
MICROLOG 93-07439 1 fiche

As immigration levels have increased since 1985, criticism has begun to be heard that Canada's capacity to integrate new arrivals might have been surpassed. At the same time attention has focused on the stresses and strains placed on the former refugee status determination system. This paper describes the foundation of Canada's immigration program as outlined in the Immigration Act, setting immigration levels, categories of immigrants including humanitarian immigration (refugees and refugee-like situations) and business immigrants, the role of the provinces in immigration, settlement, and visitor visas. Appendices provide relevant statistical information and a list of countries whose citizens require visas to enter Canada as visitors.

Canada's mineral taxation system compared -- Rev.

Ottawa : Intergovernmental Working Group on the Mineral Industry, Government/Industry Task Force, 1992. xiii, 93 p. (Background study on the Canadian mineral investment climate ; no. 13)
MICROLOG 93-05405 2 fiche

It was agreed at the 1991 Mines Ministers' Conference in Halifax that a government/industry task force be formed to review and assess Canada's international competitiveness for mineral investment capital. This report examines the current taxation regimes applicable to mining in Canada and other mineral-producing countries; sets out significant tax changes or changes in tax policy in recent years; examines the current tax rules and recent tax changes in Canada, Australia, South Africa, Chile, and Mexico; and discusses tax issues of current concern with regard to Canada's competitiveness for mineral capital. The analysis and comparisons give some idea of the impact of taxation and recent tax changes on the relative competitiveness of the various countries studied. Finally, the appendices include summary comparisons of Canada with Australia, South Africa, Chile, Mexico, Zimbabwe, Indonesia, and Bolivia.

Canada's productivity performance

by P.S. Rao and T. Lemprière. Ottawa : Canada Communication Group, Publishing, 1992. ix, 69 p. : ill. *French ed. (L'Evolution de la productivité canadienne) : 93-03689/1. CSI 22191.200.* ISBN 0-660-14668-1
MICROLOG 93-03688 1 fiche

This study discuses issues and problems associated with international productivity and real income comparisons. It reviews the trends in Canada's productivity and the trends in Canada's labour productivity and real income performance, relative to other G-7 countries with special reference to the United States. It also outlines the theoretical underpinnings of an econometric model to explain productivity growth and gives a brief summary of regression results for Canada, the United States, Japan, and West Germany. It analyzes the causes of the slowdown in Canadian productivity since 1973 using the estimated equations. In addition, it examines the reasons for Canada's poor manufacturing productivity performance relative to that of the major economies and summarizes the findings of the study.

Canada, southern Africa, and the 1990s : nourishing the roots of democracy

Ottawa : Standing Committee on External Affairs and International Trade, Sub-Committee on Development and Human Rights, 1992. xiii, 33, xiv, 35 p. : ill. Bibliogr. *Bilingual (Le Canada, l'Afrique australe et...).*
MICROLOG 93-00896 2 fiche

Events in South Africa have triggered worldwide attention. There is a widespread belief that the country has passed through a watershed in its history. Apartheid opponents' hope is that recent reforms are irreversible, and that democracy in South Africa will be a crucial element in rejuvenation throughout the region. The Sub-Committee on Development and Human Rights is compelled by Canada's staunch support for the struggle against apartheid to assess the changing situation in South and Southern Africa to determine if this hope is well-founded. This document discusses the challenge of ending apartheid, the challenges of enduring change, and policy direction and priorities in the 1990s.

Canada-U.S. electricity trade and environmental politics

by W. Averyt. Orono, ME : University of Maine, Canadian-American Center, 1992 33 p. : ill. Bibliogr. (Canadian-American public policy ; no. 12) ISSN 1047-1073 ISBN 1-882582-00-4
MICROLOG 93-03798 1 fiche (Available on fiche only)

Canadian electricity exports to the U.S. have become one of the most salient issues in Canada-U.S. relations. This essay traces recent developments in Canada-U.S. electricity trade and emphasizes major changes which have occurred since 1985. It focuses on the growth of the electricity trade, the origins of Canadian environmental review policies, electricity exports and environmental policy, the U.S. environmental policy, and ecopolitics and electricity trade. The paper concludes with a consideration of environmental issues in the United States as they affect American imports of Canadian electricity.

Canadian and worldwide mineral activities of domestic and foreign multinational mining companies : recent trends

Ottawa : Intergovernmental Working Group on the Mineral Industry, Government/Industry Task Force, 1992. vii, 55 p. : ill. (Background study on the Canadian mineral investment climate ; no. 4) *CSI 22087.204.*
MICROLOG 93-05505 1 fiche

It was agreed at the 1991 Mines Ministers' Conference in Halifax that a government/industry task force be formed to review and assess Canada's international competitiveness for mineral investment capital. This study reviews the activities of large Canadian and foreign multinational mining companies to determine their preferences for domestic and foreign mineral investment. The report analyzes a sample of nine Canadian companies, four base metal producers and five gold producers, from 1984-90, using the foreign and Canadian components of total annual revenues as indicators of recent and past investment preferences.

The Canadian Climate Program

Ottawa : Environment Canada ; Energy, Mines and Resources Canada, 1993. 31 p. : ill. *French ed. (Le Programme climatologique...) on the same fiche.* ISBN 0-662-20516-2
MICROLOG 93-06947 1 fiche

The Canadian Climate Program is a co-operative effort among federal agenies, the provinces, the academic community and the private sector. Understanding climate and its impacts requires participation of physical and biological scientists, but also of social and economic scientists. This program measures means, extremes, averages and trends in climate; advances research on the processes at work; and develops mathematical models to predict the evolution of climate for periods from months, to years and even centuries. This document describes the Program, the structure of its board, participants and committees. It also discusses the following research concerns: climatic data and applications including the greenhouse effect, research and atmosphere-ocean modelling, socio-economic impacts of climatic change, how climate relates to Canada's ecosystems, and the national action strategy and present programs.

Canadian co-operatives resource file, 1992

edited by Les McCagg. Ottawa : Co-operatives Secretariat, 1992. iii, 107, iii, 107 p. : ill. *Bilingual (Les Coopératives canadiennes, dossier...). CSI 22350.002.*
MICROLOG 93-00408 3 fiche

The purpose of this document is to keep elected and appointed officials in the federal government aware of the strength and diversity of co-operatives in Canada. It presents statistics on all sectors of the co-operative movement, including non-financial, i.e., consumer, supply, marketing, production, and service; and financial co-operatives, i.e., credit unions, caisses populaires and trust, as well as insurance co-operatives. It presents the relationship between governments and co-operatives and describes their national associations as well as co-operatives at the international level.

Canadian competitiveness : two recent studies

by T.J. Thomas. Ottawa : Library of Parliament, Research Branch, 1992. 17 p. (Background paper ; BP-286E) *French ed. (La Compétitivité du Canada...) on the same fiche.* ISBN 0-660-14577-4
MICROLOG 93-01815 1 fiche

At the end of October 1991 two studies dealing with the competitiveness of the Canadian economy were released. The first, the Porter study, was financed in part with government money; the second, the Prosperity Initiative, consisted of two papers put out by federal government departments. In recent years there has been much interest in the faltering Canadian economy. Productivity growth has been weak since the mid-seventies, and since the mid-eighties Canadian unit labour costs have soared. Unemployment has been relatively high and steady. Given this economic background, a government view of the state of Canadian competitiveness is useful. This background paper deals with the two recent studies.

The Canadian database : patients held on lieutenant-governors' warrants

by S. Hodgins and C.D. Webster. Ottawa : Dept. of Justice, Research and Development Directorate, Research Section, 1992. v, 11 p. Bibliogr. (Working document ; WD1992-6e)
French ed. (La Base de données canadienne : les patients...) on the same fiche.
MICROLOG 93-08143 1 fiche

Previous studies of the Lieutenant-Governors' Warrant system were initiated with a view to law reform. These attempts to complete cross-Canada information were limited by the fact that information was supplied from idiosyncratic systems ill-designed for research purposes. The present data are important because they are systematic and dependable, allow study of a consecutive 3 year time span, and provide the base-line data against which it will be possible in the future to consider the effects of legal reforms. The study covers the number of Warrant patients, turnover, type of psychiatric disorders and seriousness of crimes, length of time on Warrant and hospital time, factors on which provinces differ, the relationship between diagnosis and crime and length of detention, population characteristic changes over the 3 year period, and the extent to which boards have met their statutory obligations.

Canadian direct investment in western New York : an empirical analysis of the strategic characteristics of Canadian parent corporations and their U.S. subsidiaries

by A.D. MacPherson and J.E. McConnell. Buffalo, NY : State University of New York at Buffalo, Canada-United States Trade Center, 1991. 25 p. : ill. Bibliogr. (Occasional paper ; no. 10)
MICROLOG 93-03404 1 fiche

This paper examines the organizational and strategic characteristics of Canadian Corporations that control subsidiary establishments in the western New York region of the United States. It presents survey data from two interlinked inquiries. The first survey describes the nature, scale, and bilateral economic impact of recent Canadian direct investment in western New York. The second survey describes the investment motivations, expectations, and strategic intentions of Canadian parent corporations that have recently established business operations in the study region. The paper concludes with a brief research agenda for future work on the academic and policy implications behind Canadian-United States direct investment in the post free-trade era.

The Canadian federal environmental assessment and review process : an analysis of the initial assessment phase : a report

by S.M.C. Weston. Hull, Que. : Canadian Environmental Assessment Research Council, 1991. 67, 73 p. Bibliogr. *Bilingual (Le Processus d'évaluation et d'examen fédéral en...).* ISBN 0-662-58824-X
MICROLOG 93-03954 2 fiche

Environmental Impact Assessment (EIA) is a form of pre-project evaluation intended to provide a basis for deciding whether, and how, to proceed with a proposed project so as to prevent or minimize environmental degradation. The federal government introduced the Canadian Federal Environmental Assessment and Review Process (EARP) as a possible solution to environmental problems. Although EARP has influenced planning decisions to some extent, it has fallen short of original expectations. This paper presents the findings of an in-depth evaluation of the effectiveness of EARP, and assesses the effectiveness of the central element of the federal government's approach to implementing EIA requirements.

Canadian government R and D organizations in British Columbia : a survey

conducted for the Premier's Advisory Council on Science and Technology ; by STC Enterprises. Vancouver, B.C. : The Corporation, 1992. iv, 215 p.
MICROLOG 93-01225 3 fiche

This report contains the results of a survey of the 17 research organizations from seven federal government agencies with visible research and development activities in British Columbia. It first presents an overview of the area, including expenditures, comparisons, comments on the impact of the research and the industrial benefits and the regional distribution of expenditures. Activities by Agriculture Canada, Energy, Mines and Resources Canada, Environment Canada, Fisheries and Oceans Canada, Forestry Canada, National Defence, and the National Research Council are summarized, then dealt with in a more detailed format by research centre. Data was obtained by questionnaire and interviews with the heads of each of the facilities.

Canadian healthy communities project : a conceptual model for Winnipeg

by B.J. Lane. Winnipeg : University of Winnipeg, Institute of Urban Studies, 1989. ix, 114 p. Bibliogr. (Health and the community ; 1) ISBN 0-920213-68-5
MICROLOG 93-03297 2 fiche (Available on fiche only)

According to the World Health Organization, health is defined as a state of complete physical, mental, and social well-being, and not merely the absence of disease or infirmity. Viewed as such, health becomes the business of municipal government, as the level of government whose policies and decisions in physical planning and in areas such as water, waste management, transportation, and parks, have the most immediate impact on the daily lives of citizens. This report suggests a discussion structure and framework within which the requirements for a Health Communities project in Winnipeg can be accomplished, and addresses evaluation and the need for a data base to be established as part of the project.

The Canadian mineral industry in a competitive world : a report on Canada's mineral industry and the global investment climate -- Rev.

Intergovernmental Working Group on the Mineral Industry (Canada). Government/Industry Task Force. Ottawa : The Task Force, 1992. xxi, 117 p. : ill. Bibliogr. *Submitted for discussion at the Mines Ministers' Conference. French ed. (L'Industrie canadienne des minéraux face...) : 93-07610/2. CSI 22087.200*
MICROLOG 93-05501 2 fiche

To review and assess Canada's international competitiveness for attracting mineral investment, a government/industry task force was formed in September 1991. The Task Force identified a number of issues, including the recent deterioration in Canada's cost competitiveness in key commodity areas of copper and nickel; halting and reversing the decline in Canada's base-metal ore reserves; developing new ideas, technologies, policies, and programs to stimulate more effective primary exploration for new world class ore deposits; reversing the ongoing shift of interest by mineral investors away from Canada and toward the countries of Latin America, Asia Pacific, and other areas of the developing world; and creating a public policy and regulatory framework more conducive to sustaining industry viability and stimulating investment in mineral exploration and development in Canada. This report summarizes the findings and views of the Task Force, describing the economic and geological basis of the Canadian mineral industry; the international status of Canadian mining companies; worldwide competition for mineral investment; and specific areas of concern, including the environmental regulation processes, land access and security of terms, and mineral taxation.

Canadian minerals industry competitive position : trends and short term outlook

Ottawa : Intergovernmental Working Group on the Mineral Industry, Government/Industry Task Force, 1992. xii, 95 p. : ill. (Background study on the Canadian mineral investment climate ; no. 2) *CSI 22087.202.*
MICROLOG 93-05503 2 fiche

It was agreed at the 1991 Mines Ministers' Conference in Halifax that a government/industry task force be formed to review and assess Canada's international competitiveness for mineral investment capital. This study provides a review and assessment of recent domestic and global trends, developments, and issues relevant to the performance and prospects of some of Canada's metals and mineral industry. The report refers to four stages of the minerals industry that are based upon the degree of processing carried out on the products of the industry. The report covers the minerals and metals industry in the Canadian economy; recent trends and short-term outlook in selected mineral commodities; cost trends and competitive position; recent trends in financial performance and investment; corporate financial profiles of selected companies; and grassroots exploration.

This report describes the financial performance of the oil and gas industry in Canada during the first 6 months of 1992. The report is based on data from 152 companies accounting for 90 percent of total revenues of the petroleum industry. The report lists noteworthy happenings in the industry, gives highlights of the 6-month period, then details financial performance, sources and uses of funds, comparative performance with other industries, international flows of funds compared to the previous year, capital structures compared to the previous year, and gives income tax-related data for the current and previous years.

Canadian Petroleum Products Institute : Annual report 1992

Ottawa : The Institute, 1993. 18, 18 p. : ill. Bibliogr. *Bilingual. CSI 99214.001.*
MICROLOG 93-08585 1 fiche

The CPPI was created as a non-profit association of Canadian refiners and marketers of petroleum products. The Institute represents a membership of Canadian companies involved in refining, transporting and marketing of petroleum products. These companies supply domestic and industrial consumers with products ranging from gasoline and diesel fuel to asphalt. The Institute conducts research to develop industry policy on environmental, health, safety and business issues. This report covers industry operations, industry economics and financial performance, environmental protection and safety, awards, and publications.

Ottawa : Dept. of Fisheries and Oceans, 1992. xli, 315 p. : ill., maps. *Bilingual (Tables des marées et courants du ..). CSI 21105.049.* ISBN 0-660-57429-2
MICROLOG 93-02868 4 fiche

This report predicts times and heights for all daily high and low waters at the reference ports. For some reference ports where the tidal behaviour is complicated and not readily apparent from the daily tables, the tide is also shown in analogue form as calendar plots. Times and heights for secondary ports for both high water and low water are tabulated as time and height differences relative to a reference port. The report also predicts and tabulates the times of slack water and of maximum current and the rates of the maximum current at the reference current stations. Times of slack water and of maximum current for secondary current stations are tabulated as time differences relative to a reference station. Maximum speeds for secondary stations are tabulated as either a percentage of the maximum speed at a reference port or as a maximum speed.

Canadian-American relations -- Rev.

by M. Leman. Ottawa : Library of Parliament, Research Branch, 1992. 24 p. Bibliogr. (Current issue review ; 79-34E) *French ed (Les Relations canado-américaines) on the same fiche. Revised 20 May, 1992.* ISBN 0-660-14594-4
MICROLOG 93-00663 1 fiche

Relations between Canada and the United States are generally harmonious and friendly. They involve almost every aspect of the two countries' activities, whether political, economic, social or cultural. Trade between the two countries, however, is an issue where protectionist and liberal interests clash intermittently. The state of the relationship depends largely on the readiness of both sides to cooperate on finding a rapid solution to the problems and questions encountered in the various sectors of common activity. This paper discusses trade and investment issues, energy policies, environmental concerns, and maritime boundaries and fisheries issues.

Canadian-owned establishments in western New York : key characteristics and policy implications of the cross-border regional economy

by A.D. MacPherson and J.E. McConnell. Buffalo, NY : State University of New York at Buffalo, Canada-United States Trade Center, 1990. 27 p. : ill. Bibliogr. (Occasional pape no. 4) *Presented at the 29th annual meetings of the Southern Regional Science Association, and at the annual meeting of the Association of American Geographers. CSI 97945.201*
MICROLOG 93-03393 1 fiche

This paper examines the scale, sectoral composition, and regional economic impact of Canadian direct investment in western New York. It presents empirical perspectives on the role of the Canada-United States Free Trade Agreement, notably with regard to western New York's growing absorption of Canadian industrial capital. It uses data from a postal survey of Canadian investors as the basis for the investigation. It concludes with some suggestions for policy makers in the cross-border region.

Canadians and the environment : attitudes and choices

submitted to Environment Canada. Ottawa : Decima Research, 1990. 73 p. Bibliogr.
MICROLOG 93-01880 1 fiche

This report gives the results of a survey on public attitudes to environmental issues conducted from 16-24 August 1990. Focus groups were held in Vancouver, Toronto and Montreal from 30 August-4 October 1990. The report first deals with general attitudes related to the issue of the environment, defining what, in the public's mind, the environmental issue/problem is. The report then moves to potential policy initiatives for government and finally to the sense of optimism Canadians display towards the environment.

CANMET process development unit for hydrocracking and coprocessing research

by D.D.S. Liu...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1993. 17 p. : ill. Bibliogr. (Report ; ERL 91-63(TR))
MICROLOG 93-06863 1 fiche

The Canada Centre for Mineral and Energy Technology (CANMET) process development unit (PDU) for coprocesing up to one half tonne per day (3 barrels/day) of coal and heavy oil or bitumen is described. Coprocessing involves treating a slurry of coal in heavy oil, bitumen or residue with high pressure hydrogen with or without other reducing gases between 400 and 500 degrees centigrade. Under these conditions the coal liquifies and the coal-derived liquids together with the heavy oil hydrocrack to lighter materials. Features of the PDU are described together with results from three commissioning runs.

Capreol area (NTS 41I/NE), districts of Nipissing and Sudbury

by J.F. Gartner. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1980. iii, 16 p. : map. Bibliogr. (Northern Ontario engineering geology terrain study ; 95) *Fold. map not filmed.* ISSN 0709-4671 ISBN 0-7743-4371-0
MICROLOG 93-03079 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Capreol area, districts of Nipissing and Sudbury. Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In fall 1977, roads in the area were traversed and observed terrain conditions recorded as further verification of the office studies. The report describes the geological setting and engineering terrain units, including bedrock, moraine, glaciofluvial, glaciolacustrine, alluvial, and organic landforms.

Caractéristiques biologiqes du maquereau bleu *Scomber scombrus L.* échantillonné le long des côtes canadiennes entre 1983 et 1991

par F. Grégoire. Mont-Joli, Québec : Ministère des pêches et des océans, Division des poissons et de l'océanographie des pêches, Institut Maurice-Lamontagne, 1993. x, 137 p. : ill. Bibliogr. (Rapport technique canadien des sciences halieutiques et aquatiques ; no 1907) ISSN 0706-6570
MICROLOG 93-04251 2 fiche

Les données recueillies dans le cadre du programme d'échantillonnage des captures commerciales de maquereau sont utilisées dans le processus d'évaluation de l'état de cette ressource. Ces données sont aussi analysées dans le but d'améliorer les connaissances sur la dynamique de cette espèces. Lors de la période d'échantillonnage, il s'est avéré que la classe d'âge de 1982 était dominante dans presque tous les échantillons. Cette classe se caractérise par un plus grand nombre de mâles et par une croissance plus faible. Les variations annuelles de certains paramètres biologiques sont reliées à la présence et à l'évolution de cette forte classe d'âge. Les résultats qui sont présentés dans ce document pourront être utilisés dans le cadre d'études plus théoriques sur la biologie de cette espèce.

The Carbon budget of the Canadian forest sector, phase I

by W.A. Kurz...et al. Edmonton : Forestry Canada, Northwest Region, Northern Forestry Centre, 1992. x, 93 p. : ill. Bibliogr (Information report ; NOR-X-326) *French ed (Le Bilan du carbone du...) : 93-08764/2*
ISSN 0704-7673 ISBN 0-662-19913-8
MICROLOG 93-08765 2 fiche

An assessment of the contribution of Canadian forest ecosystems and forestry activities to the global carbon budget was undertaken. This study consisted of the development of a computer modeling framework and the use of published information to establish the sector's current role as a net source or a net sink of atmospheric carbon. The framework includes age-dependent carbon sequestration by living forest biomass, net detrital litter fall of carbon to the forest floor, subsequent accumulation and decomposition release in three soil compartments, retention of carbon in manufactured products derived from harvested forest biomass, and burning of forest biomass for energy. There is explicit representation of the role of ecosystem disturbances, such as fire, insect-induced stand mortality, and harvesting, as they affect carbon releases and transfers to the forest floor and to the forest product sector. Regrowth of biomass and changes in soil decomposition processes following disturbance are also simulated within the model. National and provincial databases were used to provide the first comprehensive estimates of the net carbon exchange between Canadian forest ecosystems and the atmosphere for the reference year 1986.

The Carbon dioxide issue : a perspective for the Energy Research Laboratories

by C.J. Adams and P.J. Read Ottawa : The Laboratories, 1990. 15 p. Bibliogr. (Report ; ERL 90-46(TR))
MICROLOG 93-03426 1 fiche

This document presents a major revision of CANMET's Energy Research Laboratories' (ERL) view on atmospheric emissions of carbon dioxide from its original policy in early 1989 The report covers ERL's mandate to deal with pollutants caused by the production, upgrading and utilization of fuels, concentrating on carbon dioxide emissions, and identifies new and improved fuel utilization and energy conversion technologies. It indicates strategies for implementing these technologies to decrease atmospheric pollution, toxic wastes and carbon dioxide emissions in an economically acceptable way; explains what ERL has already achieved; and presents proposals to expand ERL's work to lead Canada in the development of environmentally sound fuel technologies. Strategies not considered include improvement in motor vehicle efficiency and the enhancement of natural biological carbon dioxide absorbers by preserving forests and coral reefs and other crustaceans in oceans.

The Career concept of male and female educators relative to family responsibilities and household commitments

by F.T. Moss. St. Catharines, Ont. : Brock University, Faculty of Education, 1990. xiii, 219 p. Bibliogr. *ONTERIS: ON06101.*
MICROLOG 93-05965 3 fiche

Examines career concepts of male and female educators in the context of family responsibilities and household commitments. Investigates the under-representation of women in positions beyond the classroom for elementary and secondary schools in the Niagara South Board of Education. The central question was whether female educators career concept is different from that of males. A sample of 140 board educational personnel was selected to represent, by weighted distribution, male and female elementary and secondary classroom teachers, department heads, consultants, principals and vice-principals, and superintendents. A questionnaire gathered data on personal and educational backgrounds, career development, and family responsibilities.

Cartier area (NTS 41I/NW), districts of Algoma and Sudbury

by J.F. Gartner. Toronto : Ministry of Natural Resources, Ontario Geological Survey ; Ministry of Northern Affairs, 1980. iii, 18 p. : map. Bibliogr. (Northern Ontario engineering geology terrain study ; 94) *Fold. map not filmed.* ISSN 0709-4671 ISBN 0-7743-4370-2
MICROLOG 93-03078 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Cartier Lake area, districts of Algoma and Sudbury. Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In fall 1977, roads in the area were traversed and observed terrain conditions recorded as further verification of the office studies. The report describes the geological setting and engineering terrain units, including bedrock, moraine, glaciofluvial, glaciolacustrine, alluvial, and organic landforms. An example of a derived map for general construction capability is also included.

Case studies of some suburban office centres in Toronto

by M.R. Matthew. Winnipeg : University of Winnipeg, Institute of Urban Studies, 1993. vi, 131 p. : maps. Bibliogr. (Urban resources ; 4) *CSI 97965.206.* ISBN 0-920213-94-4
MICROLOG 93-03180 2 fiche (Available on fiche only)

The study's objectives were to determine overall spatial changes and quantitative trends in the location of purpose-designed office buildings in the Toronto Census Metropolitan Area between 1951 and 1986, and to examine trends in its suburban office pattern between 1966 and 1986. In an attempt to identify the most significant factors affecting contemporary suburban office morphology, the study examined changes in the distribution of office space and employment, the changing mix of suburban office activities, and changes in the physical form of suburban office buildings and centres. This document contains the study findings.

Case studies on best practices in the employment of women : a report

Canada. Treasury Board. Consultation Group on Employment Equity for Women. Ottawa : The Group, 1993. 147, 157 p. (Study ; no. 1) *Cover title: More than the numbers : case studies on best practices in the employment of women. Bilingual (Etudes de cas portant sur ..)*
MICROLOG 93-08510 4 fiche

The following report describes in detail 8 case studies that were commissioned by the Consultation Group to illustrate best practices currently in place in a range of organizations across Canada. The activities which are highlighted represent bona fide attempts to break down old attitudes and barriers to the representation of women within the ranks of the case organizations. The studies described involve the Bank of Montreal, Canada Mortgage and Housing Corporation, Canadian National, Manulife Financial, Newfoundland Telephone, Transport Canada, Warner Lambert, and Westcoast Energy. A best practices checklist concludes the document.

The Catamaran Brook (New Brunswick) Habitat Research Project : biological, physical and chemical conditions (1990-92)

by R.A. Cunjak...et al. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1993. ix, 81 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1914) *CSI 21105.503.* ISSN 0706-6457
MICROLOG 93-05996 1 fiche

The project is a 15-year multi-disciplinary research study of a small stream basin (50 sq km) in the Miramichi River catchment of New Brunswick that was conducted to quantify the effects of timber harvest on the aquatic biota (particularly salmonid fishes) and their habitat. Begun in 1990 by a group of seven agencies, it has grown rapidly and in 1993 involves three federal and two provincial government departments, eight universities and colleges, one industry, and four private organizations. Biological, physical, and chemical conditions are detailed at spatial scales of stream basin, reach, and habitat-type, as measured between 1990 and 1992. Where possible, integration of the various sources of data is emphasized. Storm events are closely monitored for quantifying the inter-relationships between meteorological variables, stream discharge patterns, water chemistry, and suspended sediments. The report also gives a summary of the variety of research activities undertaken between 1990 and 1992 and ongoing.

Centrifuge modelling of lateral pipeline/soil interaction

by M. Rizkalla, F. Poorooshasb and J.I. Clark. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1992. 13 p. : ill. Bibliogr. (C-CORE publication ; no 92-11) *Paper presented at the Offshore Mechanics and Arctic Engineering Conference*
MICROLOG 93-07745 1 fiche (Available on fiche only)

When a buried pipeline is subjected to ground movements such as a landslide, both the pipe's integrity and operating safety become matters of concern. Computer based analyses are the primary engineering tools available to evaluate the strain states of the pipe to determine the need for remedial or mitigative work. This document provides the results of eight experiments undertaken in kaolin clay. For each experiment setup, measured force-displacement curves are presented and compared with those calculated using the current state-of-practice formulations. The implications of the experiments and the centrifuge technique for practical design applications are discussed.

Certification of primary composite aircraft structures

by J. Huddart. Montreal : Transport Canada, Policy and Coordination Group, Transportation

Development Centre, 1992. xviii, 90 p. : ill. Bibliogr.
MICROLOG 93-03723 2 fiche

A simulated certification program was carried out for a typical primary structure, including a stiffened skin subjected to dominant compressive loads. Work was limited to the compressive impact strength together with the bearing strength behaviour of the structure. Flat panels were fabricated from graphite preimpregnated unidirectional tape and fabric using a variety of different thicknesses and layups. The panels were subjected to impact levels of 0, 600, 900, and 4000 in-lb/in. Coupons with a variety of widths from 0.5"-10" were cut and tested in compression to determine the residual impact strength.

The Challenge of change : maintaining British Columbia's social safety nets

Victoria : Ministry of Social Services, 1993. 17 p. : ill. Bibliogr. *CSI 37129.200.*
MICROLOG 93-04891 1 fiche

The federal-provincial social safety net which Canadians together had designed to help people weather hardship is being placed under significant stress. This document measures the existing social safety net systems against the reality of the 1990s. It discusses the federal and provincial response to changing times and changing fortunes. It presents ideas on federal-provincial cooperation and government-community cooperation. It also discusses seven principles that will guide the government of British Columbia in the work of preparing a social safety net for the challenges of the coming decade.

Chambly Canal management plan

Ottawa : Environment Canada, Parks Service, Planning Section, 1990. 72 p. : ill., maps. Bibliogr. ISBN 0-662-17530-1
MICROLOG 93-01758 1 fiche

The Chambly Canal was opened to shipping in 1843, bypassing the rapids on the Richelieu River, making possible continuous navigation between Lake Champlain and Chambly Basin and increasing trade between Canada and the United States. The canal is mainly used for pleasure boating now. In 1972, the Chambly Canal, along with seven other Canadian canals, were transferred to the Canadian Parks Service. This master plan describes the present situation of the canal, including the site, natural and heritage features, facilities and services, and water and land-based clientele; the environmental potential and physical constraints; the concept for the future, including development principles, organization of space, and guidelines; the comprehensive plan; operation and management; and implementation. A list of research and studies conducted by the Canadian Parks Service is also included.

Changing the school board fiscal year

Toronto : Ontario Public School Boards' Association, 1990 17 p. *ONTERIS: ON05921.*
MICROLOG 93-00333 1 fiche

After outlining its current position with respect to changing the school board fiscal year, the Ontario Public School Boards' Association (OPSBA) considers the advantages and disadvantages of a change. It reviews 4 options: maintaining the status quo; keeping the calendar year as the fiscal year, but publishing General Legislative Grants Regulations in early November; changing to a fiscal year of July 1 to June 30; or to a fiscal year of September 1 to August 31. It was recommended that OPSBA adopt option 4, subject to a number of conditions
ED ON PR

Changing the school board fiscal year : discussion paper

Toronto : Ontario Public School Boards' Association, 1991. 18 p. : ill. *ONTERIS: ON05926.*
MICROLOG 93-01250 1 fiche

Discusses whether the fiscal year of school boards should be changed from the calendar year to the school year. The Ontario Public School Boards' Association (OPSBA) points up the problem that boards in Ontario must cope with 3 different planning periods: their operational year and 2 fiscal years. Ontario is one of only 2 jurisdictions in North America in which the board's operational and fiscal years do not generally coincide. Outlines the advantages of change, in the 3 areas of efficiency, empowerment and accountability. Points out several disadvantages, none of which is crucial. Outlines the pros and cons of 4 options: retaining the exiting process; modifying the grants regulation publishing date to make the existing process work more smoothly; implementing a fiscal year corresponding to the operational year (July 1 to June 30); or a fiscal year of September 1 to August 31.

Chapleau area (NTS 41O/NW), districts of Algoma and Sudbury

by M.A. Roed and D.R. Hallett. Toronto : Ministry of Natural Resources, Ontario Geological Survey , Ministry of Northern Affairs, 1979. iii, 20 p. : maps. Bibliogr. (Northern Ontario engineering geology terrain study ; 80) *Fold maps not filmed.* ISSN 0709-4671 ISBN 0-7743-4356-7
MICROLOG 93-02741 1 fiche

This report contains an inventory of regional engineering terrain conditions in the Chapleau area, districts of Algoma and Sudbury Information was obtained mainly through aerial photographs checked with published and unpublished literature documenting previous field visits and observations. In summer 1977, roads in the area were traversed and observed conditions recorded as further verification of office studies. The report describes the geological setting and engineering terrain units, including bedrock, moraine, Eolian, glaciofluvial, glaciolacustrine, alluvial and organic landforms. An example of a derived map for engineering capability is included.

Characteristics of REE and other trace elements in response to successive and superimposed metasomatism within a portion of the South Mountain Batholith, Nova Scotia, Canada

by M.C. Corey and A.K. Chatterjee. Halifax : Dept. of Mines and Energy, Mineral Resources Division, 1990. 22 p. : ill., maps. Bibliogr. (Contribution series ; 90-007) *In* Chemical Geology *: 85, 1990.*
MICROLOG 93-06723 1 fiche

A study was conducted to provide mineralogical evidence for successive/superimposed metasomatism within granitic rocks of the South Mountain Batholith (SMB) of Nova Scotia, and to chronicle the behaviour of rare earth elements (REE) and other elements during such processes. It is illustrated that such processes are geochemically distinct and are genetically linked with mineralization. Such studies are thus vital to the economic assessment of the mineralizing centers within the SMB. An overview is presented of the geological setting of the SMB, and the geology of the study area, geochemistry of the Big Indian Polyphase Intrusive Suite, and REE and other element signatures characteristic of successive metasomatism and mineralization are discussed.

Characteristics of the biochemical detector sensor

by W.E. Lee, T.V. Jacobson and H.G Thompson. Ralston, Alta. : National Defence, Defence Research Establishment Suffield, 1993. iv, 25 p. : ill. Bibliogr. (Suffield memorandum ; no. 1402)
MICROLOG 93-06478 1 fiche

The biochemical detector (BCD) project is a trinational research and development program whose goal is to produce a lightweight detector system capable of responding rapidly to a range of chemical and biological agents. Two computer controlled, automated BCD prototype biosensors, a breadboard model and a concept model, were designed and built and were provided to Defense Research Establishment Suffield so that their capabilities could be determined. This study developed assays for a number of analytes for the concept model of the BCD that could be compared to those carried out on the Threshold.

Australia mineral sands. The monazite, in powder form, was injected into the long-lived radioactive dust test facility at the Elliot Lake laboratory. The characterization measured dust mass vs particle size, alpha-particle activity vs particle size, radionuclide composition, electrical charge vs particle size, and radon-222 and radon-220 emanation from the sample. Cascade impactors were used for particle size and long-lived radioactive characterization. Alpha and gamma-spectrometry were employed for radionuclide identification. Special methods were used to measure the emanation of radon-222 and radon-220 from the monazite sample

Characterizing the soil water regime of the Canadian prairies

by R. De Jong...et al. Ottawa : Agriculture Canada, Research Branch, 1992. ii, 38 p. : maps. Bibliogr. (Technical bulletin ; 1992-2E) (CLBRR contribution ; no. 91-130) ISBN 0-662-19398-9
MICROLOG 93-01587 1 fiche

Traditionally the supply of water through precipitation has been reported as long term arithmetic means, even though rainfall is a stochastic event. This study presents information on varying levels of probabilities rather than on means (the 50 percent probability level is equivalent to the arithmetic mean). The information is also compiled using a soil water model that integrates daily precipitation for a 30-year period with the water storage capacity of the soil to estimate the amount of water available to spring wheat for each day of the growing period. Estimates are provided for different phenological growth stages, and for different crop rotations. These estimates are made for different soil water-holding capacities, within each of the soil zones (agroecological resource areas). Results are presented as maps showing the distribution of available soil water at different levels of probabilities for the most common AWC in each area.

Describes the context in each pilot program site. Documents the Transition Years development phase by historical context, school culture, collaboration, staff development, leadership, planning, student and parental involvement, obstacles, and facilitators and summarizes the similarities and differences among the 4 sites. Summarizes data collected to help make decisions about program directions, as well as measures of individuals' concerns about change. Data was collected using questionnaires and group focused interviews. Chapter 2 gives a definition of the concept of school culture and its implications for the promotion of change, profiling each project site is profiled in 4 ways: the surrounding community, the schools involved, the schools' philosophy concerning the transition years, and team formation. Chapter 3 describes research into collegiality and collaboration between elementary and secondary panels, and efforts being made at the pilot sites to develop collegial relationships. Chapter 4 explores system, site, and teacher-directed leadership in relation to change. Chapter 5 gives an historical look at staff development, describes Transition Year initiatives, and reports the results of a Stages of Concern questionnaire conducted at pilot sites. Chapter 6 outlines the plan developed at each site, how it was generated, and resources needed. Finally, chapter 7 reviews concerns and constraints in year 1, and suggests directions for year 2.

The Chatham Airport commercial prospects study

for the Management Committee of the Canada/New Brunswick Cooperation Agreement on Planning ; by Sypher, Airports and Aviation Division. Ottawa : The Division, 1992. xii, 131 p. : ill.
MICROLOG 93-02386 2 fiche

The airport at Chatham was formerly an air defense base but was taken over in 1971 by the Miramichi Airport Commission, a joint body for the towns of Newcastle and Chatham, which has operated it as a civil air terminal. Since 1990, the landside of the base has also been surplus. This study was undertaken to enhance the long term viability of the airfield at Chatham and to identify potential users of surplus facilities. This report describes the Miramichi region and the airport and commercial prospects, including an enhancement of scheduled air services, the attraction of speciality air carriers to establish permanent bases, the development of an airport firefighting training centre, and establishment of an aircraft engine repair and overhaul facility. Necessary associated actions such as land use and facility planning and business planning are described, and an overall commercial development strategy is given.

MICROLOG 93-00629 1 fiche (Available on fiche only)

Outlines what is involved in young children's language and literacy development. Children's language develops especially over the preschool years, and children's literacy development occurs rapidly during the school years. The focus is the relationship between each. These developments are explained in terms of children's acquisition of metalinguistic concepts for referring to meaning, and further avenues for research are proposed.

Children, schools and poverty -- Rev.

Canadian Teachers' Federation. Ottawa : CEJY, 1991. i, 21, i, 24 p. Bibliogr. *Bilingual (L'Enfance, l'école et la pauvreté).* ISBN 0-920786-31-6
MICROLOG 93-06207 1 fiche (Available on fiche only)

This background paper on child poverty in Canada is one of five reports which were prepared for Campaign 2000. This paper will examine poor children at school. It begins with an overview of Canadian poverty followed by its associated effects on children. A detailed discussion of the research describing how low-income children fare in schools, and a description of theories that have been proposed to explain their performance and the principles of school-based interventions to achieve 'equality of educational opportunity' are presented. It closes with a brief discussion of the limited efficacy of school-based interventions.

Children, youth and their communities : a new approach : report of the children and youth program review initiative

Charlottetown : Prince Edward Island Cabinet Committee on Government Reform, 1992 45 p.
MICROLOG 93-04179 1 fiche

A five-member Steering Committee was formed in April, 1991, and was given the following mandate: to review existing services checking for overlaps and gaps; to review various pieces of enabling legislation checking for inconsistencies; to facilitate community discussion; and to design an integrated delivery system which is corporate in approach and which reflects importance of the child, family, and community. This document is the culmination of over a year of discussion and study by the residents of Prince Edward Island. It summarizes recommendations for the reform of services for children and families and provides a background for their development.

China and western nonferrous metal markets : threats or opportunities

by C. Nappi. Kingston, Ont. : Queen's University, Centre for Resource Studies, 1993. xi, 205 p. : ill., maps. Bibliogr. (Monographs ; 27) ISBN 0-88757-119-0
MICROLOG 93-08296 3 fiche (Available on fiche only)

This study analyzes the evolution of the Chinese minerals and metals industry during the last two decades. After presenting the geographical, economic and socio-political realities which make up the environment in which this industry has developed, the study examines its main characteristics (quality of reserves, production, consumption, trade flows) and the chief variables influencing their evolution. The study then provides sectoral analyses of the Chinese aluminum, copper, nickel, lead and zinc industries, to determine the past and probable future degree of import dependence for these metals which account for 95 percent of Chinese nonferrous production. This study discusses the opportunities presented by China's potential increased dependence on international sources, analyzes the impact of Chinese imports on the levels and stability of prices, and assesses their possible effect on the competitiveness of mineral producers in the Asia-Pacific zone. Finally, it discusses a possible future Chinese mineral policy which gives greater recognition to the benefits of a specialization in the production and export of goods which are more intensive in labour than in capital or energy resources.

The Chloride ion content of concrete aggregates from Southern Ontario -- 2d rev. ed.

by C.A. Rogers and G. Woda. Downsview, Ont. : Ministry of Transportation, Engineering Materials Office, 1992. 36 p. : ill. Bibliogr. (Report ; EM-17)
MICROLOG 93-00168 1 fiche

The corrosion of enforcing steel in concrete is a major cause of the deterioration of concrete bridge decks in Ontario. The Amabel and Lockport dolomites which form the cap rocks of the Niagara Escarpment contain unusually large amounts of water-soluble chloride ions, exceeding the specifications imposed in Europe for the chloride ion content of aggregates for use in reinforced and prestressed concrete. These rocks are a major source of the crushed concrete aggregate used in Southern Ontario. An investigation was conducted to find the source of the chloride ions contained in the rocks and to ascertain if the quantity of chloride ion found was capable of causing the corrosion of reinforcing steel in concrete. This report describes the field and laboratory investigation and discusses the contribution of chloride ion to concrete by Amabel dolomite, recommendations and specifications for chloride content in Europe and the U.S., chloride ion concentration and corrosion of steel in concrete, the mechanism of transport of chloride ions, the degree of saturation of Amabel dolomite, and the contribution of chloride ions to pore solutions by Amabel dolomite. Detailed experimental results and sample descriptions and locations are also included.

Choice of technology in industry : the economics of grain-milling in Tanzania

by M.S.D. Bagachwa. Ottawa : International Development Research Centre, 1991. ix, 144 p. : ill. Bibliogr. *CSI 22239.210.* ISBN 0-88936-570-9
MICROLOG 93-00009 2 fiche (Available on fiche only)

It is not uncommon to find many production units in low-income, labour-abundant, capital-scarce economies such as Tanzania employing sophisticated and capital-intensive production techniques. In such circumstances, the technologies in use and the products being produced are not compatible with the resource endowment of the economy and the income levels of the majority of the population. This book evaluates the relative performance of alternative grain-milling techniques in Tanzania to identify appropriate ones and to explain why some companies select inappropriate techniques and products. The consequences of technology choice are then discussed for employment creation, output expansion, surplus generation, skill formation, and overall resource use.

Choices Today, Options Tomorrow : seniors housing for the 90's : conference proceedings

Choices Today, Options Tomorrow . seniors housing for the 90's (1990 : Vancouver, B.C.). Ottawa : Canada Mortgage and Housing Corporation ; Victoria : British Columbia Housing Management Commission, 1991. 168 p. *French ed. (Choix d'aujourd'hui, options...) : 93-02832/2.* ISBN 0-662-18592-7
MICROLOG 93-02374 2 fiche

During the 25-year period from 1986 to 2011, the number of Canadians age 65 and over will almost double. By the year 2011, there will be just under five million Canadian seniors and by 2045 one in every five Canadians will be a senior citizen. The conference had two objectives: to identify the issues seniors face in meeting their housing needs, and to discuss and formulate practical solutions to respond to changing housing needs. The 22 conference workshops were organized around three themes: choices for your future, the community and its choices, and information for everyone. These proceedings are a summary of each of the presentations and discussions during the conference

La conférence du Yukon sur le logement des aînés, intitulée 'Choix de logements pour le troisième âge: préserver l'autonomie', a eu lieu à Whitehorse du 4 au 7 septembre 1990. Il s'agissait de la dernière de la série de douze conférences territoriales et provinciales qui ont eu lieu dans toutes les régions du pays. La conférence du Yukon avait deux objectifs: déterminer les problèmes auxquels les aînés font face lorsqu'il s'agit de répondre à leurs besoins de logement, et; discuter et formuler des solutions pratiques visant à répondre aux nouveaux besoins de logement. Ce document se penche sur la façon de préserver l'autonomie des personnes du troisième âge dans leurs choix de logements.

Le Chômage chez les jeunes au Canada -- Rév.

par K.B. Kerr. Ottawa : Bibliothèque du Parlement. Service de recherche, 1992. 16 p. Bibliogr. (Bulletin d'actualité ; 82-4F) *Révisé le 16 novembre 1992 L'éd. anglaise (Youth employment in Canada) sur la même fiche.* ISBN 0-660-94142-2
MICROLOG 93-07170 1 fiche

Pour de nombreux jeunes (groupe d'âge 15 à 24 ans), la transition entre l'école et le travail signifie qu'ils arrivent sur le marché du travail sans spécialité, sans expérience, et sans être habitués à la recherche d'un emploi ni au courant des possibilités d'emploi qui s'offrent à eux. Malgré l'intérêt que l'on porte au taux de chômage et en dépit du débat public approfondi sur cette question, on parle rarement de la nature et des causes du chômage. Le présent document cherche à combler cette lacune, en ce qui a trait au chômage actuel chez les jeunes.

Chronologie d'une sélection de lois fédérales ayant trait à la sécurité sociale, 1918-91

Ottawa : Ministère de la santé nationale et du bien-être social, Direction générale de la politique, de la planification et de l'information, Division de l'information sur les programmes sociaux, 1992. 172 p. *L'éd. anglaise (Chronology of selected...) : 93-02785/2*
MICROLOG 93-02786 2 fiche

Ce rapport souligne les principales initiatives législatives prises depuis 1918 à l'égard d'une vaste gamme de programmes sociaux fédéraux, dont ceux qui dispensent aux Canadiens des prestations de sécurité du revenu, des services sociaux et ceux qui sont liés à la santé. Le rapport touche tous les programmes depuis leur entrée en vigueur jusqu'à janvier 1991 ou, dans certains cas, jusqu'à leur date de cessation. Les programmes supprimés sont signalés par un astérisque dans la table des matières. Le rapport présente donc, dans une perspective législative, une vue d'ensemble de l'évolution de presque tous les grand programmes fédéraux de sécurité sociale au Canada, passés et actuels.

Clay and shale deposits of Ontario

by G.R. Guillet. Toronto : Ministry of Natural Resources, 1977. viii, 117 p. : ill., maps. Bibliogr. (Ontario Geological Survey mineral deposits circular ; 15) *Fold. map not filmed.*
MICROLOG 93-01482 2 fiche

Ontario clay and shales have been in use for more than a century in the making of bricks, tiles and sewerpipes. This report describes some clay and shale occurrences not presently in commercial use. Information is given on the geology, location, mineral and chemical composition, and ceramic properties of 45 shale samples, representing most of the shale formations of Ontario, and 162 clay samples from scattered locations throughout the province.

Clayoquot Sound land use decision : background report

Victoria : The Province, 1993. 15 p *Clayoquot Sound land use decision : key elements (4 p.) laid in.*
MICROLOG 93-05984 1 fiche

Since 1980, Clayoquot Sound, located on the west coast of Vancouver Island, has been the focus of intense public debate about land use and resource development. The Clayoquot Sound Sustainable Development Task Force was formed in 1989 to develop a consensus-based sustainable strategy for the area but could not come to a decision so was disbanded in 1990. The Steering Committee was formed in January 1991 and included representatives from the native community, municipal, regional, and provincial governments, and representatives of the various interests in the area. This document provides background information on the Sound, the area around it, and land use; aboriginal considerations, a history of planning processes; considerations underlying the decision; and the decision as it relates to protected areas and integrated resource management areas

The Clean launch : how Revenue Canada Customs and Excise implemented the GST

by M. Smith. Ottawa : Customs and Excise ; Canadian Centre for Management Development, 1992. v, 215 p. : ill. *French ed. (Un Bon départ : la mise...) : 93-06646/3.* ISBN 0-662-19786-0
MICROLOG 93-06647 3 fiche

Although most Canadians will have strong memories of the antagonism that surrounded the implementation of the Goods and Services Tax (GST), it is likely that few are aware of the effort and complexities involved in implementing such an enormous initiative. This document is a record of the important lessons about a complex program implementation that Excise Branch can now pass on. It discusses the challenge of the GST, customs and excise before the GST, how the launch was managed, How the tax was launched, and the new excise and managing change.

Cleaning of the equipment used for carcass fabrication at large pig-slaughtering plants

by C.O. Gill and J. Bryant. Lacombe, Alta. : Agriculture Canada, Research Branch, 1992. iv, 19 p. Bibliogr. (Technical bulletin ; 1992-7E) (Lacombe technical bulletin ; no. 3) ISBN 0-662-19962-6
MICROLOG 93-03440 1 fiche

If pork is to have the reliably long storage life required for overseas trading and centralized preparation of shelf-ready product, it must be prepared to a high hygienic standard. Pork of high hygienic quality can be obtained only if sources of bacterial contamination are eliminated from pork cutting facilities. That requires the consistent, good cleaning of pork fabricating equipment. This report discusses techniques for cleaning meat cutting equipment and illustrates them by reference to microbial data from pork cutting facilities. The appropriate approaches to managing and assessing the efficacy of cleaning processes are considered.

Cleanup of oil spills on coarse sediments

D.F. Dickins Associates. Ottawa : Environment Canada, Environmental Protection Directorate, 1991. 73 p. Bibliogr. (Report ; EE-127)
MICROLOG 93-08095 1 fiche

A literature review was conducted to assess if rational oil spill cleanup decisions could be based on the existing data. The review focused on techniques for cleaning spills of crude oil and Bunker fuel on coarse sediments. Over 60 references are reviewed and ranked on the basis of environmental, oiling, and cleanup descriptions. A brief discussion with tables summarizing the rankings is presented in the main text, and individual assessments of the references are available in the appendices.

CLIC INFOLEX Project, phase I : cost projections for law libraries in Canada

Toronto : Canadian Legal Information Centre, 1992. 246 p. Bibliogr. *Bilingual summary report (28, 23 p.) laid in. CSI 97978.201.* ISBN 0-92148176-4
MICROLOG 93-00861 4 fiche

INFOLEX was created by the Canadian Legal Information Centre (CLIC) in response to the need for information regarding the operations of law libraries in Canada in the 1990s. This report determined and reported on the projections of future costs through analyzing current law library costs. It describes the approach, including distribution of questionnaires and survey analysis. Notes on data interpretation are followed by a profile of respondents. Historical costs and analyses are then undertaken for each of the 4 types of law libraries (academic, courthouse or law society, government and private). Appendices provide the questionnarie, focus group guides, technology in use, and the use of cost projections as a management tool.

Client survey project : survey report

Victoria : Ministry of Advanced Education, Training and Technology, 1992. iii, 72 p. : ill. *Summary (ii, 13 p.) laid in. CSI 37121.208*
MICROLOG 93-00141 1 fiche

The Client Survey Project (CSP), commissioned by the Ministry of Advance Education, Training, and Technology in the spring of 1991, measures client expectation of British Columbia's post-secondary education and training system. The purpose of the CSP is to gather and provide pertinent information to assist in planning broad future directions for British Columbia's post-secondary education and training programs. The central question of this project is whether students pursue post-secondary education primarily to attain fulfilling, well-paid careers, or whether their main interest is to obtain a general, well-rounded education.

Climate change and winter wheat yield in Ontario

by I. Savdie. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1989. ii, 32 p. : maps. Bibliogr. (Report ; no. 89-4)
MICROLOG 93-00254 1 fiche

A physical deterministic crop development model (CERES) is used to simulate winter wheat production in Ontario. The outputs of the two general circulation models (GISS and GFDL) are used to simulate the effect of the doubling of carbon dioxide on the climate. The modified temperature and precipitation patterns are used as input to the crop yield model to study their effect on winter wheat production. The effect of climate change on the spatial distribution of yield is interpreted by winter survival, maturity date, thermal and moisture stresses, and soil-climate interactions.

Clonal variation in heat tolerance and heat shock protein expression in black spruce

by S.J. Colombo ..et al. Sault Ste. Marie, Ont. : Ontario Forest Research Institute, 1992. 6 p. : ill. Bibliogr. *In* Silvae Genetica *: 41, 1992*
MICROLOG 93-06354 1 fiche

For black spruce, a boreal temperate zone species with a vast range spanning the northern section of North America from the Pacific to the Atlantic Ocean, heat tolerance is not commonly considered an important trait for tree improvement. However, high temperatures can cause damage during nursery stock production, stock handling, and after planting. This investigation established the sensitivity of black spruce clones to heat stress and assessed the relationship between clonal differences in heat tolerance and heat shock protein synthesis. One-year-old root cuttings representing nine families and a total of 24 clones were used to assess variability in heat tolerance, and for two clones, differences in heat shock protein synthesis.

Closure of LG-1 reservoir across a sensitive clay terrace

by C.E. Schneeberger, J. Levay and B. Boncompain. Montreal : Canadian Electrical Association, Hydraulic Power Section, 1991. 25 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06058 1 fiche

The development of the LG-1 hydroelectric project requires the construction of a 2 km long dyke across a clay terrace. The nominal crest elevation of the dyke is 35 m and will confine the proposed LG-1 reservoir at elevation 32 m. Most of the dyke is of the freeboard type except for its northern extremity where the dyke reaches a height of 10.5 m. The sensitive nature of the soft clay foundation has called for several design features to assure the stability of the dyke along with both upstream and downstream bank stabilization work in order to avoid the occurence of potentially disastrous retrogressive slides. Such slides are typical of La Grande River clay banks and may reach 1-2 km in lateral extent. The paper describes the geotechnical conditions of the clay terrace and presents the most significant design criteria that were adopted.

CMHC and the building industry : forty years of partnership

edited by Tom Carter. Winnipeg : University o Winnipeg, Institute of Urban Studies, 1989. iii, 20 p. Bibliogr. (Occasional paper ; 18) ISBN 0-920213-70-7
MICROLOG 93-02881 1 fiche (Available on fiche only)

Two papers focusing on the relationship between the federal government through the Canada Mortgage and Housing Corporation and the building industry. The first paper on the single family home building industry concentrates on evolution and change in industry characteristics and the production process, discussing the positive stimulus of the private sector-government partnership and emphasizing common objectives and the government's ability to harness the powerful incentive of the profit motive in responding to the housing needs of Canadians. The second paper traces evolving CMHC-industry relationships over 40 years, illustrating changes and highlighting lessons learned and looking at future trends and how such trends are likely to affect the relationship.

CMHC research project : testing of air barriers construction details : report

Ottawa : Canada Mortgage and Housing Corporation, Project Implementation Division, 1991. iii, 85 p. : ill. *French ed. (Projet de recherche de la SCHL : évaluation...) : 93-02329/1.*
MICROLOG 93-00742 2 fiche

This project was conducted to quantify the air leakage characteristics of the header joist, the electric outlets, and the window openings in wood-frame walls. The study evaluated the sealed internal membrane method, where polyethylene sheet and sealant provide the air barrier; the external air barrier method, which uses a continuous vapour permeable membrane (spun-bonded olefin film), sandwiched between two layers of external wall sheathing; and the airtight drywall method, where the interior gypsum board finish, together with framing materials and gaskets, are used as the air barrier. In addition, the traditional approach to wood-frame wall construction, where no special attention is given to achieving a continuous air barrier, was evaluated for comparison.

Co-operative fisheries mitigation on the Puntledge River

by G.J. Birch. Montreal : Canadian Electrical Association, Hydraulic Power Section, Environmental Subsection, 1992. 12 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference*
MICROLOG 93-06047 1 fiche

In 1913, the first hydropower facility was constructed in the Puntledge River on the east coast of Vancouver Island. This installation began eight decades of impacts on the salmonid fisheries resource resulting from dam construction and operations. While certainly not solely to blame for the observed declines in the famed Puntledge salmon and trout runs, hydroelectric development has contributed to decreasing production through habitat modifications and decreased accessibility to spawning grounds. This paper will trace the history of hydropower development in the Puntledge drainage, the development of early mitigative measures and the most recent attempts to address continuing problems.

The British Columbia coastal plywood sector has undergone a series of drastic capacity reductions occasioned by the permanent closure of several plants in recent years. This study was undertaken to describe its current competitive position and likely future, specifically addressing its market determinants, log supply constraints, labour characteristics, and competitive rivalry. The study also provides an optimal structure for the sector.

Cod worm removal using electrical stimuli

by K.C. Watts and J. Thottan A. Halifax : Dept. of Fisheries, 1993. 23 p. : ill. (Report ; no. IDD110) ISBN 0-88871-266-9
MICROLOG 93-07220 1 fiche

Cod worms are parasites found in the muscle of codfish They are now visually detected on candling tables and removed manually before sending the filleted fish to the market. Other methods include the use of ultrasonic imaging and X-rays to detect the worms. Preliminary investigation of exposure to a low current or voltage source over two summers showed some potential, so a detailed investigation was begun. This report first outlines the results of the preliminary investigation, with the questions that arose, then describes the method of investigation and specific experimental results. The potential for commercializing the method is briefly examined.

A Coded wire tag assessment of Salmon River (Langley) coho salmon : 1990 tag application and 1991-92 spawner enumeration

by M.K. Farwell, N.D. Schubert and L.W. Kalnin. New Westminster, B.C : Dept. of Fisheries and Oceans, Fisheries Branch, 1992. ix, 42 p. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2153) ISSN 0706-6473
MICROLOG 93-02567 1 fiche

In 1986, a plan was implemented to improve the assessment data for coho salmon through the long-term evaluation of key stocks. The Salmon River at Langley, British Columbia was selected for the evaluation, with known precision, of annual escapement, marine survival, harvest distribution and exploitation rate. An estimated 20,390 coho smolts were released with coded wire tags in spring 1990. The adult escapement was estimated fall and winter 1991/92 using the Petersen mark-recapture method.

Coefficients de distribution de la régénération nécessaires au maintien de la production des peuplements de pin gris, d'epinette noire et de sapin baumier

par P. Pominville et R. Doucet. Québec : Gouvernement du Québec, Ministère des forêts, Direction de la recherche, 1993. 16 p. : ill. Bibliogr. (Note de recherche forestière ; no 48) ISSN 0834-4833 ISBN 2-550-27203-X
MICROLOG 93-04095 1 fiche

Cette méthode évalue la relation entre le coefficient de distribution de la régénération d'un peuplement équienne et le volume qu'on peut y récolter à maturité. On se sert de peuplements matures ou semi-matures dans lesquels on mesure directement le volume. Le coefficient de distribution qu'avait le peuplement peu de temps après son établissement est, pour sa part, évaluée à partir de la localisation de toutes les tiges, mortes comme vivantes. Cette méthode est aussi utilisée avec le coefficient de distribution des tiges marchandes qui est basé sur les tiges vivantes de plus de 9,0 cm de dhp.

A Cognitive adaptationist interpretation of reading disability

by C. Bereiter. Toronto : Ontario Institute for Studies in Education, 1986. 24 p. Bibliogr. *ONTERIS: ON04728*
MICROLOG 93-00622 1 fiche

An interpretation of the reading comprehension strategies of disabled readers. Passive, low-comprehension, reading strategies are characteristic of disabled readers, but they are also examples of cognitive adaptation. The adaptionist analysis suggests that treatment of the disabled reader must involve altering the conditions of the adaptation. It should also focus on the student's unique strengths, aim at a deeper comprehension, and promote a more intelligent, self-directed adaptation.

A Cognitively-based instructional program for language arts in the intermediate grades

by J. Kingma. St. Catharines, Ont. : Brock University, Faculty of Education, 1992. viii, 284 p. Bibliogr. *ONTERIS: ON06376.*
MICROLOG 93-08256 3 fiche

A cognitively-based instructional program for language arts was developed to integrate the teaching of reading and writing at the intermediate level of the elementary school. The primary focus of the program was on the organizational aspects of reading and writing tasks. The project investigated the effects on student performance of integrating the study of reading and writing as shared cognitive processes. All data collected were anecdotal in character. Observations demonstrated an overall improvement in student performance and attitude toward reading and writing. The results indicated that a 2nd level of investigation is warranted to provide statistical data to test the curriculum design. The observational data also has implications for improving language arts and for inservice teacher training.

Coherent Anti-Stokes Raman Spectroscopy (CARS) : measurements of species such as NO and O2 : final report

by T. Parameswaran. Ottawa : Atlantis Scientific Systems Groups Inc., 1993. i, 33 p. Bibliogr. *CANMET contract: 23440-2-9061-01-SQ.*
MICROLOG 93-06874 1 fiche

Coherent Anti-Stokes Raman Spectroscopy (CARS) has been accepted as a very useful tool in combustion diagnostics. CARS is an optical technique in which two powerful laser beams are brought to a focus over a very small region in a medium usually a flame This produces an output laser-like beam arising from a specific interaction of the laser radiation with the molecules of the gases in the flame and the spectral characteristics of this beam contains information about the temperature and species present in the focal volume. The relevant information from the CARS spectra can be extracted only by comparing it with theoretically calculated spectra. A complex software package was developed for generating the theoretical CARS spectra and for analyzing the experimental spectra. This report describes the tasks undertaken to enhance the capabilities of the existing CARS software package with the aim of detecting species such as NO and O2.

Coho salmon *Oncorhynchus kisutch* escapement studies in Black Creek, French Creek, and Trent River, Vancouver Island, 1989

by R.C. Bocking, R.E. Bailey and J.R Irvine. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1992. vii, 77 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2160) ISSN 0706-6473
MICROLOG 93-03484 1 fiche

Each fall since 1985, counting fences have been located at Black Creek, French Creek and the Trent River to estimate coho escapement as part of a program to intensively study a few streams to determine if one coho stock in a defined geographical area may be used as an indicator stock for nearby stream populations. Mark-recapture studies were also carried out annually to provide a second escapement estimate. In the spring of each year, on each of the three systems, migrating coho smolts were counted and code wire tagged at smolt enumeration fences. This report summarizes the fence count and upstream mark-recapture escapement enumeration studies during 1989.

MICROLOG 93-07176 2 fiche

Le colloque sur la reconstruction d'époque a réuni des experts de tous les niveaux du programme et leur a permis de cerner ensemble le problème que pose la reconstruction d'époque au Service canadien des parcs. Il visait à fournir une occasion de rencontre pour discuter de la question à l'échelle du programme, élaborer la politique sur la gestion des ressources culturelles (GRC) et cheminer vers un consensus quant à la mise en oeuvre de la politique. Ce document présente le résumé des actes de ce colloque.

Colloque sur le cheval : connaissez-vous votre cheval?

Colloque sur le cheval (1992 : Laval, Québec). Sainte-Foy, Québec : Conseil des productions animales du Québec, 1992. 83 p. : ill. Bibliogr.
MICROLOG 93-04337 1 fiche

Ce document présente le compte rendu d'un colloque sur le cheval. Il porte principalement sur quelques-uns des aspects particuliers du comportement des chevaux, de façon à comparer les caractéristiques que l'on peut observer chez le cheval en liberté complète au pâturage à celles du cheval gardé en permanence à l'écurie. On examine ensuite qu'elles sont les effets, chez certains chevaux, de l'inadaptation aux conditions de vie en confinement. On y aborde particulièrement les comportements naturels du cheval, le cheval et ses espaces, les considérations vétérinaires lors du transport des chevaux, et l'oeil du cheval, ses caractéristiques et ses maladies.

Colloque sur les maladies liées au rayonnement ultraviolet : compte-rendu

rédactrices Laurie Gibbons [et] Lori Anderson Ottawa : Santé et bien-être social Canada, 1992. 46 p. Bibliogr. *Dans* Maladies chroniques au Canada : *vol 13, no 5, supplément, 1992. L'éd. anglaise (Symposium on Ultraviolet...) : 93-04156/1.* ISSN 0228-8702
MICROLOG 93-05868 1 fiche

Le Colloque sur les maladies liées au rayonnement ultraviolet était prévue dans le contexte du Plan vert et a trait à certains problèmes de l'environnement. Le Colloque visait à: examiner les données liant le rayonnement ultraviolet à l'incidence des mélanomes de la peau et de l'oeil, des cancers non mélaniques de la peau et de la lèvre, des maladies de la peau non malignes et de la cataracte; examiner les données concernant l'efficacité de la prévention primaire et de la détection précoce des maladies susmentionnées; et, recommander des stratégies de gestion du risque dans les domaines de la réglementation, de l'information du public, des programmes de dépistage et des priorités de recherche. Ce document présente donc le compte-rendu de ce Colloque.

Color constancy : diagonal transforms suffice

by G.D. Finlayson, M.S. Drew and B.V. Funt. Burnaby, B.C. : Simon Fraser University, Centre for Systems Science ; Laboratory for Computer and Communications Research, 1993. 20 p. : ill. Bibliogr. (Technical report ; CSS/LCCR TR93-02)
MICROLOG 93-08841 1 fiche (Available on fiche only)

This document presents a theoretical analysis connecting several color constancy theories. The main focus of this paper is on how well, in principle, can a particular matrix form discount the effect of the illuminant. It presents the model used, finite-dimensional models, the color constancy problem, lighting and surface matrices, illuminant invariance, diagonal transforms and the 3-2 case, and implications for other theories of color constancy. Results are included, as well as a discussion on complex eigenvalues.

Combinations of options, methodology for impact analysis : development plan 1993 : proposal

Montreal : Hydro-Quebec, 1992. 32 p. (Working documents) *Bilingual (Combinaisons d'options, méthodologie...) : 93-05845/1.* ISBN 2-550-26752-4
MICROLOG 93-07980 1 fiche

The orientations favoured by Hydro-Quebec in terms of electricity supply and demand are based on a few key selection criteria. Impacts are calculated to illustrate the selection criteria The purpose of this document is to describe the main methods, assumptions and components used in evaluating the various impacts. The document is divided into six sections. Section 1 discusses the discounted overall cost for Hydro-Quebec and all of its customers, means of meeting electricity requirements, and the economic benefit for Hydro-Quebec of the various market development options. In Section 2, the indicators chosen for the environmental impact assessment are set forth. Section 3 presents the method used to calculate the long-term costs of supply. In Section 4, the components of the financial framework are analyzed. The methods for calculating economic spinoffs are covered in Section 5. Finally, Section 6 presents the concepts of energy mix and energy self-sufficiency.

Combustion performance of Coal Valley coal in a pilot-scale utility boiler

by G.K. Lee and K.M. Tait. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1987. iv, 33 p. : ill. (Report ; ERL 87-18(CF))
MICROLOG 93-04256 1 fiche

Combustion performance trials were conducted on a commercial sample of Coal Valley coal from the Coalspur coalfield in the foothills region of Alberta. The project included an analytical investigation of the coal and coal ash properties as well as combustion studies in the CCRL pilot-scale, pulverized coal-fired boiler, under conditions representative of those in large steam boilers. This report gives the objectives of the project, the analyses of the coals, and describes the facilities and operational procedures. An evaluation of the experimental results and the conclusions are presented.

Le Commerce de détail et de gros au Canada : sources d'information

Ottawa : Industrie, Sciences et Technologie Canada, Direction générale des industries de services et de la construction, Direction des industries de services de distribution, 1992. 41 p. *L'éd. anglaise (Retailing and wholesaling...) : 93-07329/1* ISBN 0-662-97906-0
MICROLOG 93-07330 1 fiche

Ce guide est destiné aux personnes qui cherchent des renseignements au sujet des détaillants et des grossistes au Canada. La publication est organisée comme suit: la section I donne la liste des associations industrielles nationales qui comptent parmi leurs membres un nombre important d'entreprises de distribution. Ces associations constituent souvent la meilleure source d'information et de documentation au sujet des entreprises ainsi que des produits qui sont de leur domaine. L'information que renferme cette section a été obtenue au moyen d'une enquête menée auprès des associations industrielles et est présentée dans l'ordre alphabétique. La section II donne la liste des répertoires de détaillants, de grossistes et de distributeurs au Canada. Bien des répertoires sont publiés par l'éditeur d'un périodique professionnel ou font partie d'un numéro annuel régulier (ou de numéros spéciaux). Dans ce cas, le nom de la revue professionnelle apparaît entre parenthèses dans le texte. Sont exclus de la liste les répertoires dans lesquels on ne précise pas si une entreprise s'occupe de commerce de gros ou de détail, ou encore de distribution. La section III énumère les sources de statistiques sur le commerce de détails et de gros au Canada. Finalement, l'annexe donne l'adresse et le numéro de téléphone des éditeurs de répertoires et de périodiques.

La Commission canadienne du lait joue un rôle important dans la mise en oeuvre de la politique laitière du gouvernement fédéral et favorise le développement de l'industrie laitière au Canada. Travaillant en collaboration avec les producteurs, les transformateurs, les organismes provinciaux de mise en marché du lait et les exportateurs, la Commission conseille le ministre de l'Agriculture sur les questions qui touchent l'industrie laitière et élabore des politiques et des programmes qui répondent aux besoins de l'industrie tout en assurant les consommateurs canadiens des approvisionnements suffisants de produits laitiers de qualité. Ce document présente le rapport annuel de la Commission touchant la gestion des approvisionnements de lait, le contrôle des importations, le prix cible pour le lait de transformation, les paiements directs de soutien, le prix de soutien pour le beurre et la poudre de lait écrémé, et la mise en marché intérieure et internationale. Les états financiers vérifiés termine le document.

The Commonwealth of Independent States (C.I.S.) : an emerging competitor for mineral capital

Ottawa : Intergovernmental Working Group on the Mineral Industry, Government/Industry Task Force, 1992. viii, 17 p. (Background study on the Canadian mineral investment climate ; no. 9)
MICROLOG 93-05409 1 fiche

It was agreed at the 1991 Mines Ministers' Conference in Halifax that a government/industry task force be formed to review and assess Canada's international competitiveness for mineral investment capital. The former Soviet Union was first in the world output of iron ore, nickel, and zinc, and a significant producer of aluminum, copper, lead, and uranium. Successor member Republics of the Commonwealth of Independent States (CIS), especially the Russian Federation, Kazhakhstan, Ukraine, and Uzbekistan, are likely to continue to be important producers of mineral commodities. This report discusses recent developments in the CIS, including the political environment, the mineral wealth and investment climate, the search for foreign investment capital, and Canadian participation. Appendices summarize trends in the legislative and fiscal framework for the Russian Federation and Kazhakhstan.

MICROLOG 93-03415 1 fiche

This report is the first comprehensive look at the nature, extent, and causes of regional differences in the housing situation across Canada. It maps out the major differences and variations captured in national data series, and assesses which are the most significant, based on readily available indicators. Its aim is to interest housing researchers and policy analysts in the possibility of building a regional differences perspective more fully into their future work, and to offer guidance on how this may be done in the most efficient manner.

Community awareness and response : abuse and neglect of older adults

Ottawa : Health and Welfare Canada, Health Services and Promotion Branch, Health Services Directorate, Mental Health Division, 1993. 50 p. : ill. *French ed (Sensibilisation et réaction de la collectivité...) : 93-06826/1* ISBN 0-662-20264-3
MICROLOG 93-06827 1 fiche

Although present for many years in our society, the abuse and neglect of older adults has existed in relative silence, denial and isolation. This guide to community approaches provides a conceptual framework for communities to develop protocols, policies, and services to address the issue of abuse and neglect of older adults. It raises questions about perceptions of the issue and it is intended to stimulate discussion and action at the community level. It focuses the abuse and neglect of older adults within the broad context of family violence.

The Community college graduate follow-up survey report, 1992

Halifax : Dept. of Advanced Education and Job Training, Planning and Evaluation Division, 1993. 119 p. : ill. Bibliogr. *CSI 52196.002.* ISSN 0835-7757
MICROLOG 93-04801 2 fiche

The report lists the institutions whose graduates were surveyed, and summarizes the general findings of the survey regarding all respondents. It also provides employment and unemployment rates for each program in order to facilitate comparison to unemployment rates which are reported monthly by Statistics Canada, and contains a user's guide with information on the outcomes of respondents for each program. Finally, it outlines the major occupational groups of the Canadian Classification and Dictionary of Occupations, outlines the standard industrial classification industry divisions also used for coding purposes in the survey, presents a copy of the questionnaire used to survey graduates, and discusses the calculation and use of confidence intervals.

Community resources boards as a public participation technique for sub-regional resources planning

by K.A. Ness. Victoria : Ministry of Forests, Integrated Resources Branch, Resource Planning Section, 1992. ii, 45 p. : ill. Bibliogr. ISBN 0-7726-1883-6
MICROLOG 93-09012 1 fiche

Over the past 30 years, British Columbia has witnessed an increasing call for more local participation in and control over resource management planning and decision making. To address these concerns, the government is examining a number of options, including: creating an entirely new process to deal with the perceived inequalities; and reforming the existing process to provide local citizens opportunities to influence decisions. This paper presents the provincial sub-regional resource management planning and decision making process outline; describes public participation as a means of resolving conflict; and brings together discussions and recommendations based on two case studies and other research.

A Comparative analysis of the impacts of twenty alternative policies for providing temporary macroeconomic stimulation

by G.V. Jump and D.P. Dungan. Ottawa : Canada Mortgage and Housing Corporation, Program Evaluation Division, 1992. 112 p. Bibliogr. *CSI 22553.200*
MICROLOG 93-03617 2 fiche

This document presents a discussion of the individual policies--what differentiates them and how they are assumed to be implemented in the simulation exercises. It provides a useful explanation for the simulation results. For example, in describing how a mortgage interest rate subsidy to buyers of new homes could be simulated, it is useful to compare the incentive effects of such a subsidy with those provided by CHOSP. An understanding of how these incentive effects differ provides the basis for understanding where and why the estimates of net macroeconomic impacts differ between these two alternative policies. Finally, it includes the remainder of what is to be said about the simulation process.

Comparative field vibration tests on single AAAC and ACSR conductors

by P. Van Dyke, C. Hardy and M. St-Louis. Montreal : Canadian Electrical Association, Engineering and Operating Division, Transmission Section, Conductor Vibration and Oscillation Subsection, 1991. 13 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06215 1 fiche

The technology of all-allied aluminum conductors for transmission lines, which offers a mechanical strength equivalent to or greater than steel-reinforced aluminum conductors, is now well established. Interest is these lines lies in their low mass to strength ratio, which can be used advantageously in stringing lines with lower sags, and, consequently, shorter and cheaper towers. The wind-induced aeolian vibration response of a single all-allied aluminum conductor in comparison with a steel-reinforced aluminum conductor of equivalent electrical resistivity and mechanical tensile strength is presented. Test site, conductor characteristics, instrumentation, and data acquisition and processing, aeolian vibration bending amplitude, virtual antinode amplitude, and vibration amplitude versus intensity of turbulence are discussed.

A Comparison of climate parameters at an open site and within an I45/51 hybrid poplar plantation

by P.J.F. Sajecki and R.B. Street. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1989. 45 p. : ill. Bibliogr. (Report ; no. 89-6)
MICROLOG 93-00282 1 fiche

Compared to open areas, which are typical of most climate stations, few observations of climate data are available within forest environments and particularly within hybrid poplar plantations. Microclimates within such farmed forests differ significantly from those of open areas. This report presents the results of measurements of climatological parameters including solar radiation, air temperature, soil temperature, precipitation, relative humidity, and wind speed and direction made during 1982 and 1983 growing seasons within an I45/51 hybrid poplar plantation and at an adjacent open field site in Eastern Ontario. On the basis of the amount of solar radiation received at the open site, days were classified as clear, partly cloudy, or overcast. Climatic parameters were analyzed taking into account sky conditions and synoptic weather patterns. Comparisons of climate parameters were made between the open and plantation sites and also with neighbouring climate stations where data were available. The results are presented in tabular or graphic form along with methodology, comments and suggestions for future studies.

A Comparison of freshwater zooplankton sampling gear : nets, traps and submersible pump

by O.E. Johannsson...et al. Burlington, Ont. : Dept. of Fisheries and Oceans, Great Lakes Laboratory for Fisheries and Aquatic Sciences, 1992. viii, 29 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1894) ISSN 0706-6457
MICROLOG 93-02551 1 fiche

This study examined the relative efficiencies of six different gear (one pump, three nets and two traps) for zooplankton sampling used by government and local institutions in long-term monitoring programs in central Canada. The study was conducted in a typical Canadian Shield lake to establish guidelines for comparing the data. A multivariate analysis of variance was followed by six contrasts.

A Comparison of phosphorus retention in lakes determined from mass balance and sediment core calculations

by P.J. Dillon and H.E. Evans. Toronto : Environment Ontario, 1992. iv, 31 p. Bibliogr. ISBN 0-7729-9749-7
MICROLOG 93-03878 1 fiche

Information concerning the retention of total phosphorus (TP) in the sediments of lakes is of prime importance in predicting phosphorus concentrations in the water column, in determining areal hypolimnetic oxygen deficits (AHOD), in discerning changes in the biological behaviour of lakes, and in establishing the success of lake recovery programs following reductions in external phosphorus loadings. This study compared TP determined from mass balance calculations (using long-term data) with the accumulation of phosphorus estimated from 210 lead measurements of sediment accumulation and the analysis of phosphorus concentrations in the surface sediments of seven lakes in south-central Ontario about 200 km north of Toronto and 250 km southeast of Sudbury.

Comparison of respirable dust generated on Phalen 3 East wall for a shearer equipped with hollow shaft ventilators versus extraction drums

by C.Y. Hwang and G.W. Bonnell. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1992. iii, 34 p. : ill. Bibliogr. (Report ; MRL 92-130(TR))
MICROLOG 93-08313 1 fiche

From 26 February to 18 November 1990, 19 dust surveys were carried out at Phalen 3 East wall to compare the dust suppression system on an Anderson-Strathclyde AM500 shearer equipped with conventional hollow shaft ventilators with the same shearer equipped with extraction drums. Respirable dust concentrations were measured on the wallface using real-time Hund dust meters and SIMPEDS cyclones equipped with constant flow pumps. For comparative purposes, results were calculated only for the periods when the shearer was actually cutting coal. Face ventilation and water inlet pressures to the shearer were also measured for each production shift.

A Comparison of the effects of *Nosema fumiferanae* and a *Nosema* sp. (microsporida) on *Choristoneura fumiferana* (Clem.) and *Choristoneura pinus pinus* Free

by G.G. Wilson. Sault Ste. Marie, Ont. : Forestry Canada, Forest Pest Management Institute, 1986. 10 p. Bibliogr. (Information report ; FPM-X-77) *French ed. (Comparaison des effects de...) on the same fiche.* ISSN 0704-772X ISBN 0-662-15093-7
MICROLOG 93-02780 1 fiche

Microsporidian parasites were isolated from both the spruce budworm and the jack pine budworm. The species infecting the spruce budworm is *Nosema fumiferanae* and it has definite detrimental effects on its host. The species infecting the jack pine budworm is similar to that infecting the spruce budworm. Because of the serious and dramatic increase in infestations of the jack pine budworm in Ontario, studies were undertaken to compare the effects of the two microsporidian parasites. This report details the effects of *Nosema fumiferanae* and a *Nosema* sp. when fed to 4th and 5th-instar larvae of spruce budworm and jack pine budworm.

A Comparison of the total factor productivity and total cost performance of Canadian and U.S. industries

by P.S. Rao and T. Lemprière. Ottawa : Economic Council of Canada, 1992. xi, 121 p. : ill. Bibliogr. (Working paper ; no. 4 *French ed. (Comparaison entre la productivité...) : 93-00127/2. CSI 22215.271.*
ISSN 1180-3487
MICROLOG 93-00126 2 fiche

This paper analyzes the total factor productivity (TFP) and total unit cost performance of Canadian industries during the period 1961-88. It compares Canadian developments with trends in the United States and shows that both countries experienced accelerating costs and a pervasive productivity slowdown in the post-1973 period, although the Canadian experience was considerably worse. The TFP slowdown in Canada played a significant role in the reduction of output and labour productivity

growth, and the acceleration of unit total costs, and output prices. It shows that TFP trends largely determined relative price trends across industries, and hence influenced Canada's trading patterns.

Comparison of tritium surface characteristics of AECL and OHRD contaminated 304 stainless steel coupons

by J.P. Krasznai...et al. Toronto : Ontario Hydro, Research Division, 1992. iii, 23 p. : ill. Bibliogr. (Report ; no. 91-179-K)
MICROLOG 93-02897 1 fiche

Understanding the behaviour of tritium on surfaces for both tritium dosimetry as well as for the development of decontamination methods is a fundamental component of tritium technology R&D programs being undertaken at Atomic Energy Control Ltd. (AECL) and Ontario Hydro Research Division (OHRD). Reliable interpretation of results from these experiments requires that the surfaces used are well characterized for the total tritium activity and its distribution on the surface. This report details the results of a series of experiments carried out to compare the nature of tritium contamination on stainless steel surfaces contaminated by elemental tritium at Chalk River Laboratories with those contaminated at OHRD and also to determine whether there were any differences between the analytical protocols used at the two laboratories to examine the specimens.

Comparison of two methods commonly used at the Experimental Lakes Area for collecting chemistry samples from vertically stratified lakes

by P. Campbell. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1993. iv, 21 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1881) *This is the 50th technical report from the Central and Arctic Region, Winnipeg.* ISSN 0706-6457
MICROLOG 93-08659 1 fiche

Lakes used at the Experimental Lakes Area (ELA) for experimental studies or as natural references are, generally, small but deep. As a result, these systems exhibit marked thermal stratification during most of the open-water season. Often, significant vertical gradients in chemical constituents as well as biological components are also evident and are coupled, in part at least, to the vertical stratification in temperature. Two different sampling procedures are commonly used in the ELA for chemical characterization of the water columns of vertically stratified lakes. These two procedures, a 5-sample profile and a 2-sample composite, were assessed by comparing them with 1-meter interval profiles.

A Comparison of wind speeds recorded simultaneously at three metres and ten metres above ground

by A. Headley. Downsview, Ont. : Atmospheric Environment Service, Canadian Climate Centre, 1990. 36 p. : ill. Bibliogr. (Report ; no. 90-1)
MICROLOG 93-00186 1 fiche

Anemometers are normally exposed at the internationally agreed height of 10 metres but since wind measurements are now being taken at remote areas where it was not formerly possible, the height of the instrument is usually three metres. This practice makes it difficult to compare data. In summer 1989, an anemometer was installed on a 10 metre lightweight aluminum pole on Fosheim Peninsula, Ellesmere Island, a remote high-Arctic location where long-term wind measurements were already being made at the three metre level. Wind speed data were recorded simultaneously at the two levels from 25 June to 19 August 1989. This study used the two resulting data sets to gain a better understanding of the comparability of the wind speeds at these two heights. Wind direction was also examined to understand any unusual or readily unexplainable data.

A Comparison study of linear arrays applied to groundwave radar

by A. Davis and S.A. Saoudy. St. John's : Memorial University of Newfoundland, Centre for Cold Ocean Resources Engineering, 1991. 5 p. (C-CORE publication ; no. 91-21) *Presented at NECEC '91.*
MICROLOG 93-06012 1 fiche (Available on fiche only)

When each of 40 elements of the Cape Race ground wave radar receiving antenna are equally excited, the highest side lobe levels of the radiation pattern are 13.5 decibels below the main lobe level. Use of tapering excitations based on analytical methods reduce side lobe levels at the expense of flattening the main lobe. This work investigates the use of optimization to determine a set of amplitudes that achieve low side lobe levels without significantly widening the main beam. The paper compares radiation patterns obtained from sets of optimal amplitudes, Dolph-Chebychev amplitudes, and equal excitations.

Compendium of Canadian forestry statistics, 1992 : national forestry database

Ottawa : Canadian Council of Forest Ministers, 1993. xiv, 122 p. : ill. Bibliogr. *French ed. (Abrégé de statistiques forestières...) : 93-08771/2. CSI 32155.002.* ISSN 1118-5815 ISBN 0-9696158-8-4
MICROLOG 93-08772 2 fiche

This compendium of statistics from the database is the second of a series published annually. The data is presented in tabular and graphic form. The program is working to improve the consistency and comparability of the data in the national forestry database. This year the publication presents 1990 and 1991 data compiled by the National Forestry Database as well as key historical information gathered by earlier surveys. Activity data is provided to the database managers each year by the provincial and territorial forestry agencies. Data for federal forest lands are collected by Forestry Canada from the various federal agencies responsible for their management.

Competitive adsorption of humic acids and asphaltenes on cation exchanged clays

by C.W. Angle and H.A. Hamza. Ottawa : Canada Centre for Mineral and Energy Technology, Western Research Centre, 1991. viii, 73 p. : ill. Bibliogr. (Report ; CRL 91-18(TR))
MICROLOG 93-08756 1 fiche

The following experimental work was conducted as a first stage in the preparation of model clay-organic complexes for further studies into the influence of such organics on the surface properties of the clay particles, and their specific roles in such processes as emulsification/demulsification of oil and the disposal of tailings. Selected samples were measured electrophoretically to determine the extent of changes in the electrophoretic mobility distributions of the complexed clays as compared to the uncomplexed clays. Fourier transform photoacoustic spectra were used to study all complexed clays to note any changes in the functional groups present on the surface and which might absorb in the mid-infrared region.

Competitiveness : information and intermediate services

by J.W. Harrington. Buffalo, NY : State University of New York at Buffalo, Canada-United States Trade Center, 1991. 17 p. Bibliogr. (Occasional paper , no. 11)
MICROLOG 93-03399 1 fiche

In addition to being intangible, many intermediate services are characterized by a dependence on information as a major input. The economic implications of information intensity and the geographic barriers to competition influence the distribution and nature of these services across local regions. Inter-regional variation in information services, in turn, influences the international competitiveness of regional products. This paper examines the theoretical circumstances under which these influences work. A brief theoretical exposition is followed by a discussion of the methodological problems faced in measuring the quality and availability of services within a region or a country. It presents a set of conclusions concerning the economic and geographic concentration of intermediate services.

Les Comportements suicidaires chez les jeunes québécois de 15 à 24 ans

par L. Côté...et al. Québec : Gouvernement du Québec, Ministère de la santé et des services sociaux, 1992. 52 p. : ill. Bibliogr. (Cahiers de recherche ; 9) *En tête du titre: Enquête santé Québec 87.* ISBN 2-550-22653-4
MICROLOG 93-08091 1 fiche

Le suicide a connu une augmentation spectaculaire durant les deux dernières décennies. Au Québec, pour la période de 1975 à 1977, le taux de décès par suicide se situait à 13,3 pour 100 000 personnes. Ce rapport présente donc l'analyse des données de l'enquête Santé Québec dans une optique de connaissance de ces facteurs chez les jeunes de 15 à 24 ans. La première partie du document permet de cerner la méthodologie de l'enquête en précisant les variables de l'étude, les analyses statistiques, les indices et le dénombrement. Les renseignements démographiques et socio-économiques mettent en relation la situation familiale, les niveaux de scolarité et de revenu, ainsi que l'activité avec la présence de tendances suicidaires ou non. L'intégration sociale et les événements stressants, avant l'âge de 12 ans et au cours de l'année précédant l'enquête, composent les dernières sections réservées à l'étude des facteurs associés aux tendances suicidaires chez les jeunes.

Composition of Canadian summer and winter gasolines, 1991-92

prepared by Alberta Research Council ; for Canadian Petroleum Products Institute, Energy, Mines and Resources Canada. Ottawa : The Institute, 1992. x, 246 p. *CANMET contract: 23440-1-917101-SQ*
MICROLOG 93-04276 3 fiche

Summary of the composition of various grades of summer and winter gasolines marketed in Canada generated from 66 samples collected from service stations during summer 1991 and winter 1991/92 in cities across Canada. The samples represent product produced at all of the major refineries in Canada except Newfoundland. The first round of sampling and analysis in June 1991 was followed by a second round in January 1992. Compositional analysis was carried out by gas chromatography.

Compositional simulation of gas injection processes with asphaltene precipitation

by L. Nghiem, M. Hassam and R. Nutakki. Ottawa : Canada Centre for Mineral and Energy Technology, Computer Modelling Group, 1993. iv, 36 p. : ill. Bibliogr. *CANMET contract: 23440-2-9036-01-SQ.*
MICROLOG 93-06875 1 fiche

An efficient modelling technique based on the representation of the precipitated asphaltene as a pure dense phase is presented. The success of the approach is based on the division of the heaviest component in the oil into a non-precipitating and precipitating component. The characterization of these components is discussed. The mechanistic aspect of the model with regards to the association/dissociation of asphaltene/resin molecules is also discussed. An algorithm for three-phase flash calculations for asphaltene precipitation is described. These calculations are incorporated in a compositional simulator.

Le Compostage des fumiers de bovin laitier par aération forcée : technologie et évaluation technico-économique : synthèse du rapport de recherche

par M. L'Heureux. La Pocatière, Québec : Ministère de l'agriculture, des pêcheries et de l'alimentation du Québec, Institut de technologie agro-alimentaire de La Pocatière, 1992. 22 p. : ill. Bibliogr. ISBN 2-550-27181-5
MICROLOG 93-08648 1 fiche

Ce document aborde la technologie et l'évaluation technico-économique relatives au compostage des fumiers de bovin laitier par aération forcée. Les objectifs de l'étude sont les suivants: la conception et mise au point d'un procédé de compostage rapide par aération forcée des fumiers solides; la comparation et l'évaluation de la performance de trois méthodes d'aération pour le compostage des fumiers de bovin (temps, qualité, coût); et, l'évaluation du potentiel de récupération d'énergie associé à l'aération forcée.

Compostage, son rôle dans la gestion des déchets solides municipaux : rapport final

Université de Moncton. Centre de recherche en sciences de l'environnement. Fredericton : Environnement Nouveau-Brunswick, 1991. ix, 190 p. Bibliogr. *L'éd. anglaise (Composting, its role in municipal...) : 93-08827/2.*
MICROLOG 93-08826 3 fiche

En gros, le compostage constitue une décomposition biologique contrôlée de matériaux organiques. Alors qu'aujourd'hui les technologies de compostage sont beaucoup plus sophistiquées et s'appliquent également à d'autres déchets que le fumier, le principe demeure toujours le même que celui d'antan. Ce document présente le rapport final sur le rôle du compostage dans la gestion des déchets solides municipaux. On y aborde la situation actuelle des déchets municipaux au Nouveau-Brunswick; l'option du compostage; le compostage des déchets solides municipaux, le compostage des boues d'égout; le co-compostage des déchets solides avec les boues d'égout; la perception publique; la commercialisation de produits de compostage au Nouveau-Brunswick; la faisabilité économique du compostage; la faisabilité d'un plan intégré de gestion des déchets; et, la possibilité d'inclure les déchets industriels.

Comprehensive plan of refocusing/rationalization

Fredericton . Dept. of Health and Community Services, 1990. 13 p.
MICROLOG 93-05708 1 fiche

Historically, Departments of Health and Social Services across the country have been payers of bills. A gradual realization that this pattern cannot continue has led to a shift away from a loosely managed, loosely planned to a more carefully planned and managed approach to the health and social service care system which is results/outcome oriented. This document contains a proposal for change. It looks at factors driving the government to refocus their directions toward a more rational approach to health and community services.

Computation of radiant heat transfer on a non-orthogonal mesh using the Finite Volume Method

by E.H. Chui and G.D. Raithby. S.l. : Thermal Science Ltd., 1991. iv, 177 p. : ill. Bibliogr. *Cover title: Equations of motion for reacting, particle-laden flows CANMET contract: 23440-7-9130-01-SQ*
MICROLOG 93-01529 2 fiche

To predict fluid flow and convective heat transfer in geometrically complex systems of practical interest, computational methods are normally implemented on non-orthogonal, boundary-fitted meshes. The Finite Volume Method for solving the radiative transfer equation (RTE) has been applied only on Cartesian and cylindrical meshes. This paper demonstrates the application of this method on non-orthogonal, quadrilateral element meshes. The paper describes the discretization of the RTE on the non-orthogonal mesh, outlines a new solution, gives details related to special treatment at the boundaries, and presents the results of four test problems. Only two-dimensional problems are considered, and the medium is assumed to be gray.

Computer crime -- Rev.

by M. Hébert and M. Pilon. Ottawa : Library of Parliament, Research Branch, 1991 18 p. Bibliogr. (Background paper ; BP-87E) *Revised November 1991. French ed (Les Délits informatiques) on the same fiche.* ISBN 0-660-14590-1
MICROLOG 93-01845 1 fiche

Losses attributed to criminal activities involving the use of computer systems are a subject of some controversy. No detailed study has ever been undertaken in Canada, in part because there is no consensus as to what exactly is a 'criminal activity involving the use of computer systems.' It is difficult to establish with any confidence the losses from computer crime without some clear conception of what such crime entails, and an accurate record of its frequency. This document presents a definition of computer crime. It looks at the significance of computer crime and Canadian criminal law respecting computers.

Computer simulation models of the Porcupine caribou herd, I : energy

by L.L. Kremsater...et al. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1989. 57 p. : ill. (Technical report series ; no. 53) ISSN 0831-6481 ISBN 0-662-16692-2
MICROLOG 93-00180 1 fiche

Research and monitoring of the Porcupine caribou herd have been conducted almost continuously since the early 1970s. Because of the amount of data being gathered, the Porcupine Caribou Technical Committee requested that individuals involved in research and management of the herd develop computer simulation models to aid in evaluating the data, to guide future research, and to provide insights into the potential impact of alternate development scenarios. The models included an ENERGY model, a GROWTH model, and a HARVEST model. The models run on IBM compatible microcomputers with graphic capabilities. This report presents the ENERGY model, in which diet, biomass of major forage types, nutrient content of forage, and proportion of the day spent foraging are simulated for 15 life cycle periods. Using a simplified rumen function model, with an hour iteration period, daily metabolizable energy intake is predicted for an individual caribou.

Computer simulation of the transport of soil gas, indoor air, and atmospheric air into subslab venting systems : final report

by C.P. Wray. Ottawa : Canada Mortgage Housing Corporation, 1991. v, 218 p. Bibliogr
MICROLOG 93-03115 3 fiche

Project to study the effectiveness of subslab ventilation systems in reducing indoor radon levels and of assessing their potentials for creating foundation problems, wasting energy, and creating troublesome or dangerous indoor depressurization. A computer program was used to simulate the flow of air and radon through a house and the soil surrounding it fo 15 cases. These cases considered different combinations of three radon mitigation systems (subslab depressurization, subslab pressurization, and basement suction), a large and small separation width between the basement wall and backfill, soil air barrier at grade level, and two subslab venting system flow rates.

Ottawa : Groupe de travail du PGAV, 1991. 16 p. *L'éd. anglaise (Visitor activity concept) sur la même fiche*
MICROLOG 93-01761 1 fiche

En octobre 1989, les chefs des Activités des visiteurs, d'interprétation et des Services d'accueil ont demandé au Groupe de travail du PGAV d'élaborer une approche qui améliorerait la contribution faite en tant que discipline à la planification de la gestion en ce qui concerne les possibilités offertes aux visiteurs. Ce document vise à fournir des orientations précises sur les points suivants: les principes qui devraient guider l'intégration des activités pour les visiteurs aux plans de gestion; une liste de contrôle du contenu des concepts d'activités des visiteurs, à intégrer au processus de planification de la gestion; les éléments propres aux activités des visiteurs dont il faut tenir compte à l'intérieur du processus de planification de la gestion; et, les ingrédients pour réussir l'élaboration d'un plan de gestion tenant compte des activités des visiteurs.

Concept for an expedient biological agent detector

by J.E. McFee and W.E. Lee. Ralston, Alta. : Defence Research Establishment Suffield, 1993. xvi, 40 p. (Suffield memorandum ; no. 1399)
MICROLOG 93-05885 1 fiche

This report presents a Canadian proposal, submitted to ITF-19 of the US/UK/CA Memorandum of Understanding on Chemical and Biological Defensive Materiel, for a biological agent detector that would be fielded by 1995. The proposed system consists of an aerosol particle sizer and large volume air sampler for non-specific detection and collection/preconcentration. An alternate system is also proposed if more development time is available. The report also describes the results of Canada's original prescreening of technologies, and gives a detailed analysis both of the subtechnologies that comprise the proposed system and of the total system. A description of the current Canadian biodetector, the MASU/MAGIDU, is also given.

Concept of operations for emergency site management

Ottawa : Emergency Prepareness Canada, 1993. 1993. 47 p.
MICROLOG 93-05058 1 fiche

The purpose of an emergency response is to protect and save lives and to minimize losses to public and private property. The aim of this publication is to establish a concept of emergency operations in the context of the Emergency Site Management course program through the study of the fundamentals of emergency management. It presents information on the principles of emergency management; the types of emergency operations; the conduct of emergency site operations; and organization, command, control, and communication.

La Concurrence dans les transports : regard sur la politique et la législation, vol. I et II

Ottawa : Commission d'examen de la Loi sur les transports nationaux, 1993. 2 v. : ill. Bibliogr. *L'éd. anglaise (Competition in transportation...) : 93-06649/6. CSI 22070.200F.* ISBN 0-660-94151-1
MICROLOG 93-06650 6 fiche

La Loi sur les transports nationaux de 1987 représente la pierre angulaire de la stratégie du gouvernement canadien visant à mettre en place un système de transport compétitif répondant aux besoins divers des voyageurs et expéditeurs canadiens. Ce document se penche sur cette question en examinant la politique et la législation en matière de concurrence dans les transports. Ce premier volume se penche sur: les incidences; les répercussions sur l'environnement, la sécurité et les relations patronales-syndicales; les transporteurs; le maintien de la concurrence; la politique des transports et le rôle de l'Etat; et, la législation et l'Office.

Conductor uprating for 500 kV transmission lines

by M. Forster. Montreal : Canadian Electrical Association, Engineering and Operating Division, Transmission Section, 1993. 54 p. : ill. Bibliogr. *Paper presented at Electricity '93 : distribution power quality.*
MICROLOG 93-05554 1 fiche

B.C. Hydro completed uprating 2,100 km of 500 kV steel transmission lines from a temperature rating of 50C to 65C over five years with 63 days of outages for a total project cost of 6.7m dollars or 3,180 dollars/km. Information was collected through photogrammetric methods on ground and tower locations, and supplemented by field surveys of conductor tension and existing design files, processed, as described in this paper, to show clearance deficiencies. Using remedial methods described here, all circuits were successfully uprated and new drawings created using CAD pre-processors.

Conférence nationale sur les droits sociaux et économiques au Canada

parrainée et organisée par Conseil canadien de développement social...et al. Ottawa : le Conseil, 1992. 34, 32 p. *Bilingue (A National Conference on Social and ...).*
MICROLOG 93-06389 1 fiche (Available on fiche only)

La conférence a offert une occasion d'échange d'information à plus de 75 organismes qui se consacrent à la promotion de l'égalité et des politiques sociales. On y a parlé des préoccupations et des expériences vécues par les femmes, les personnes atteintes d'une déficience, les minorités raciales et ethniques et les enfants. Les représentants du Québec et des peuples autochtones ont fait part de leur vision des droits sociaux et économiques dans le contexte de leurs droits collectifs et, en particulier, de leur droit à l'auto-détermination. Le débat sur la question de la protection des droits sociaux et économiques dans la Constitution s'est articulé autour de l'idée que, pour les Québecois et les nations autochtones, cette protection pouvait être assurée par un autre mécanisme. Le présent rapport propose une synthèse des principales vues, observations et opinions exprimées tant part les conférenciers que par les participants. Nous espérons qu'il permettra au lecteur d'apprécier pleinement qu'il est important de protéger et de faire avancer nos droitss sociaux et économiques.

Conflict of interest rules for federal legislators -- Rev.

by M. Young and J.R. Robertson. Ottawa : Library of Parliament, Research Branch, 1992. 19 p. Bibliogr. (Current issue review ; 79-3E) *French ed (Les Conflits d'intérêts ..) on the same fiche Revised 11 September, 1992.* ISBN 0-660-14844-7
MICROLOG 93-07427 1 fiche

Conflicts of interest are nothing new, they have always existed. The changes are in public attitudes and tolerance. On the one hand, there are ever higher public standards and more onerous public expectations: what may have been allowed in the past is no longer acceptable. On the other hand, there is much greater scrutiny of the actions and behaviour of public figures, certainly by the media, but also by other politicians, interest groups, and so forth. This document examines techniques of control, types of interests, and present rules It also presents information on parliamentary action.

Conflict resolution in forestry : recent initiatives

by M. Eberle, K. Cooke and T. McDaniels Victoria : Canada-British Columbia Partnership Agreement of Forest Resource Development FRDA II, 1992. iii, 28 p. Bibliogr. (FRDA report ; 199) ISSN 0835-0752 ISBN 0-7726-1720-1
MICROLOG 93-04725 1 fiche

This project identified and describes a range of forestry-related land use conflict resolution initiatives (public participation or negotiation processes, research projects, educational programs) operating in Alberta, Alaska, Oregon, and Washington and facing challenges similar to those in British Columbia. The study interviewed appropriate representatives from the other jurisdictions to identify and document initiatives; reviewed the literature on the social and economic aspects of forest resource use conflicts; and identified issues and research needs that arise from this work but are not being addressed currently. A series of structured telephone interviews was conducted with 10 persons in universities, government agencies, and private firms that identified 15 initiatives.

Victoria : Office for Seniors, 1992. v, 91 p.
Bibliogr. ISBN 0-7726-1638-8
MICROLOG 93-00907 2 fiche

This document contains a general overview of the subject of elder abuse based in the academic and professional literature, including theories of causation and barriers to reporting. It describes services and agencies that may be able to assist in cases of elder abuse. These agencies include provincial government programs, government-funded institutions such as hospitals, and a variety of voluntary agencies and self-help organizations. Finally, it provides a checklist of agencies and services, with contact phone numbers where appropriate.

CSI 67281 001. ISSN 0830-8837 ISBN 2-550-56679-X
MICROLOG 93-01260 1 fiche

Le Conseil des services essentiels a été créé dans le but spécifique de protéger la santé et la sécurité du public lorsque survient une grève dans certains services publics. Une des tâches du Conseil consiste à évaluer si les services prévus à une entente ou à une liste syndicale sont suffisants pour assurer la santé ou la sécurité du public durant la grève. C'est également au Conseil que revient la responsabilité de veiller à ce que les services soient respectés pendant la grève. Ce rapport annuel rend compte de l'ensemble des activités du Conseil et contient de nombreux renseignements d'intérêt public.

This document is a product of a series of meetings on constitutional reform involving the federal, provincial, and territorial governments and representatives of Aboriginal peoples. These meetings were part of the Canada Round of constitutional renewal. On September 24, 1991, the Government of Canada tabled in the federal Parliament a set of proposals for the renewal of the Canadian federation entitled Shaping Canada's Future Together. These proposals were referred to a Special Joint Committee of the House of Commons and the Senate which travelled across Canada seeking views of the proposals. The Committee received 3,000 submissions and listened to testimony from 700 individuals.

Considerations in the design of effects monitoring strategies : Beaufort Sea case study

by D.J. Thomas. Ottawa : Environmental Studies Research Funds, 1992. x, 56 p. : ill. Bibliogr. (Environmental Studies Research Funds report ; no. 118) ISBN 0-921652-19-4
MICROLOG 93-03706 1 fiche

Future hydrocarbon development activities in the offshore Beaufort Sea Region show a clear need for effective monitoring studies that address the uncertainties associated with environmental impact predictions, assess the effectiveness of mitigative measures, and re-assure the public that environmental degradation is not taking place. This report contains general information about designing effects monitoring studies for evaluating environmental effects associated with disturbances to the environment, emphasizing hypothesis testing and natural variability. The report describes the identification of activity/receiving environment interactions, quantification of the scale of the potential disturbance, assessment of possible effects, formulation of null impact hypotheses, designing of the monitoring program, and execution of the monitoring program.

La Constitution canadienne : un guide féministe

par L. Smith et E. Wachtel. Ottawa : Conseil consultatif canadien sur la situation de la femme, 1992. xiv, 85 p. Bibliogr. (Document de référence) *L'éd. anglaise (A Feminist guide to the Canadian Constitution) : 93-02073/1.* ISBN 0-662-97654-1
MICROLOG 93-02150 2 fiche

La préparation de ce texte est dûe en grande partie à deux raisons précises. D'abord, parce que les dossiers constitutionnels revêtent une grande importance pour la population canadienne et, ensuite, parce que le point de vue des femmes est souvent exclu du débat constitutionnel. Vous trouverez dans ce texte réponse à des questions de base en matière constitutionnelle: qu'est-ce qu'une constitution? quel est son rôle? et, comment reflète-t-elle et influence-t-elle les valeurs et la culture d'un peuple? Vous y trouverez aussi réponse à des questions sur la Constitution du Canada, quelles en sont les composantes? quels en sont les effets sur les femmes? comment a-t-elle vu le jour? et, quel est son cadre historique? Finalement, vous y découvrirez où en sont les femmes par rapport au processus constitutionnel et verrez comment il serait possible d'accroître leur participation.

Constraining proliferation : the contribution of verification synergies

by P.B. McFate...et al. Ottawa : Dept. of External Affairs, Non-Proliferation, Arms Control and Disarmament Division, 1993. v, 70 p. : ill. Bibliogr. (Arms control verification studies ; no. 5) ISSN 0828-3664 ISBN 0-662-20347-X
MICROLOG 93-05399 1 fiche

While many studies have evaluated specific verification techniques, procedures or agencies, relatively little has been written about the multiplier effects associated with verification synergies. This paper identifies many of these effects, using specific arms control examples where appropriate, and emphasizing examples relating to non-proliferation. It also provides a basis for taking these synergies into account during the process of formulating and evaluating the effectiveness of the verification regimes of particular agreements and actions. The paper considers the cooperative, adversarial, and coercive forms of verification as exemplified by the Conventional Forces in Europe Treaty, the Chemical Weapons Convention, and the UNSCOM inspections in Iraq following the War in the Gulf, respectively.

Construction and demonstration of a portable chemical processing unit for purifying and recovering waste gas treating chemicals from the petroleum industry

by T. Beasley and D. Merritt. Ottawa : Environment Canada, Environmental Protection Service, 1992. ix, 51 p. : ill. Bibliogr. (Report ; EPS 3/PN/1) *French ed. (Construction et démonstration d'une...) : 93-00590/1.* ISBN 0-662-19956-1
MICROLOG 93-00591 1 fiche

Gas processors are frequently faced with problems associated with accumulated impurities in gas-treating chemicals which are used to remove water vapour and acid gases such as hydrogen sulphide or carbon dioxide. This project developed and demonstrated a new technology that offers the petroleum industry an opportunity to economically regenerate their waste gas treating chemicals, reduce the total waste volume, and save energy required to manufacture and dispose of process chemicals. The process employs high vacuum distillation under conditions of flow and temperature such that no risk of further degradation is allowed and the treatment chemicals can be used as makeup or fresh chemical in the gas-treating process.

Construction careers in Nova Scotia

Halifax : Dept. of Advanced Education and Job Training, Planning and Evaluation Division, 1991. v, 50 p. : ill. *CSI 52174.200.* ISBN 0-88871-190-5
MICROLOG 93-01452 1 fiche

This document is a counselling document on the Nova Scotia construction sector which provides students and other individuals with information helpful in choosing a career in the construction sector. It includes information on labour market conditions, general working conditions, and other factors important to potential entrants. Although it focuses primarily on the construction trades, it also provides insight into other opportunities available in the construction sector. Information in the document was obtained from Statistics Canada, the Canadian Occupational Projection System, the Conference Board of Canada, the 1986 Census, and through direct contact with individuals working in the sector.

Construction problems in multi-family residential buildings : a documentation and evaluation

by R.G. Drysdale. Ottawa : Canada Mortgage and Housing Corporation ; Toronto : Ontario New Home Warranty Program, 1991. 38 p. : ill.
MICROLOG 93-01760 1 fiche

A computer program was developed to facilitate documentation of design and construction features of multi-family residential construction This program also has a provision for listing of building envelope problems, including location and severity. It is incorporated into the structure of DBase IV and is designed to run on a micro computer compatible with an IBM 286. Data was collected using files on condominium construction available at the Ontario New Home Warranty Program regional offices. The files contained information compiled by Condo Conciliators regarding problem complaints, confirmation and resolution. In many cases, repair costs were also listed. Plans and specifications for the buildings were obtained from the designer, condominium board or contractor. A site visit was also included in one-third of the cases. It was originally proposed that 40 buildings would be included in the survey. Of the 52 buildings surveyed, files on both the design details and problem were completed for 43 buildings

The Construction sector labour market : past performance and outlook for the 1990s

Canadian Labour Market and Productivity Centre. Construction Sector Committee. Ottawa : The Committee, 1993. 41, 44 p. : ill. Bibliogr. *Bilingual (Le Marché du travail...).* ISBN 0-921398-06-9
MICROLOG 93-07804 2 fiche

This paper provides an analysis of demand and supply trends and examines issues in the construction sector labour market in the 1980s and 1990s. It is divided into 3 main sections. The 1st section gives an overview of national and regional output, productivity, employment, and unemployment trends in the 1980s, with particular attention to developments between the 2 cyclical peaks. Changes in the demographic structure of the workforce and trends in apprenticeship enrolment are also discussed. The 2d section looks at forecasts for the key variables analyzed in the 1st part of the paper. The 3d and final section discusses the labour market challenges facing the construction sector in the 1990s, including the weak labour market demand conditions, the need to upgrade the skills of the construction sector workforce, problems with the apprenticeship system, and the sector's inability to attract certain groups such as women, visible minorities and post-secondary graduates.

A Consultation paper on building a provincial strategy to address violence against women, children and elderly and dependent adults

St. John's : Government of Newfoundland and Labrador, 1993. 33 p.
MICROLOG 93-06473 1 fiche

Over the past number of years, the Governments of Newfoundland and Labrador have become increasingly aware of the need for a coordinated plan to address the problem of violence against women, children, and elderly and dependent adults. While there have been a number of initiatives related to preventing violence and the provision of services to victims, the need for a coordinated, long-term strategy has become increasingly evident. In the fall of 1991, the government established the Committee to Develop a Provincial Strategy Against Violence. The purpose of this consultation paper is to seek a response from community groups and individuals to the government's proposed strategies.

Consultation paper on community-based, multi-use school facilities

Toronto : Ministry of Education, 1992. i, 22, i,

22 p. *Bilingual (Document de consultation sur les installations...). ONTERIS: ON06005E.*
MICROLOG 93-01241 1 fiche

The purpose of this consultation paper is to develop final selection criteria for pilot projects for community-based, multi-use schools, and to solicit project proposals. Successful projects should include a school component to be funded from $50 million allocated for the purpose from the 1994-95 capital funding to school boards; the costs of common areas to be shared by community partners. Proposals, to be assessed by an interministerial committee, should meet as many of the 6 draft selection criteria as possible. For example, projects should have the support of school boards, the municipality, and community agencies or groups, either financially or in principle; should address a demonstrated local community need and show evidence of community support; should demonstrate a cost-efficient approach leading to a more effective overall use of provincial and local resources; should be adaptable to meeting changing community needs; and should be distributed equitably across the province, taking into account the needs of urban, rural, aboriginal, and francophone communities. Projects incorporating quality, non-profit child care space will be given priority. A list of ministry contacts concludes the document.

La Contraction des réseaux de transport : la géographie du transport aérien de la Chine

par C. Comtois. Montréal : Université de Montréal, Centre de recherche sur les transports, 1993. 11 p. Bibliogr. (Publication ; no. 887)
MICROLOG 93-05424 1 fiche

Dans l'importante littérature scientifique consacrée aux transports, un thème essentiel apparaît négligé: celui de la contraction des réseaux de transport. Premièrement, on souligne le développement des réseaux des lignes aériennes des pays du Bassin Pacifique. L'Asie de l'Est est une région où le mouvement de passagers et de marchandises impulsé des grandes régions métropolitaines engendre des problèmes de congestion et des pertes de temps et conduit à des articulations spatiales multiples. Deuxièmement, on identifie la performance du réseau aérien chinois à l'aide d'une analyse des conditions économiques nationales, des facteurs de croissance et des caractéristiques du réseau. Les investissements dans le transport aérien visent de plus en plus le développement de chaînes logistiques. Troisièmement, on évalue dans quelle mesure la contraction des réseaux ne s'oppose pas à leur développement mais représente plutôt une nouvelle étape du processus de diffusion.

Contribution au développement économique du Québec : plan de développement, 1993 : proposition, 4

Hydro-Québec. Montréal . la Société, 1992. 31 p. ISBN 2-550-26722-2
MICROLOG 93-05850 1 fiche

Ce document présente l'annexe 4 du plan de développement de la Société. Il analyse l'ensemble des activités d'Hydro-Québec du point de vue de leur contribution au développement économique et de leur appui au développement régional. La première section décrit les effets structurants des activités d'Hydro-Québec reliées à la satisfaction des besoins d'électricité. Plus précisément, elle met en lumière son rôle d'employeur et l'important levier de développement économique découlant de son pouvoir d'achat. La deuxième section porte sur le rôle joué par ses activités de recherche et développement (R et D) dans le développement technologique du Québec et sur leur contribution au développement de nouvelles activités industrielles. Enfin, la troisième partie porte sur les impacts de l'utilisation de l'électricité à des fins de développement industriel. On y analyse les actions commerciales d'Hydro-Québec, qui ont comme objectif premier l'appui au développement économique, et les options qu'elles offrent.

Contribution to Quebec's economic development : development plan 1993 : proposal

Montreal : Hydro-Quebec, 1992. 31 p. (Annexes ; 4) ISBN 2-550-26749-4
MICROLOG 93-07976 1 fiche

This document analyzes Hydro-Quebec's activities from the standpoint of their contribution to economic development and their support of regional development. The first section describes the structuring effects of Hydro-Quebec's electricity supply activities: specifically, the utility's role as an employer and important agent of economic development, by virtue of its purchasing power. The second section discusses the role played by research and development (R&D) activities in the technological development of Quebec, and their contribution to new industrial activities. Finally, the third section covers the impacts of electricity use on industrial development. It analyzes the Hydro-Quebec marketing activities aimed primarily at supporting economic development, and the options they afford.

Control and protection of advanced series compensation

by F. Unterlass, S. Weiss and K. Renz. Montreal : Canadian Electrical Association, Engineering and Operating Division, Power System Planning and Operation Section, SVC and HVDC Controls Committee, 1992. 25 p. : ill. Bibliogr. *Presented at the Canadian Electrical Association Engineering and Operating Conference.*
MICROLOG 93-06108 1 fiche

Digital controls permit full advantage to be taken of the benefits of Advanced Series Compensators (ASC) with controllable series impedance. The line current and the line impedance can smoothly be controlled over a very wide range. This paper gives a general description of ASC control followed by a look at impedance control mode, ASC current control mode and thyristor switched reactor mode. It then gives a general description of protection and some detail with regards to capacitor unbalance protection, capacitor overload protection, MOV protection, MOV overload protection, MOV failure protection, and thyristor protection. Discussion of capacitor overload impact on ASC control and MOV overload on ASC control are followed by conclusions.

Control of parasitism, chalkbrood and foliar mould problems in leafcutting bees : final report

by D.W. Goerzen Regina : Saskatchewan Agriculture Development Fund, 1992. 43 p. Bibliogr. *CSI 72228 207.*
MICROLOG 93-06782 1 fiche

Surveys of Saskatchewan leafcutting bee populations in 1990 and 1991 indicate that chalkbrood disease (caused by the fungus Ascosphaera aggregata) is present at low levels in the province. Also, an increase in parasitism has caused many producers to use dichlorvos at rates exceeding the recommended rate. To examine the effects of increased dichlorvos rates at various time periods on bee development and emergence during incubation, tests involving the treatment of bee cells with various rates of dichlorvos were undertaken. The levels of molds, chalkbrood disease and chalcid parasitism in bee populations were assessed. Alternative compounds were evaluated and tested for the control of chalcid parasites, and new technology for decontaminating leafcutting bee nest material was developed.

Control of smoke from crop residue burning : discussion paper

Manitoba. Crop Residue Burning Advisory Committee. Winnipeg : The Committee, 1993. 7 p.
MICROLOG 93-03374 1 fiche

Smoke from untimely and inappropriate burning of crop residues in Manitoba has been an issue for many harvest seasons because of its effect on those with respiratory problems and those driving. Education and extension programs have been carried out extensively with farmers in recent years and by 1991 had resulted in a significant decrease in the amount of crop residue burning but the burning in 1992 still resulted in a number of complaints around Winnipeg and other areas. This discussion paper presents the health concerns of burning and the farmers' point of view and makes some suggestions for options to address both.

Control of zebra mussels by thermal shock

by J.S. Griffiths. Toronto : Ontario Hydro, Research Division, 1992. iv, 89 p. : ill. Bibliogr. (Report ; no. 92-65-K)
MICROLOG 93-02977 1 fiche

To establish temperatures required for thermal backwash protocols, resistance times of zebra mussels (10 mm length) were determined in laboratory experiments using mussels acclimated to temperatures of 5C, 10C, 20C and 25C. Test temperatures ranged from 34C-38C. In each experiment, 10-12 groups (each of 10 mussels) were exposed to the test temperature for prescribed intervals and examined to determine percentage mortality. Two replicate tests were run for each temperature. Regressions of percentage mortality (probit scale) against exposure time (log scale) were used to estimate times for first mortality, 50 and 100 percent mortality.

Le Contrôle mécanique du charançon du pin blanc

par R. Lavallée et J. Morissette. Sainte-Foy, Québec : Forêts Canada, Centre forestier des Laurentides, 1989. 9 p. : ill. (Feuillet d'information ; CFL 25) *L'éd. anglaise (Mechanical control of the white pine weevil) sur la même fiche.* ISSN 0703-220X ISBN 0-662-95349-5
MICROLOG 93-06402 1 fiche

Le charançon du pin blanc est un obstacle important à la croissance de certains conifères, notamment le pin blanc et l'épinette de Norvège. Bien que présent naturellement dans nos forêts, le charançon cause davantage de dommages dans les plantations. Les conséquences pour le producteur forestier sont particulièrement coûteuses si le bois est destiné au marché du sciage. Malgré l'importance du contrôle biologique naturel, les populations de cet insecte atteignent parfois des niveaux très élevés. L'objectif de ce feuillet est de donner aux forestiers certaines connaissances sur le charançon afin de leur permettre d'intervenir rapidement et judicieusement dans une plantation où les attaques par le charançon en sont à leur début.

Cooling buildings in downtown Toronto : final report on the work of the Deep Lake Water Cooling Investigation Group

Canadian Urban Institute. Toronto : The Institute, 1993. viii, 49 p. (Urban focus series ; 93-2) *CANMET contract: 23440-1-910601SQ.*
ISSN 1183-2304 ISBN 1-895446-03-1
MICROLOG 93-05436 1 fiche

This is a final report on a two-year, two-phase process of investigation that began with a consideration of the merits of using cold water from the depths of Lake Ontario to cool buildings in downtown Toronto. It evolved into a broader consideration of many aspects of cooling, from demand for cooling to evaluation of trends in cooling technology. The process was supervised by the Deep Lake Water Cooling Investigation Group, an ad hoc steering committee comprised of representatives of several interested public agencies that provided funding for the work. The report provides background information on the concept; describes the process involved; presents the findings, including environmental matters, alternative methods of cooling, selection of the preferred alternative, and management of a district cooling system; and gives implementation measures.

This discussion paper researched existing cooperative models to determine the concept's suitability in the B.C. context. Recycling cooperatives include organizations formed by government members and their agents to sell (or buy) recyclable goods. The paper includes information regarding municipal, state or provincial initiatives and emphasizes the relationship of the private sector (buyer and broker infrastructure) with cooperative organizations. The paper includes trends in cooperatives in rural, small and urban communities, and state governments; an evaluation of cooperative opportunities; information on particular models of cooperatives, including the Bluewater Recycling Association, Northwest Ontario Recycle, New Hampshire Resource Recovery Association, Long Island Regional Recycling Cooperative, South West Public Recycling, and the recycling operation at the University of Wisconsin in Green Bay. Summaries are also given of a number of other cooperatives. For each of the major models, information is given on address, phone and fax numbers, number of households and residents involved, fee for service, funding, services, facilities, operator, materials taken, staff, and entry and growth strategies

Les Coopératives au Canada

édité par Les McCagg. Ottawa : Secrétariat aux coopératives, 1992. 18 p. *L'éd. anglaise (Co-operatives in Canada) sur la même fiche. CSI 22350.100*
MICROLOG 93-06549 1 fiche

Les coopératives, une forme d'entreprise originale et distincte, existent dans presque tous les secteurs de l'économie canadienne. Au Canada, comme ailleurs, les coopératives ont pris naissance dans le milieu agricole, mais le concept a rapidement gagné d'autres secteurs d'activités où le besoin était évident (épargne, crédit, nourriture, assurance-vie, logement, garderie, main-d'oeuvre, etc.). Ce document examine ce qu'est une coopérative et aborde en autres points l'historique, la structure du mouvement coopératif canadien.

édité par Les McCagg. Ottawa : Secrétariat aux coopératives, 1992. iii, 107, iii, 107 p. : ill. *Bilingue (Canadian co-operatives resource file, 1992). CSI 22350.002.*
MICROLOG 93-00408 3 fiche

Cette publication est la cinquième édition à être produite depuis 1988. L'objet de ce document est de faire connaître aux élus et aux fonctionnaires fédéraux la force et la diversité des coopératives au Canada. On y présente des statistiques sur tous les secteurs du mouvement coopératif, qu'ils soient financiers (crédit, épargne, fiducie, assurance) ou non (consommation, approvisionnement, mise en marché, production et services). On y décrit les relations qui existent entre les gouvernements et les coopératives, de même que les associations nationales et internationales du mouvement coopératif.

A Coordinate descent method for the bilevel O-D matrix adjustment problem -- Rev.

by M. Florian and Y. Chen. Montreal Université de Montréal, Centre de recherche sur les transports, 1993. 27 p. : ill. Bibliogr. (Publication ; no. 807) (Publication ; no. 802)
MICROLOG 93-08153 1 fiche

This report presents a Gauss-Seidel type algorithm for the problem of adjusting an O-D matrix by using observed flows in congested networks. The problem is formulated as a bilevel optimization problem. Necessary conditions for some properties of the solution of the O-D matrix adjusting problem are derived and a coordinate descent method is developed. The algorithm takes full advantage of the network structure of the lower level problem and does not require many objective function evaluations. Computational results for some numerical examples are reported.

A Coordinated approach to interviewing in child sexual abuse investigations

by R. Hunter, J.C. Yuille and W. Harvey Ottawa : Health and Welfare Canada, Social Service Programs Branch, Family Violence Prevention Division, National Clearinghouse on Family Violence, 1992. 7 p. Bibliogr. *In Canada's Mental Health : vol. 38, no 2/3, July-September 1990. French ed. (Une Méthode coordonnée d'entrevues relatives...) on the same fiche.* ISBN 0-662-19470-5
MICROLOG 93-03263 1 fiche

Community and professional awareness of child sexual abuse has grown dramatically during the past decade. A variety of agencies must respond to allegations of sexual abuse, and conflict between the mandates of different agencies has hampered adequate interventions in child sexual abuse cases. Inter-agency cooperation is an essential prerequisite to an effective response. This article outlines a model for inter-agency training and cooperation. It includes examples of the application of this model.

Copper in gold plant effluent, Saskatchewan MDA : final report

Cameco. Ottawa : Energy, Mines and Resources, Canada Centre for Mineral and Energy Technology, 1992. ii, 45 p. : ill. *CANMET contract: 23440-1-9091-01-SQ.*
MICROLOG 93-01567 1 fiche

Natural degradation processes, as used at the Star Lake waste management facility for gold mill tailings, effectively removed cyanide during the open water season but were unable to reduce apparent dissolved copper concentrations to below effluent release compliance levels. This study was undertaken to examine the causes of the problem and to investigate possible mitigative measures based on an understanding of these causes. The testwork program included chemical characterization, pure chemical precipitation, filtration, coagulation, natural degradation, microbiological enumeration and tests of natural lake sediments to investigate colloid formation. Recommendations are made for the design of future gold mill waste management facilities where the intention is to use natural degradation.

Corporate sustainable development reporting in Canada : reporting on sustainable development in support of decision-making for corporations and sectors

by D. Nitkin and D. Powell. Ottawa : National Round Table on the Environment and the Economy, 1993. 81 p. Bibliogr. (Working paper ; no. 17)
MICROLOG 93-06373 1 fiche

This report assesses the gap between ideal and actual corporate reporting practices, sets out strategies to enhance what reporting does exist, and offers eighteen recommendations to stakeholders to improve corporate performance in monitoring and reporting. It also outlines a view of desirable monitoring and reporting, one based on realistic appraisal that genuine corporate sustainable development reporting is in its relative infancy. It addresses questions about progress in sustainable development reporting even when these go beyond the terms of reference.

by K. MacDonald-Date. Edmonton : Alberta Agriculture, Production Economics Branch, 1993. iv, 22 p. *CSI 35247.004.*
MICROLOG 93-08488 1 fiche

Alberta Agriculture, along with the Alberta Egg Marketing Board, initiated a provincial cost study in 1983 to monitor the relationship between the national cost and the provincial cost. This report is the summary of the latest year of that study. It provides an analysis of the results in terms of income, variable costs, pullet costs, feed costs, labour costs, other cash expenses, cost of capital, returns, management and a management profile. Information on the national survey is included. This report was prepared from farm records of a selected number of Alberta egg producers who voluntarily participated in this project.

Cost and design of housing for disabled persons : case studies : final report

Associated Planning Consultants. Ottawa : Canada Mortgage and Housing Corporation, 1983. xi, 217 p. : ill. *French ed. (Coût et aménagement de logements pour...) : 93-03472/3.* ISBN 0-662-12891-5
MICROLOG 93-00246 3 fiche

Through the analysis of case studies, specific information was produced on the design and cost of housing accessibility for disabled persons in a variety of housing contexts. Seventeen case studies were selected across Canada to provide a cross-section by region, type of accommodation, method of financing, conversions vs purpose-built, and disability. Data collection was mainly through field visits using a data collection checklist as a guide. Interviews were carried out with users, architects, contractors, housing authorities, and CMHC representatives. House/floor/unit plans were obtained and photographs taken where appropriate. Data were analyzed to determine the functional status of the user and the appropriateness, functional adequacy and acceptability of the disability-related design features within the housing. Where available, information was collected on the cost of incorporating these features into the housing. Cost estimates were also prepared by cost consultants for each case study and presented in 1982 dollars. The report contains information on the methodology of the research study, the general findings, narrative reports on each of the case studies including cost data, and appendices on the data collection material, list of contacts, funding programs, and cost update and geographical indices.

Cottagers' self-help program : enrichment status of lakes in the southeastern region of Ontario

Ontario. Ministry of the Environment. Southeastern Region. Water Resources Assessment Unit. Toronto : The Unit, 1992. iii, 24 p. ISSN 0822-1251
MICROLOG 93-03260 1 fiche

This report is the 17th in a continuing series of reports on the cottagers self-help program for the southeastern region of Ontario that includes Hastings and Prince Edward counties and eastward to the Ontario-Quebec border. The program relies on the cottagers and other waterfront property owners to monitor the water quality of inland recreational lakes, including making regular observations on water clarity and collecting samples of water for determination of their algae content. This report presents the monitoring results for the 108 lakes enroled in the self-help program during 1991. The report also contains information to help cottagers protect their lake through such practices as maintaining their sewage systems in good order.

Counselling for change : evolutionary trends in counselling services for women who are abused and for their children in Canada

by L. MacLeod. Ottawa : Health and Welfare Canada, Family Violence Prevention Division, National Clearinghouse on Family Violence, 1990. 31 p. ISBN 0-662-19909-X
MICROLOG 93-03286 1 fiche

This document traces the convergence in counselling approaches across disciplines, world views, and places of work, and communicates the insights emerging through the current search for more effective counselling approaches. It examines some current trends in counselling for battered women and their children, describes some programs that reflect this convergence, and highlights some issues challenging counsellors concerned with meeting the needs of these women and children. It contains information obtained primarily through interviews with counsellors working in 60 different programs, services, or settings and with battered women and their children.

Coup d'oeil sur l'évolution de la situation économique des québécoises -- Rév.

Québec : Gouvernement du Québec, Conseil du statut de la femme, 1993. 23 p. Bibliogr. (Avis du Conseil du statut de la femme)
ISBN 2-550-27395-8
MICROLOG 93-08083 1 fiche

La situation économique difficile qui prévaut actuellement touche encore plus durement les femmes que les hommes, notamment à cause de leur situation plus précaire sur le marché du travail et de leurs faibles revenus. Ce document montre les effets négatifs de cette situation pour un nombre grandissant de femmes. Dans cette perspective, il esquisse les deux facettes de la situation: d'une part, les acquis réalisés par les femmes sur le plan de leur autonomie économique au cours des vingt dernières années et, d'autre part, les limites de cette autonomie compte tenu du fait qu'une proportion importante de femmes ne dispose toujours pas d'un revenu personnel suffisant pour subvenir seules à leurs besoins et à ceux de leur famille.

Coupling the auxiliary problem principle with descent methods of pseudoconvex programming

by P. Marcotte and D.L. Zhu. Montreal Université de Montréal, Centre de recherche sur les transports, 1993. 15 p. Bibliogr. (Publication ; no. 918)
MICROLOG 93-08184 1 fiche

The descent auxiliary problem method allows one to find the solution of minimization problems by solving a sequence of auxiliary problems which incorporate a linesearch strategy. This report derives the basic algorithm and studies its convergence properties within the framework of infinite dimensional pseudoconvex minimization. It also introduces a partial descent type auxiliary problem method which partially linearizes the objective functional and includes the auxiliary term only for a subsect of variables. Numerous examples of this very general scheme are provided.

MICROLOG 93-08070 1 fiche

Cette étude porte sur l'efficacité des accusations portées par les agents de police dans les cas de violence conjugale, lorsque la police a des motifs valables de croire qu'une agression a été commise. Pour évaluer l'efficacité de cette politique, on a interrogé 90 femmes à London (Ontario) qui avaient été agressées physiquement par leur conjoint et qui ont fait l'objet de l'une des trois interventions suivantes: intervention de la police suivie d'une accusation, intervention de la police non suivie d'une accusation; et aucune intervention de la police et aucune accusation.

MICROLOG 93-06641 1 fiche

The Canadian Charter of Rights and Freedoms came into force on 17 April 1982. The legal rights guaranteed by the Charter are contained in sections 7 to 14 inclusive. They deal with such matters as the right to life, liberty and security; the right to be secure against unreasonable search and seizure; the rights of an accused upon arrest; the right of an accused to certain proceedings in criminal and penal matters; and the right not to be subject to cruel and unusual punishment. The purpose of this analysis is to determine what effect sections 11, 12, and 13 of the Charter have had on existing criminal law since then. As there are now a great number of decided cases dealing with these sections, this paper will concentrate on significant decisions of the provincial courts of appeal and the Supreme Court of Canada.

Critical evaluation of subsoiling tillage

by M. Grevers. Regina : Saskatchewan Agriculture Development Fund, 1989. 26 p. Bibliogr
MICROLOG 93-02407 1 fiche

In 1985 a study was begun to evaluate the short and long-term effect of deep tillage on soil physical properties and crop production. Of the 12 field tests, six represent solonetzic soils (hardpan soils) and six represent chernozemic soils. The work was initiated in the fall of 1985 with three deep ripped fields in the Tisdale area. Since then, nine more deep ripped and/or paraplowed field tests were added to the project. This report summarizes the work on subsoiling tillage and deep ripping from 1986-88

Critical examination of correlations between fracture toughness and charpy impact energy : final report

by R. Phaal, K.A. Macdonald and P.A. Brown. Cambridge, UK : The Welding Insitute, 1992. iv, 129 p. : ill. Bibliogr. *CANMET contract: 23440-9-9147-01-SQ*
MICROLOG 93-01536 2 fiche

The structural assessment of fusion welded plant requires fracture toughness to be known in terms of K, CTOD or J. However, toughness is often known only in terms of Charpy impact energy or some other quality control based parameter. Many correlations have been developed between fracture toughness and simple measures of toughness. This project involved a critical review of published correlations and the development of computer software for application of suitable correlations.

A Critical review of mend studies conducted to 1991 on subaqueous disposal of tailings : final report

Rawson Academy of Aquatic Science. Ottawa . The Academy, 1992. 49 p Bibliogr. *CANMET contract: 23440-1-9131-01-SQ*
MICROLOG 93-01571 1 fiche

Mine environment neutral drainage (MEND) studies on the subaqueous disposal of tailings material were subjected to critical review by a group of experts under the direction of the Rawson Academy of Aquatic Science in Ottawa. The review provided technical and scientific assessment of MEND studies and outlined additional requirements necessary for the MEND studies to maintain a credible scientific approach. The technical and scientific review included the conceptual basis, a literature review, proposals for studies on the effects of underwater disposal of waste rock and tailings, background limnologies of case study lakes and field studies and analytical work. Additional requirements include the scope and detail of the literature review, a re-definition of hypotheses and/or new hypotheses, background limnological data, field data and laboratory data.

Critical silvics of conifer crop species and selected competitive vegetation in northwestern Ontario

by F.W. Bell. S.l. : Canada-Ontario Forest Resource Development Agreement, 1991. vi, 177 p. : ill., maps. Bibliogr. (COFRDA repor 3310) (Technical report ; no. 19) ISSN 0847-2866 ISBN 0-662-18393-2
MICROLOG 93-00726 2 fiche

This guide contains silvicultural and ecological information on balsam fir, black spruce, white spruce, jack pine, and red pine and 23 woody and herbaceous potential competitor species (including trembling aspen, balsam poplar, white birch, beaked hazel, and mountain maple). The guide summarizes, for each species, information on identification and taxonomy, autecology, phenology, and reproductive and growth habits. In addition, potential competitors are evaluated and discussed for their competitive effects and mechanisms, their wildlife values, and their response to disturbance and silvicultural treatments, including their adaptation to the latter. The five conifers are also evaluated for their response to competition and their ability to respond to release from different competing species. Information was obtained mainly from a review of the literature. Selected soil and site data from the Northwestern Ontario Forest Ecosystem Classification database is also incorporated.

Crop production clubs : the final report of the study to determine the role of production clubs and associations in the technology transfer process

by G.W. Hass. Regina : Saskatchewan Agriculture Development Fund, 1989. 9 p. Bibliogr.
MICROLOG 93-02402 1 fiche

In the past few years, there has been a renewed interest in crop production clubs. The clubs were first organized to try various production techniques and to determine how to improve or maximize yields but more recently, they have focused on the economical aspects of production and a large number have included a strong emphasis on soil conservation and marketing. This study was conducted to determine why farmers join such clubs, the internal characteristics that give strength or cause problems, and the role such groups can play in the agricultural technology transfer process. All agriculture representatives were contacted to find out how many crop production clubs existed and to identify key producers active in the clubs. A survey form was then developed and used as a guideline to facilitate interviews with club members, public agrologists who work with clubs and industry representatives from the private sector. Interviews were conducted in October and November 1988

Cross-boundary issues in south entral Ontario : a discussion paper

Toronto : Ministry of Municipal Affairs, 1993. 25 p. : ill., maps. *French ed. (Questions touchant l'ensemble de la région...) on the same fiche.*
MICROLOG 93-08440 1 fiche

eyond the boundaries of the Greater Toronto rea, extending from Orillia to Brantford, south entral Ontario is an area facing issues of rban and rural development that have little egard for municipal boundaries. The purpose f this study is to review the broader implications of long-term growth and servicing issues facing the communities of south central Ontario. Stepping back to view the big picture will help to identify cross-boundary issues shared by the area's communities. The paper should serve to stimulate discussion of possible joint approaches to these issues: population and housing, employment and economy, greenlands and natural resources, agriculture, transportation, water and sewer services, urban and rural settlement patterns, and implications of settlement trends.

Crossing signal assessment

by K.F. Lin. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1988. xii, 69 p. : ill.
MICROLOG 93-04641 1 fiche

Evaluation of the photometric performance of a prototype LED crossing signal developed by Davis Engineering Ltd. The project measured the lumen output of the 10-volt, 18-watt S11 tungsten lamp under different electrical operating conditions; investigated its characteristics; measured its spatial candlepower distribution; and evaluated its luminous efficacy. The project also measured and compared the spatial candlepower distributions and photometric performances of the 61-LED crossing signal and a conventional incandescent signal with a main body made by Western Cullen Hays Inc. and a roundel made by General Signals Inc. using an automated mirror photometer. Options to improve the performance of the LED crossing signal are proposed.

Cruise details and biological information from the Pacific Ocean perch larval survey aboard the R/V *W.E. Ricker*, March 11-29, 1991

by G.E. Gillespie, R.D. Stanley and B.M. Leaman. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1992. iv, 53 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 873) ISSN 0706-6465
MICROLOG 93-02798 1 fiche

This report provides the preliminary results of a research cruise to investigate the geographic and bathymetric distribution of larvae of Pacific Ocean perch. The study area consisted of stations at various depths along five transect lines on and around the Goose Island Bank in Queen Charlotte Sound. Seven bottom trawl tows, two midwater trawl tows, 21 neuston net tows and 76 Tucker trawl tows were completed in the study area. Two additional bottom trawl tows were conducted off Nootka Sound on the west coast of Vancouver Island to collect yellowtail rockfish for a separate genetic research project. Larvae of Pacific ocean perch were sampled throughout March during the general time of parturition to develop knowledge of the early life history of rockfishes and techniques for the capture, identification and quantification of rockfish larvae.

Crystallization of PbCl2 from synthetic ferric chloride leach liquor

by D.Y. Shimano and G.F. Wallingford. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1992. i, 19 p. : ill. Bibliogr. (Report ; MSL 89-71(TR))
MICROLOG 93-03429 1 fiche

Large deposits of complex fine-grained base metal sulphide ores occur in many locations world-wide. Although many of these deposits are relatively high grade, their economic exploitability has been severely hindered by the difficulty in achieving high metal recoveries while producing readily saleable selective flotation concentrates. Metal recoveries from such ores can be significantly improved by producing a bulk concentrate rather than selective concentrates. CANMET has developed the ferric chloride leach (FCL) process to treat complex, low grade, zinc/lead/copper/silver sulphide ores and concentrates. This test program evaluated crystallization and washing procedures to produce purified lead chloride crystals.

Cumulative effects assessment and regional planning in southern Ontario

by P.M. Hubbard. Hull, Que. : Canadian Environmental Assessment Research Council, 1990. ii, 99 p. Bibliogr. (Manuscript report , MR5-88)
MICROLOG 93-05298 2 fiche

This report examines the status of Cumulative Environmental Assessment (CEA) and regional planning in the Regional Municipality of Waterloo, focusing on water resource management. The report develops criteria for effective implementation of CEA and describes the opportunities for CEA implementation given the planning and environmental legislation, policies, and programs. Interviews with directors, managers, and administrators of the environmental agencies supplemented the documented information available. It then evaluates the extent to which the R.M. of Waterloo and associated urban municipalities utilize the environmental legislation, policies, and programs, using documented evidence supplemented by interviews with Commissioners and Directors of Planning and Development at the Regional level and urban municipalities. Finally, the report assesses the overall feasibility of the concept based on the existing status of environmental management for water resources in Southern Ontario and the role of regional planning

Cur cum TRIO?

by M.J.I. Gaudry...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1993. iii, 18 p. : ill. Bibliogr. (Publication ; no. 901) *Bilingual*
MICROLOG 93-05420 1 fiche

Summary of the professional, scientific, and technical features of the TRIO interactive-graphic regression analyst that is characterized by a full integration of the four basic tasks required for regression work. These include management of information, production of models, analysis of data or model results, and assistance in report generation.

Une Cure de jeunesse pour l'enseignement collégial : avis

Québec (Province) Conseil permanent de la jeunesse. Québec : le Conseil, 1992. vii, 79 p. : ill. ISBN 2-550-26798-2
MICROLOG 93-08306 1 fiche

Cet avis est divisé en trois chapitres. Le premier rappelle brièvement la diversité de la clientèle étudiante collégiale et trace un portrait type de certains besoins ou préoccupations du jeune qui fréquente le collège. Dans le second chapitre, le Conseil présente et commente les résultats de l'enquête menée auprès de diplômés et non-diplômés des secteurs préuniversitaire et professionnel du collégial. Le troisième et dernier chapitre présente la réflexion du Conseil permanent de la jeunesse et les voies prioritaires d'actions qu'il propose en regard de l'avenir de l'enseignement collégial.

A Current evaluation of Saskatchewan's private forest resources : final report

Farm Woodlot Association of Saskatchewan Regina : Saskatchewan Agriculture Development Fund, 1991. iii, 209 p. : maps. Bibliogr.
MICROLOG 93-00469 3 fiche

This report examines the potential for Saskatchewan's private forest enterprises to contribute in a financially beneficial manner to existing and projected demands for timber, and examines some alternatives to this conventional use of the forest resource. Specific goals include identifying market opportunities and constraints for utilization of primary wood products from private lands; conducting an economic analysis of the costs and return on investment relating to woodlot operations; and assessing the effects of different organizational structures on woodlot viability.

Dairy cattle production and research : final report

Regina : Saskatchewan Agriculture Development Fund, 1990. 20 p. *At head of title: Saskatchewan Agricultural Development Corp. and Dairy Producers Cooperative Contract. CSI 72228.204.*
MICROLOG 93-06787 1 fiche

A comprehensive survey of water on Saskatchewan dairy farms revealed that 20% of dairy farms use water containing 1,000 mg/L or more of sulphate. This level requires use of special copper supplements that may be associated with other problems such as insufficient thiamine absorption. A computerized dairy feeding system was evaluated and information from this system was of use in introducing computerized feeding systems in Saskatchewan dairy herds. A ration evaluation program was developed for teaching and farm demonstration purposes, and a large number of feeds were evaluated.
